Tomas Chamorro-Premuzic,2019-02-19 Look around your office Turn on the TV Incompetent leadership is everywhere and there's no denying that most of these leaders are men In this timely and provocative book Tomas Chamorro Premuzic asks two powerful questions Why is it so easy for incompetent men to become leaders And why is it so hard for competent people especially competent women to advance Marshaling decades of rigorous research Chamorro Premuzic points out that although men make up a majority of leaders they underperform when compared with female leaders In fact most organizations equate leadership potential with a handful of destructive personality traits like overconfidence and narcissism In other words these traits may help someone get selected for a leadership role but they backfire once the person has the job When competent women and men who don't fit the stereotype are unfairly overlooked we all suffer the consequences The result is a deeply flawed system that rewards arrogance rather than humility and loudness rather than wisdom There is a better way With clarity and verve Chamorro Premuzic shows us what it really takes to lead and how new systems and processes can help us put the right people in charge Design Thinking Research Christoph Meinel,Larry Leifer,2021-03-26 Extensive research conducted by the Hasso Plattner Design Thinking Research Program at Stanford University in Palo Alto California USA and the Hasso Plattner Institute in Potsdam Germany has yielded valuable insights on why and how design thinking works The participating researchers have identified metrics developed models and conducted studies which are featured in this book and in the previous volumes of this series This volume provides readers with tools to bridge the gap between research and

practice in design thinking with varied real world examples Several different approaches to design thinking are presented in this volume Acquired frameworks are leveraged to understand design thinking team dynamics The contributing authors lead the reader through new approaches and application fields and show that design thinking can tap the potential of digital technologies in a human centered way In a final section new ideas in neurodesign at Stanford University and at Hasso Plattner Institute in Potsdam are elaborated upon thereby challenging the reader to consider newly developed methodologies and provide discussion of how these insights can be applied to various sectors Special emphasis is placed on understanding the mechanisms underlying design thinking at the individual and team levels Design thinking can be learned It has a methodology that can be observed across multiple settings and accordingly the reader can adopt new frameworks to modify and update existing practice The research outcomes compiled in this book are intended to inform and provide inspiration for all those seeking to drive innovation be they experienced design thinkers or newcomers
