Now known as the transmission model, this form of communication is still the foundation for academic courses in communication theory and practice, and is embedded in most business literature and education that address subjects related to workplace communication,

organization behavior and culture, leadership, and conflict resolution. But what if this accepted model of communication was incomplete? Re-Making Communication at Work argues that the transmission model of communication needs to be replaced by a new approach to communication. Sostrin challenges the status quo by exposing the most common myths that inaccurately define successful communication at work. These misperceptions are replaced by a set of core principles that deliver a clear mandate for re-making communication at work. Sostrin not only provides the theoretical foundation for this

new approach, but he uses a straightforward model and exercises that demonstrate how managers, students, and consultants can powerfully improve relationships, decision-making, and collaboration with a few lines and circles. A fresh, engaging pocket guide to trails in the City by the Bay Using recent scholarship in ethnography and popular culture, Miller throws light on both what these series present and what is missing, how various long-standing issues are raised and framed differently over time, and what new issues appear. She looks at narrative arc, characterization, dialogue, and theme as well as how inflections of familiar

genres like family adventure, soap opera, situation comedy, and legal drama shape both the series and viewers' expectations. Miller discusses *Radisson*, *Forest Rangers* and other children's series in the 1960s and early 1970s, as well as *Beachcombers*, *Spirit Bay*, *The Rez*, and *North of 60* - series whose complex characters created rewarding relationships while dealing with issues ranging from addiction to unemployment to the aftermath of the residential school system. In the tradition of Charles Sopkin's classic book on the state of television in the 1960s, "Seven Glorious Days, Seven Fun-Filled Nights, Jack Lechner recounts what it was like to lock himself in his apartment for a week and plug in to the new multichannel universe, watching twelve TVs for sixteen hours a day. The obvious question is: Why? In the thirty-three years since Sopkin's famous experiment, the quaint world of three networks and a handful of

independent stations has morphed into a surfable, endless wave of infomercials and infotainment, A&E and MTV, occasional brilliance like *The Simpsons* and *The Sopranos*, and a vaster-than-ever wasteland of Jerry Springer, wrestling, soap operas, and other mind-numbing fodder. The world and television have changed a lot since 1967, and a week of television immersion at the turn of the century proves to be equally revealing about the state of American popular culture now. With his pet pug Cosmo's unflinching emotional support, his wife Sam's more tenuous forbearance, and advice from "experts" who drop

by (a five-year-old for the scoop on Pokemon, for instance), Jack Lechner plops himself down in his New York apartment and, in brave human guinea pig tradition, lets everything from Meet the Press to Xena: Warrior Princess, from beach volleyball to Bob Dole's erectile dysfunction, have its way with his impressionable psyche. As the week progresses, he explores the limits of the media universe -- watching all three network news shows simultaneously, diving into the bizarre waters of public access programming, and even conducting a playoff between the Disney Channel and the Playboy Channel. His observations are perceptive,

surprising, and dead-on. By week's end, Lechner emerges bloody but unbowed, thankful he survived. "I was like the proverbial guy who banged himself over the head repeatedly with a hammer because it felt so good when he stopped. Watching a week of television isn't a mental health regimen I'd recommend to everyone, but it worked for me." This book is his lab report -- hilarious and a little bit scary, a trenchant comment on our media-soaked society. Who would have thought that the Prince of Darkness would become one of the most popular TV dads in history? Now, the same unbounded energy of "The Osbournes" is

captured in this companion book, revealing the hilarious, shocking, heartwarming, and always entertaining moments of America's unlikeliest TV celebrities. Full-color photos throughout. moving to Night Vale! –Ransom Riggs, #1 New York Times Bestselling Author of Miss Peregrine’s Home for Peculiar Children. From the authors of the New York Times bestselling novel Welcome to Night Vale and the creators of the #1 international podcast of the same name, comes a mystery exploring the intersections of faith and science, the growing relationship between two young people who want desperately to trust each other, and the terrifying, toothy power of the Smiling God. Nilanjana Sikdar is an outsider to the town of Night Vale. Working for Carlos, the town’s top scientist, she relies on fact and logic as her guiding

principles. But all of that is put into question when Carlos gives her a special assignment investigating a mysterious rumbling in the desert wasteland outside of town. This investigation leads her to the Joyous Congregation of the Smiling God, and to Darryl, one of its most committed members. Caught between her beliefs in the ultimate power of science and her growing attraction to Darryl, she begins to suspect the Congregation is planning a ritual that could threaten the lives of everyone in town. Nilanjana and Darryl must search for common ground between their very different world views as they are faced with the

Congregation's darkest and most terrible secret. The Living Systems Theory of Vocational Behavior and Development (LSVD) explains and illustrates the processes by which individuals construct their work experiences, vocational pathways and career patterns through episodes of interaction with affordances they recognize within their contexts, and how counseling can facilitate those processes. The LSVD was created by combining the scientifically based systems theory that explicates the dynamics of all aspects of human functioning and development, called Humans as Self-Constructing Living Systems, with important

ideas about vocational behavior and development. The resulting integrative theory represents the individual person as a dynamic, self-directing and self-constructing entity, i.e., a living system. Behavior Episodes (BEs) are the fundamental, person-in-context, dynamic units of analysis that serve as the "building blocks" by which individuals construct and retain their experiences in patterns that can be reactivated to facilitate future BEs. The book describes how individuals' history of satisfying BEs and their current activities provide the means by which vocational and career counselors can assist them to create satisfying vocational

pathways. It also describes for researchers how new, non-linear, person-centered, quantitative and qualitative research methods can be used to analyze BE patterns to advance understanding of person-level processes that play key roles in individuals' vocational behavior and development. The LSVD was designed to be not just an integrative framework for the field of career development, but also to reconnect the field to related areas such as human resources and industrial-organizational psychology and to the range of human sciences that have already embraced a living systems theoretical model. Although the global

economy is emerging from the collapse triggered by COVID-19, the recovery is likely to be subdued, and global GDP is projected to remain well below its pre-pandemic trend for a prolonged period. Several risks cloud the outlook, including those related to the pandemic and to rapidly rising debt. The pandemic has further diminished already-weak growth prospects for the next decade. Decisive policy actions will be critical in raising the likelihood of better growth outcomes while warding off worse ones. Immediate priorities include supporting vulnerable groups and ensuring a prompt and widespread vaccination process to bring

the pandemic under control. Although macroeconomic policy support will continue to be important, limited fiscal policy space amid high debt highlights the need for an ambitious reform agenda that bolsters growth prospects. To address many of these challenges, global cooperation will be key. Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). The January edition includes in-depth analyses of topical policy challenges faced

by these economies, while the June edition contains shorter analytical pieces. to examine them, and to understand and assess their problems."--From Introduction. Star Trek: The Next Generation blended speculative science fiction and space opera in its portrayal of communication. This volume charts the evolution of Pemberley Digital's transmedia adaptations of nineteenth-century novels in order to interrogate the uneasy relationship between transmedia storytelling and consumer culture. It first examines two Austen-centered films, *Lost in Austen* and *Austenland*, that present "immersive" Austen experiences that anticipate Pemberley Digital's transmedia adaptations, bridging traditional film adaptations and transmedia's participatory culture. Subsequent chapters turn to Pemberley Digital's transmedia adaptations of

Austen's and Shelley's novels to argue that, although such adaptations may appear feminist in their emphasis on female protagonists, their larger narratives expose a subtext of anxiety about unstable gender roles, financial vulnerability, and the undervaluation of career-specific skill sets, both for the characters and the production company itself. The study provides a robust theoretical framework within which to read transmedia adaptations of "classic literature," illuminating both the potential of, and the challenges facing, digital and transmedia storytellers and participants.
