[Japanese from Zero!](#) George Trombley, Japanese From Zero is an innovative and integrated approach to learning Japanese that was developed by professional Japanese interpreter George Trombley Yukari Takenaka and was continuously refined over eight years in the classroom by native Japanese professors Using up to date and easy to grasp grammar Japanese From Zero is the perfect course for current students of Japanese as well as absolute beginners

[Research Design](#) Stephen Gorard, 2013-02-01 Research design is of critical importance in social research despite its relative neglect in many methods resources Early consideration of design in relation to research questions leads to the elimination or diminution of threats to eventual research claims by encouraging internal validity and substantially reducing the number of alternative explanations for any finite number of research observations This new book discusses the nature of design gives an introduction to design notation offers a flexible approach to new designs looks at a range of standard design models and presents craft tips for real life problems and compromises Most importantly it provides the rationale for preferring one design over another within any given context Each section is illustrated with case studies of real work and concludes with suggested readings and topics for discussion in seminars and workshops making it an ideal textbook for postgraduate research methods courses Based on the author's teaching on the ESRC Doctoral Training Centre Masters in Research Methods at the University of Birmingham and his ongoing work for the ESRC Researcher Development Initiative this is an essential text for postgraduate researchers and academics There is no book like Research Design on the

market that addresses all of these issues in an easy to comprehend style for those who want to design research and make critical judgements about the designs of others

*The Problem of Social Cost* R. H. Coase,2016-10-10

The Problem of Social Cost is an article dealing with economic problem of externalities It draws from a number of English legal cases and statutes to illustrate Coase s belief that legal rules are only justified by reference to a cost benefit analysis and that nuisances that are often regarded as being the fault of one party are more symmetric conflicts between the interests of the two parties

*Data-Intensive Text Processing with MapReduce* Jimmy Lin,Chris Dyer,2022-05-31

Our world is being revolutionized by data driven methods access to large amounts of data has generated new insights and opened exciting new opportunities in commerce science and computing applications Processing the enormous quantities of data necessary for these advances requires large clusters making distributed computing paradigms more crucial than ever MapReduce is a programming model for expressing distributed computations on massive datasets and an execution framework for large scale data processing on clusters of commodity servers The programming model provides an easy to understand abstraction for designing scalable algorithms while the execution framework transparently handles many system level details ranging from scheduling to synchronization to fault tolerance This book focuses on MapReduce algorithm design with an emphasis on text processing algorithms common in natural language processing information retrieval and machine learning We introduce the notion of MapReduce design patterns which represent general reusable solutions to commonly occurring problems across a variety of problem domains This book not only intends to help the reader think in MapReduce but also discusses limitations of the programming model as well

**The Earth's Land Surface** Kenneth J Gregory,2010-03-23

Given the sheer scale of the topic under consideration here Professor Gregory does well to condense it into bite size pieces for the reader I recommend this text to all undergraduate students of physical geography and earth sciences particularly to those in their first and second years This book is a comprehensive and crucially inexpensive text that will provide students with a useful source on geomorphology

Lynda York *The Geographical Journal* I would highly recommend this to anyone doing geology or geography at university as a go to book for geomorphology and landform

Sara Falcone *Teaching Earth Science* An excellent source of information for anyone who needs a well informed easy to use reference volume to introduce them to the fascinating complexities of the earth s land surface past present and future

Angela Gurnell *Queen Mary University of London* This introductory text details the land surface of the earth in a readable style covering the major issues key themes and sensitivities of the environments landscape Emphasising the major ideas and their development each chapter includes case studies and details of influential scientists not necessarily geomorphologists who have contributed to the progress of understanding Providing a very clear explanation of the understanding achieved and

of the debates that have arisen the book is comprised of 12 chapters in four sections Visualising the land surface explains and explores the composition of the land surface and outlines how it has been studied Dynamics of the land surface considers the dynamics affecting the earth's land surface including its influences processes and the changes that have occurred Environments of the land surface looks to understand the land surface in major world regions highlighting differences between the areas Management of the land surface is an examination of the current and future prospects of the management of the earth's land surface With pedagogical features including further reading questions for discussion and a glossary this original lively text is authored by one of the leading experts in the field and will be core reading for first and second year undergraduates on all physical geography courses
