of influencing the thoughts and actions of others He argues that existing anthropological and aesthetic theories take an overwhelmingly passive point of view and questions the criteria that accord art status only to a certain class of objects and not to others The anthropology of art is here reformulated as the anthropology of a category of action Gell shows how art objects embody complex intentionalities and mediate social agency He explores the psychology of patterns and perceptions art and personhood the control of knowledge and the interpretation of meaning drawing upon a diversity of artistic traditions European Indian Polynesian Melanesian and Australian Art and Agency was completed just before Alfred Gell's death at the age of 51 in January 1997 It embodies the intellectual bravura lively wit vigour and erudition for which he was admired and will stand as an enduring testament to one of the most gifted anthropologists of his generation Island of the Blue Dolphins Scott O'Dell, 1960 Far off the coast of California looms a harsh rock known as the island of San Nicholas Dolphins flash in the blue waters around it sea otter play in the vast kelp beds and sea elephants loll on the stony beaches Here in the early 1800s according to history an Indian girl spent eighteen years alone and this beautifully written novel is her story It is a romantic adventure filled with drama and heartache for not only was mere subsistence on so desolate a spot a near miracle but Karana had to contend with the ferocious pack of wild dogs that had killed her younger brother constantly guard against the Aleutian sea otter hunters and maintain a precarious food supply More than this it is an adventure of the spirit that will haunt the reader long after the book has been put down Karana's quiet courage her Indian self reliance and acceptance of fate transform what to many would have been a devastating ordeal into an uplifting experience From loneliness and terror come strength and serenity in this Newbery Medal winning classic *Linguistic Linked Data* Philipp Cimiano, Christian Chiarcos, John P. McCrae, Jorge Gracia, 2020-01-13 This is the first monograph on the emerging area of linguistic linked data Presenting a combination of background information on linguistic linked data and concrete implementation advice it introduces and discusses the main benefits of applying linked data LD principles to the representation and publication of linguistic resources arguing that LD does not look at a single resource in isolation but seeks to create a large network of resources that can be used together and uniformly and so making more of the single resource The book describes how the LD principles can be applied to modelling language resources The first part provides the foundation for understanding the remainder of the book introducing the data models ontology and query languages used as the basis of the Semantic Web and LD and offering a more detailed overview of the Linguistic Linked Data Cloud The second part of the book focuses on modelling language resources using LD principles describing how to model lexical resources using Ontolex lemon the lexicon model for ontologies and how to annotate and address elements of text represented in RDF It also demonstrates how to model annotations and how to capture the metadata of language resources Further it includes a chapter on representing linguistic categories In the third part of the book the authors describe how language resources can be transformed into LD and how links can be inferred and added to the data to increase connectivity and linking between different datasets They also

discuss using LD resources for natural language processing The last part describes concrete applications of the technologies representing and linking multilingual wordnets applications in digital humanities and the discovery of language resources Given its scope the book is relevant for researchers and graduate students interested in topics at the crossroads of natural language processing computational linguistics and the Semantic Web linked data It appeals to Semantic Web experts who are not proficient in applying the Semantic Web and LD principles to linguistic data as well as to computational linguists who are used to working with lexical and linguistic resources wanting to learn about a new paradigm for modelling publishing and exploiting linguistic resources [A Beginner's Guide to Mathematical Logic](#) Raymond M.
