Ternes,Adriano Joss,2007-01-30 The observed concentrations of pharmaceuticals and personal care products PPCPs in raw wastewater confirm that municipal wastewater represents the main disposal pathway for the PPCPs consumed in households hospitals and industry In sewage treatment plant effluents most PPCPs are still present since many of these polar and persistent compounds are being removed only partially or in some cases not at all Treated wastewater therefore represents an important point source for PPCPs into the environment After passing a sewage treatment plant the treated wastewater is mostly discharged into rivers and streams or sometimes used to irrigate fields If drinking water is produced using resources

containing a substantial proportion of treated wastewater e g from river water downstream of communities the water cycle is closed and indirect potable reuse occurs Human Pharmaceuticals Hormones and Fragrances provides an overview of the occurrence analytics removal and environmental risk of pharmaceuticals and personal care products in wastewater surface water and drinking water The book covers all aspects of the fate and removal of PPCPs in the whole water cycle consumption and occurrence analytical methods the legal background environmental risk assessment human and animal toxicology source control options wastewater and drinking water treatment as well as indirect reuse The book presents a summary of the results obtained during the EU project Poseidon combined with further expert knowledge on the field and is written at a level appropriate for professionals involved in management of water resource quality Professionals in the field including decision makers engineers and scientists as well as students entering the field will find this an invaluable source of information First comprehensive study on the assessment fate and removal of pharmaceuticals and personal care products in wastewater and drinking water treatment Emphasises the importance of micropollutants in the water cycle provides methods for quantifying their fate and technologies for their removal [Boating](#) ,2005-06 **Electrochemical Methods** Allen J.
