**The Art of Being Human** Michael Wesch, 2018-08-07 Anthropology is the study of all humans in all times in all places But it is so much more than that Anthropology requires strength valor and courage Nancy Scheper Hughes noted Pierre Bourdieu called anthropology a combat sport an extreme sport as well as a tough and rigorous discipline It teaches students not to be afraid of getting one's hands dirty to get down in the dirt and to commit yourself body and mind Susan Sontag called anthropology a heroic profession What is the payoff for this heroic journey You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten Real anthropology cannot be contained in a book You have to go out and feel the world's jagged edges wipe its dust from your brow and at times leave your blood in its soil In this unique book Dr Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human This special first draft edition is a loose framework for more and more complete future chapters and writings It serves as a companion to anth101.com a free and open resource for instructors of cultural anthropology This 2018 text is a revision of the first draft edition from 2017 and includes 7 new chapters

**What It Means to Be Human** O. Carter Snead, 2020 American law assumes that individuals are autonomous defined by their capacity to choose and not obligated to each other But our bodies make us vulnerable and dependent and the law leaves the weakest on their own O Carter Snead argues for a paradigm that recognizes embodiment enabling law and policy to provide for the care that people need

**An Anthropology of Biomedicine** Margaret M. Lock, Vinh-Kim Nguyen, 2011-09-09 An Anthropology of Biomedicine is an exciting new introduction to biomedicine and its global implications Focusing on the ways in which the application of biomedical technologies bring about radical changes to societies at large cultural anthropologist Margaret Lock and her co author physician and medical anthropologist Vinh Kim Nguyen develop and integrate the thesis that the human body in health and illness is the elusive product of nature and culture that refuses to be pinned down Introduces biomedicine from an anthropological perspective exploring the entanglement of material bodies with history environment culture and politics Develops and integrates an original theory that the human body in health and illness is not an ontological given but a moveable malleable entity Makes extensive use of historical and contemporary ethnographic materials around the globe to illustrate the importance of this methodological approach Integrates key new research data with more classical material covering the management of epidemics famines fertility and birth by military doctors from colonial times on Uses numerous case studies to illustrate concepts such as the global commodification of human bodies and body parts modern forms of population and the extension of biomedical technologies into domestic and intimate domains Winner of the 2010 Prose Award for Archaeology and Anthropology

**ReSourcing Theological Anthropology** Marc Cortez, 2018-01-09 Theologians working in theological anthropology often claim that Jesus reveals what it means to be truly human but this often has little impact in their actual account of anthropology ReSourcing Theological Anthropology addresses that lack by offering an account of why theological anthropology must begin with Christology Building off his earlier study on how key theologians in church history have understood the relationship between Christology and theological anthropology Cortez now develops a new proposal for theological anthropology and applies it to the theological situation today ReSourcing Theological Anthropology is divided into four sections The first section explores the relevant Christological anthropological biblical passages and unpacks how they inform our understanding of theological anthropology The second section discusses the theological issues raised in the course of surveying the biblical texts The third section lays out a methodological framework for how to construct a uniquely Christological anthropology The final section builds on the first three sections and demonstrates the significance of Christology for understanding theological anthropology by applying the methodological framework to several pressing anthropological issues gender and sexuality race and ethnicity and death and suffering X

*On Being Human* Ray S. Anderson, 2010-10-01 What does it mean to be human How does a right understanding of personhood affect decisions on critical life situations What implications does a biblical perspective on personhood have for the pastoral ministry of healing and hope In answering these questions Ray S Anderson focused on the person as determined by and sustained by the creative power of God He explored the implications of a biblical understanding of personhood for such critical issues as human sexuality family relationships abortion and death He broke new ground in relating pastoral care and counseling to contemporary issues which challenge Christians and their understanding of the meaning of human life

*The Long Way Home* Paul Turnbull, Michael Pickering, 2010-11-01 Indigenous peoples have long sought the return of ancestral human remains and associated artifacts from western museums and scientific institutions. Since the late 1970s their efforts have led museum curators and researchers to re-evaluate their practices and policies in respect to the scientific uses of human remains. New partnerships have been established between cultural and scientific institutions and indigenous communities. Human remains and culturally significant objects have been returned to the care of indigenous communities although the fate of bones and burial artifacts in numerous collections remains unresolved and in some instances the subject of controversy. In this book leading researchers from a wide range of disciplines in the humanities and social sciences reflect critically on the historical, cultural, ethical, and scientific dimensions of repatriation. Through various case studies they consider the impact of repatriation: what have been the benefits and in what ways has repatriation given rise to new problems for indigenous people, scientists, and museum personnel? It features chapters by indigenous knowledge custodians who reflect upon recent debates and interaction between indigenous people and researchers in disciplines with direct interests in the continued scientific preservation of human remains. *What Does it Mean to be Human?* Richard Potts, Christopher Sloan, 2010 This generously illustrated book tells the story of the human family showing how our species' physical traits and behaviors evolved over millions of years as our ancestors adapted to dramatic environmental changes. In *What Does It Mean to Be Human*, Rick Potts, director of the Smithsonian's Human Origins Program, and Chris Sloan, National Geographic's paleoanthropology expert, delve into our distant past to explain when, why, and how we acquired the unique biological and cultural qualities that govern our most fundamental connections and interactions with other people and with the natural world. Drawing on the latest research, they conclude that we are the last survivors of a once diverse family tree and that our evolution was shaped by one of the most unstable eras in Earth's environmental history. The book presents a wealth of attractive new material, especially developed for the Hall's displays, from life-like reconstructions of our ancestors sculpted by the acclaimed John Gurche to photographs from National Geographic and Smithsonian archives, along with informative graphics and illustrations. In coordination with the exhibit opening, the PBS program NOVA will present a related three-part television series, and the museum will launch a website expected to draw 40 million visitors.

*The Human Being* Hans Schwarz, 2013-12-20 This overview of Christian anthropology by Hans Schwarz uniquely emphasizes three things: 1) the biblical testimony, 2) the historical unfolding of Christian anthropology through the centuries, and 3) the present affirmation of Christian anthropology in view of rival options and current scientific evidence. Schwarz begins by elucidating the special place occupied by human beings in the world, then ponders the complex issue of human freedom and concludes by investigating humanity as a community of men and women in this world and in the world beyond. While maintaining a strong biblical orientation, Schwarz draws on a wide range of resources, including philosophy and the natural sciences, in order to map out what it means to be human. Schwarz's *Human Being* will interest anyone who is concerned with how, in the face of fascinating scientific insights, we can intelligently talk today about human sinfulness, human freedom, and human beings as children of the God who created us.

*The Meaning of Human Existence* Edward O. Wilson, 2014-10-06 National Book Award Finalist How did humanity originate and why does a species like ours exist on this planet Do we have a special place even a destiny in the universe Where are we going and perhaps the most difficult question of all Why In *The Meaning of Human Existence* his most philosophical work to date Pulitzer Prize winning biologist Edward O Wilson grapples with these and other existential questions examining what makes human beings supremely different from all other species Searching for meaning in what Nietzsche once called the rainbow colors around the outer edges of knowledge and imagination Wilson takes his readers on a journey in the process bridging science and philosophy to create a twenty first century treatise on human existence from our earliest inception to a provocative look at what the future of mankind portends Continuing his groundbreaking examination of our Anthropocene Epoch which he began with *The Social Conquest of Earth* described by the New York Times as a sweeping account of the human rise to domination of the biosphere here Wilson posits that we as a species now know enough about the universe and ourselves that we can begin to approach questions about our place in the cosmos and the meaning of intelligent life in a systematic indeed in a testable way Once criticized for a purely mechanistic view of human life and an overreliance on genetic predetermination Wilson presents in *The Meaning of Human Existence* his most expansive and advanced theories on the sovereignty of human life recognizing that even though the human and the spider evolved similarly the poet's sonnet is wholly different from the spider's web Whether attempting to explicate *The Riddle of the Human Species* Free Will or Religion warning of *The Collapse of Biodiversity* or even creating a plausible Portrait of E T Wilson does indeed believe that humanity holds a special position in the known universe The human epoch that began in biological evolution and passed into pre then recorded history is now more than ever before in our hands Yet alarmed that we are about to abandon natural selection by redesigning biology and human nature as we wish them Wilson soberly concludes that advances in science and technology bring us our greatest moral dilemma since God stayed the hand of Abraham

**The Anthropocene Reviewed** John Green, 2021-05-18 Goodreads Choice winner for Nonfiction 2021 and instant 1 bestseller A deeply moving collection of personal essays from John Green the author of *The Fault in Our Stars* and *Turtles All the Way Down* The perfect book for right now People *The Anthropocene Reviewed* is essential to the human conversation Library Journal starred review *The Anthropocene* is the current geologic age in which humans have profoundly reshaped the planet and its biodiversity In this remarkable symphony of essays adapted and expanded from his groundbreaking podcast bestselling author John Green reviews different facets of the human centered planet on a five star scale from the QWERTY keyboard and sunsets to Canada geese and Penguins of Madagascar Funny complex and rich with detail the reviews chart the contradictions of contemporary humanity As a species we are both far too powerful and not nearly powerful enough a paradox that came into sharp focus as we faced a global pandemic that both separated us and bound us together John Green's gift for storytelling shines throughout this masterful collection *The Anthropocene Reviewed* is an open hearted exploration of the paths we forge and an unironic celebration of falling in love with the world

**Human Dimension and Interior Space** Julius Panero, Martin Zelnik, 2014-01-21 The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit or interface between the human body and the various components of interior space. *Human Dimension and Interior Space* is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment, should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who in fact does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland (formerly of the Harvard School of Public Health) and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With *Human Dimension and Interior Space*, these standards are now accessible to all designers of interior environments.

Introduction to Sociology 2e Nathan J. Keirns, Heather Griffiths, Eric Strayer, Susan Cody-Rydzewski, Gail Scaramuzzo, Sally Vyain, Tommy Sadler, Jeff D. Bry, Faye Jones, 2015-03-17 This text is intended for a one-semester introductory course. Page 1

Aristotle's Anthropology Geert Keil, Nora Kreft, 2019-05-30 The first collection of essays on Aristotle's philosophy of human nature covering the metaphysical, biological, and ethical works.

Reimagining Global Health Paul Farmer, Arthur Kleinman, Jim Kim, Matthew Basilio, 2013-09-07 Bringing together the experience, perspective, and expertise of Paul Farmer, Jim Yong Kim, and Arthur Kleinman, *Reimagining Global Health* provides an original, compelling introduction to the field of global health. Drawn from a Harvard course developed by their student Matthew Basilio, this work provides an accessible and engaging framework for the study of global health. Insisting on an approach that is historically deep and geographically broad, the authors underline the importance of a transdisciplinary approach and offer a highly readable distillation of several historical and ethnographic perspectives of contemporary global health problems. The case studies presented throughout *Reimagining Global Health* bring together ethnographic, theoretical, and historical perspectives into a wholly new and exciting investigation of global health. The interdisciplinary approach outlined in this text should prove useful not only in schools of public health, nursing, and medicine but also in undergraduate and graduate classes in anthropology, sociology, political economy, and history among others.
