The truck's role in American society changed dramatically from the 1960s through the 1980s, with the rise of off-roaders, the van craze of the 1970s and minivan revolution of the 1980s, the popularization of the SUV as family car and the diversification of the pickup truck into multiple forms and sizes. This comprehensive reference book follows the form of the author's popular volumes on American cars. For each year, it provides an industry overview and, for

each manufacturer, an update on new models and other news, followed by a wealth of data: available powertrains, popular options, paint colors and more. Finally, each truck is detailed fully with specifications and measurements, prices, production figures, standard equipment and more. Covers all U.S. and Canadian models of Ford Explorer and Mercury Mountaineer. In recent years, researchers and practitioners have explored the nature, theory, and best practices that are required for effective and ethical crisis preparation and response. The consequences of being unprepared to respond quickly, appropriately, and ethically to a crisis are dramatic and well documented. For this reason, crisis consulting and the development of crisis response plans and protocols have become more than a cottage industry. Taking a rhetorical view of crisis events and utterances, this book is devoted to adding new insights to the discussion, and to describing a rhetorical approach to crisis communication. To help set the tone for that description, the opening chapter reviews a rhetorical perspective on organizational crisis. As such it raises questions and provokes issues more than it addresses and answers them definitively. The other chapters can be viewed as a series of experts participating in a panel discussion. The challenge to

each of the authors is to add depth and breadth of understanding to the analysis of the rhetorical implications of a crisis, as well as to the strategies that can be used ethically and responsibly. Central to this analysis is the theoretic perspective that crisis response requires rhetorically tailored statements that satisfactorily address the narratives surrounding the crisis which are used by interested parties to define and judge it. This volume will be of value to scholars and students interested in crisis communication, and is certain to influence future work and research on responding to crises. Describes basic maintenance as well as repair procedures.
