### **Big Bang Disruption**

Larry Downes,Paul Nunes,2014-01-07 It used to take years or even decades for disruptive innovations to dethrone dominant products and services But now any business can be devastated virtually overnight by something better and cheaper How can executives protect themselves and harness the power of Big Bang Disruption Just a few years ago drivers happily spent more

than 200 for a GPS unit But as smartphones exploded in popularity free navigation apps exceeded the performance of stand alone devices Eighteen months after the debut of the navigation apps leading GPS manufacturers had lost 85 percent of their market value Consumer electronics and computer makers have long struggled in a world of exponential technology improvements and short product life spans But until recently hotels taxi services doctors and energy companies had little to fear from the information revolution Those days are gone forever Software based products are replacing physical goods And every service provider must compete with cloud based tools that offer customers a better way to interact Today start ups with minimal experience and no capital can unravel your strategy before you even begin to grasp what s happening Never mind the innovator s dilemma this is the innovator s disaster And it s happening in nearly every industry Worse Big Bang Disruptors may not even see you as competition They don t share your approach to customer service and they re not sizing up your product line to offer better prices You may simply be collateral damage in their efforts to win completely different markets The good news is that any business can master the strategy of the start ups Larry Downes and Paul Nunes analyze the origins economics and anatomy of Big Bang Disruption They identify four key stages of the new innovation life cycle helping you spot potential disruptors in time And they offer twelve rules for defending your markets launching disruptors of your own and getting out while there s still time Based on extensive research by the Accenture Institute for High Performance and in depth interviews with entrepreneurs investors and executives from more than thirty industries Big Bang Disruption will arm you with strategies and insights to thrive in this brave new world *Finding the Next Steve Jobs* Nolan Bushnell, Gene Stone, 2013-07-16 From the legendary founder of Atari and Chuck E Cheese s and Steve Jobs s first boss the secrets to finding hiring keeping and nurturing creative talent The business world is changing faster than ever and every day your company faces new complications and difficulties The only way to resolve these issues is to have a staff of wildly creative people who live as much in the future as the present who thrive on being different and whose ideas will guarantee that your company will prosper when other companies fail A celebrated visionary and iconoclast Nolan Bushnell founded the groundbreaking gaming company Atari before he went on to found Chuck E Cheese s and two dozen other companies He also happened to launch the career of the late Steve Jobs along with those of many other brilliant creatives over the course of his five decades in business With refreshing candor keen psychological insight and robust humor Bushnell explains in *Finding the Next Steve Jobs* how to think boldly and differently about companies and organizations and specifically the people who work within them For anyone trying to turn a company into the next Atari or Apple build a more creative workforce or fashion a career in a changing world this book will enlighten challenge surprise and amuse *Age of Context* Robert Scoble, Shel Israel, 2014 In 2006 co authors Robert Scoble and Shel Israel wrote *Naked Conversations* a book that persuaded businesses to embrace what we now call social media Six years later they have teamed up again to report that social media is but one of five converging forces that promise to change virtually every aspect of our lives You know these other forces

already mobile data sensors and location based technology Combined with social media they form a new generation of personalized technology that knows us better than our closest friends Armed with that knowledge our personal devices can anticipate what we ll need next and serve us better than a butler or an executive assistant The resulting convergent superforce is so powerful that it is ushering in a era the authors call the Age of Context In this new era our devices know when to wake us up early because it snowed last night they contact the people we are supposed to meet with to warn them we re running late They even find content worth watching on television They also promise to cure cancer and make it harder for terrorists to do their damage Astoundingly in the coming age you may only receive ads you want to see Scoble and Israel have spent more than a year researching this book They report what they have learned from interviewing more than a hundred pioneers of the new technology and by examining hundreds of contextual products What does it all mean How will it change society in the future The authors are unabashed tech enthusiasts but as they write an elephant sits in the living room of our book and it is called privacy We are entering a time when our technology serves us best because it watches us collecting data on what we do who we speak with what we look at There is no doubt about it Big Data is watching you The time to lament the loss of privacy is over The authors argue that the time is right to demand options that enable people to reclaim some portions of that privacy
