Centralization and Decentralization Sep 06 2023 Globalization has brought dramatic changes to the character and functions of education in most countries around the world. However, the impact of globalization on schools and universities is not uniform. One public-policy strategy that has been widely adopted is decentralization; but there is no consensus on whether centralization or decentralization is more effective to improve organization and management in education. This book is contextualized in the literature on globalization, and examines how policies of decentralization have affected the running of education in Hong Kong, Taiwan, Shanghai, Singapore, Macau and Mainland China. It analyzes the strategies that the governments of the selected societies have adopted in reforming the structure of education systems, mobilizing different forces to create more educational opportunities, and devising new measures to assure quality in the education sector.

Centralization and Autonomy May 10 2021

Centralization Vs Decentralization of Information Systems: An Annotated Bibliography Aug 13 2021 This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The Tower and the Cloud Jul 12 2021 "The emergence of the networked information economy is unleashing two powerful forces. On one hand, easy access to high-speed networks is empowering individuals. People can now discover and consume information resources and services globally from their homes. Further, new social computing approaches are inviting people to share in the creation and edification of information on the Internet. Empowerment of the individual -- or consumerization -- is reducing the individual's reliance on traditional brick-and-mortar institutions in favor of new and emerging virtual ones. Second, ubiquitous access to high-speed networks along with network standards, open standards and content, and techniques for virtualizing hardware, software, and services is making it possible to leverage scale economies in unprecedented ways. What appears to be emerging is industrial-scale computing -- a standardized infrastructure for delivering computing power, network bandwidth, data storage and protection, and services. Consumerization and industrialization beg the question "Is this the end of the middle?"; that is, what will be the role of "enterprise" IT in the future? Indeed, the bigger question is what will become of all of our intermediating institutions? This volume examines the impact of IT on higher education and on the IT organization in higher education." -Web site blurb.

The Tradeoff Between Centralization and Decentralization and Its Effect on the Why Europe? Question Jun 03 2023 Scientific Essay from the year 2009 in the subject Business economics - Economic and Social History, grade: 1,0, University of Connecticut, language: English, abstract: Significant and sustainable economic organizations as well as a period of its wide development first arose during the early modern period in Europe. The three main elements of economic growth, flow of technology, migration out of traditional agriculture, and external effects in cities (Lucas, 2009) are connected through organizational theory.

Public Service Performance Feb 04 2021 The performance of governments around the globe is constantly in the spotlight, whether as a celebration or indictment of their activities. Providing evidence on strategies to improve the performance of public agencies is therefore essential to the practice of public management. Originally published in 2006, this important contribution to the debate explores issues of measurement, research methodology, and management influences on performance. It focuses on three key questions: what approaches should be adopted to measure the performance of public agencies? What aspects of management influence the performance of public agencies? As the world globalizes, what are the key international issues in performance measurement and management? In examining these questions, the contributors debate both methodological and technical issues regarding the measurement of performance in public organizations, and provide empirical analyses of the determinants of performance. The book concludes with groundbreaking work on the international dimensions of these issues.

Lectures on Macroeconomic Planning: Centralization, decentralization, planning under uncertainty Apr 20 2022 Textbook comprising lectures on macro-economic planning both in planned economies and in other

economic systems - covers methodologies and theories, the use of econometrics and mathematical models in economic planning, and includes centralization and decentralization of decision making powers, economic policy formulation during times of uncertainty, etc. Diagrams and references.

Federalism And Decentralization Jun 22 2022 This book is an outcome of the round table conference held in 1984 in Switzerland. It deals with decision of decentralization, structure of decentralized units, external power of decentralized unit, financial autonomy and decentralization and the protection of the basic rights.

Smoothing Centralization Decentralization Cycles (Classic Reprint) Jul 24 2022 Excerpt from Smoothing Centralization Decentralization Cycles What is not often emphasized is that because task characteristics change through time, the contingency or fit (Morse and Lorsch) position immediately indicates that the structure of the organization or a subpart of it should also dynamically change positions along the centralization and decentralization continuum. In other words, structures should cycle between centralization and decentralization. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Global Stability through Decentralization? Jan 30 2023 The authors of this book, who represent a broad range of scientific disciplines, discuss the issue of centralized versus decentralized control and regulation in the context of sustainable development. The stability and resilience of complex technical, economic, societal and political systems are commonly assumed to be highly dependent on the effectiveness of sophisticated, mainly centralized regulation and control systems and governance structures, respectively. In nature, however, life is mainly self-regulated by widespread, mainly DNA-encoded control mechanisms. The fact that life has endured for more than 2.4 billion years suggests that, for man-made systems, decentralized control concepts are superior to centralized ones. The authors discuss benefits and drawbacks of both approaches to achieving sustainability, providing valuable information for students and professional decision makers alike.

Centralization Vs Decentralization of Information Systems Oct 27 2022

Centralization Vs Decentralization of Information Systems: Jun 10 2021 The field of Distributed Processing is eliciting a great deal of interest at the current time. The first task undertaken by the CISR research project on Distributed Processing was one of searching and culling the literature. An annotated bibliography, representing the results of this search, is presented below. Four classes of articles are surveyed, under the headings: Centralization vs. Decentralization: Issue Discussions Distributed Systems and Computer Networks Distributed Data Bases Organizational Issues Articles which we found to be of most interest (for our specific purposes) are marked by an *. 0727384 Albrecht: Organization and Management of Information Processing Leon K. Systems, McMillan, 1973...

Centralization Vs Decentralization of Information Systems Oct 15 2021 Excerpt from Centralization Vs Decentralization of Information Systems: An Annotated Bibliography Computer Options: Large Centralized Computer vs. Minicomputers Unpublished manuscript, Index Systems, Inc., 1972. A discussion of the use of minis as stand alone machines and as parts of larger systems. Provides also a comparison of large machines and minis along the dimensions of hardware, software, costs, reliability, and manufacturers support. At Last, Major Roles for Minicomputers Harvard Business Review, may-june 1975. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Decentralization and Infrastructure in the Global Economy Aug 25 2022 The subnational dimension of infrastructure has emerged as one of the greatest challenges in contemporary public finance policy and management. Ensuring the efficient provision of infrastructure represents a challenge for all countries irrespective of their level of centralization or decentralization. This book proposes an innovative approach for the strengthening of decentralized public investment and infrastructure management. Decentralization and Infrastructure in the Global Economy: From Gaps to Solutions covers the most important aspects of infrastructure investment in a decentralized setting. It discusses infrastructure gaps and the quality of subnational spending; how functional responsibilities, financing and equalization can be designed; sector-specific arrangements in high expenditure areas, such as health, education and roads; key steps of the public investment cycle and management; and analyses the political economy and corruption challenges that typically accompany decentralized infrastructure projects. This book challenges some of the well-accepted principles of intergovernmental fiscal relations and will be useful to researchers and practitioners of public finance policy and management.

The Control of Education Jul 04 2023

The Centralization-decentralization Conundrum Jan 10 2024 The Government of Canada has made efforts in recent years to achieve a greater degree of managerial deregulation and administrative decentralization. This study examines these efforts in light of the evolution of the executive-bureaucratic arena over the three decades since 1960, the theoretical issues involved in organization design and behaviour, and the practical context of administrative reform.

Centralization Vs. Decentralization in Organizing the Controller's Department Jan 18 2022

Centralized Control and Decentralized Execution Sep 13 2021 Lt Col Clint Hinote looks at recent combat operations in Afghanistan and Iraq, interested particularly with the operational intersection of air and ground forces. He discovered a continuing dialog about one of the Air Force's major tenets—centralized control, decentralized execution. He suggests that all parties, both ground and air advocates, may need to reexamine the purpose and application of this doctrinal point. All services since World War II have been interested in this issue; everyone is seeking to make air/ground operations both effective and efficient. He points out that the issue between centralization and decentralization has an enduring quality, too, one that goes beyond air/ground operations, and he employs the famous theoretician, B. H. Liddell Hart, to suggest that centralization/ decentralization is always a compromise in combat. Hinote calls on Airmen specifically to examine this issue because they need to communicate better its application in operations. Hinote's primary premise is that Airmen need to understand that there is an inherent need for balance between centralization and decentralization. He again uses Hart to underline the message that there is a service proclivity to seek service points of view which preclude balance. Hinote takes it head-on. He examines the tenet, analyzing current criticisms in Iraq and Afghanistan, and recommends a three-step course: (1) evaluate the common language; (2) create doctrine to show Airmen the necessity for flexibility; and (3) apply the doctrine for a more flexible approach to command and control arrangements—moving execution away from dogma and back to sound doctrine.

Centralization Or Decentralization? Apr 08 2021

The Starfish and the Spider Feb 28 2023 "After five years of groundbreaking research, Ori Brafman and Rod A. Beckstrom share some gripping stories. The Starfish and the Spider argues that organizations fall into two categories: traditional "spiders," which have a rigid hierarchy and top-down leadership, and revolutionary "starfish," which rely on the power of peer relationships. This book explores what happens when starfish take on spiders (such as the music industry vs. Napster, Kazaa, and the P2P services that followed). It reveals how established companies and institutions, from IBM to Intuit to the U.S. government, are also learning how to incorporate starfish principles to achieve success."--BOOK JACKET.

Centralization and Decentralization Apr 13 2024

The Case for Decentralized Federalism Mar 08 2021 The Case for Decentralized Federalism brings together an array of experts around one key idea: decentralized federalism as the best political arrangement for a diverse nation like Canada, Edited by Ruth Hubbard and Gilles Paquet, this book argues that decentralized federalism can most effectively address Canada's regional differences and cultural diversity by dividing the work of public governing among different levels of government, allowing each to address the needs and aspiration of its citizens. With contributions from Thomas J Courchene, Ian Peach, Gerard Belanger, Hugh D. Segal, Francois Rocher, Marie-Christine Gilbert, Ruth Hubbard and Gilles Paquet, this book presents various arguments for decentralized federalism that show how a variety of issues nagging Canada today---nation-building, subsidiarity, competition, innovation---might be resolved through decentralized federalism. For the case against decentralization, look for The Case for Centralized Federalism edited by Gordon DiGiacomo and Maryantonett Flumian, also published by the University of Ottawa Press.

Centralization Vs. Decentralization in Organizing the Controller's Department Sep 25 2022

Introduction to Business Nov 27 2022

Centralization Or Decentralization? A Case Study of the Military Sealift Command's Special Mission Program Nov 15 2021 This thesis asks the question: Should the Military Sealift Command's (MSC's) Special Mission Program be decentralized or kept centralized? The special mission ships support a combination of service unique non-transportation and non-fleet ship missions for a variety of sponsors. This thesis seeks to determine why the centralization/decentralization question is being asked by both MSC and the ships' sponsors. The thesis also examines whether the economies of scale and scope justify MSC maintaining the Special Mission Program; or if not; the ships would operate more efficiently and effectively under the cognizance of their sponsors. The analysis incorporates the current re-engineering changes being made within MSC. The findings suggest that the economies of scale and scope achieved from centralizing the special mission ships, with some additional modifications, are greater than the benefits which would be derived from decentralizing the ships' operations.

Centralization & Decentralization Aug 05 2023

Centralization and Power in Social Service Delivery Systems May 22 2022 In the United States and other western nations, debates rage over whether welfare, medical care, educational programs, and many other aspects of public policy should be the responsibility of central government, local government, or the private sector. In most nations, the issues of regional autonomy and decentralization are constantly in the news, with intensity varying from mild debate to open warfare. Less visibly, battles are continuously fought in the political arena over what groups should have the right to make decisions concerning the allocation of society's resources. In response to these concerns, social scientists have focused considerable attention on the causes and consequences of centralization and decentralization in political, economic, and social organizations. Their analyses of centralization have been varied, ranging from systems that are quite small (e. g. , the family, the firm, and the community) to those systems that are very large (e. g. , the welfare state). While centralization is a concept of major concern in most of the social science disciplines, each discipline has tended to focus on centralization with a different set of interests. Economists have been very much concerned with the causes and the consequences of the concentration of economic resources. Political scientists have long sought to understand the origins and consequences of dictatorship and democracy. Sociologists have focused on inequalities in the distribution of power.
