**The Power of Posture** Naudi Aguilar, 2014-08-28 The concept of Functional Patterns is a train of thought that has been building upon itself over the course of my entire lifetime I was taught at a very young age to question authority and everything around me by my highly skeptical parents My parents were extremely hard workers who were very resourceful with the little money they had They lived by the practice what you preach motto in every sense they could The apple didn't fall very far from the tree and I have embodied to the best of my ability what I was fortunate enough to be taught at a very young age The Functional Patterns method didn't start with the memorization of techniques It started at a base of reasoning that has seemingly been missing from the industry of health today When ego checking experiences of life mixed with the values I had already wired in from my childhood a different approach towards looking at the human organism emerged

**Handbook of Printed Circuit Manufacturing** Raymond H.

Clark,2012-12-06 Of all the components that go into electronic equipment the printed circuit probably requires more manufacturing operations each of which must be performed by a skilled person than any other As a shift supervisor early in my printed circuit career I had to hire and train personnel for all job functions The amount of responsibility delegated to my subordinates depended strictly on how well I had been able to train them Training people can be a trying experience and is always a time consuming one It behooved me to help my workers obtain the highest degree of job understanding and skill that they and I were capable of One hindrance to effective teaching is poor continuity of thought for example having to say to a trainee Wait a minute forget what I just told you We have to go back and do some thing else first It was in trying to avoid pitfalls such as this that I undertook a detailed examination of the processes involved what I thought each trainee had to know and what questions they would most frequently ask From this analysis I developed the various process procedures Only after I had done so was I able to train effectively and with the confidence that I was doing the best possible job Answers had to be at hand for all of their questions and in what ever detail they needed to know
