The Meaning of De/Centralization Enrico Rossi, Carsten Sørensen, 2022 Open source software communities platform ecosystems and blockchains exemplify some novel organizational forms made possible through recent technological innovations and garnering academic interest in understanding the concept of decentralization Although digitalization is often associated with the potential to establish decentralized systems recent developments have highlighted the ambiguous and complicated relationship between decentralization and centralization Yet a comprehensive treatment of the concept in the management and organizational literature is still missing We review how centralization and decentralization de centralization are understood across academic discourses i e the architectural logical hierarchical market moral political and legal perspectives We argue that the academic literature only offers disciplinary bound partial inconsistent and contradicting de centralization perspectives within these seven categories of literature This paper contributes to the de centralization debate by outlining the fundamental limitations and paradoxes that emerge from mono disciplinary and mono dimensional treatments of the concept and by identifying four main aspects characterizing any treatment of the de centralization concept Based on that the paper proposes four main steps to unpack the complexity of specific de centralization arrangements and conceptually reframes them along two dimensions in terms of absolute and relative approaches which in turn can be mono or multidimensional

Global Stability through Decentralization? Peter A. Wilderer, Martin Grambow, 2015-12-11 The authors of this book who represent a broad range of scientific disciplines discuss the issue of centralized versus decentralized control and regulation in the context of sustainable development The stability and resilience of complex technical economic societal and political systems are commonly assumed to be highly dependent on the effectiveness of sophisticated mainly centralized regulation and control systems and governance structures respectively In nature however life is mainly self regulated by widespread mainly DNA encoded control mechanisms The fact that life has endured for more than 2 4 billion years suggests that for man made systems decentralized control concepts are superior to centralized ones The authors discuss benefits and drawbacks of both approaches to achieving sustainability providing valuable information for students and professional decision makers alike
