African Markets and the Utu-Ubuntu Business Model. A perspective on economic informality in Nairobi Njeri Kinyanjui, 2019-03-06 The persistence of indigenous African markets in the context of a hostile or neglectful business and policy environment makes them worthy of analysis An investigation of Afrocentric business ethics is long overdue Attempting to understand the actions and efforts of informal traders and artisans from their own points of view and analysing how they organise and get by allows for viable approaches to be identified to integrate them into global urban models and cultures Using the utu ubuntu model to understand the activities of traders and artisans in Nairobi's markets this book explores how despite being consistently excluded and disadvantaged they shape urban spaces in and around the city and contribute to its development as a whole With immense resilience and without discarding their own socio cultural or economic values informal traders and artisans have created a territorial complex that can be described as the African metropolis African Markets and the Utu buntu Business Model sheds light on the ethics and values that underpin the work of traders and artisans in Nairobi as well as their resilience and positive impact on urbanisation This book makes an important contribution to the discourse on urban economics and planning in African cities

World Development Report 2020 World Bank, 2019-11-19 Global value chains GVCs powered the surge of international trade after 1990 and now account for almost half of all trade This shift enabled an unprecedented economic convergence poor countries grew rapidly and began to catch up with richer countries Since the 2008 global financial crisis however the growth of trade has been sluggish and the expansion of GVCs has stalled Meanwhile serious threats have emerged to the model of trade led growth New technologies could draw production closer to the consumer and reduce the demand for labor And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs World Development Report 2020 Trading for Development in the Age of Global Value Chains examines whether there is still a path to development through GVCs and trade It concludes that technological change is at this stage more a boon than a curse GVCs can continue to boost growth create better jobs and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation industrial countries pursue open predictable policies and all countries revive multilateral cooperation

Indicators of Environmental Quality William A. Thomas, 2013-03-09 Researchers and agencies collect reams of objective data and authors publish volumes of subjective prose in attempts to explain what is meant by environmental quality Still we have no universally recognized methods for combining our quantitative measures with our qualitative concepts of environment Not all of our environmental goals should be reduced to mere numbers but many of them can be and without these quantitative terms we have no way of defining our present position nor of selecting positions we wish to attain on any logically established scale of environmental values Stated simply in our zeal to measure our environment we often forget that masses of numbers describing a system are insufficient to understand it or to be used in selecting goals and priorities for expending our economic and human resources Attempts at quantitatively describing environmental quality rather than merely measuring different environmental variables are relatively recent This condensing of data into the optimum number of terms with maximum information content is a truly interdisciplinary challenge When Oak Ridge National Laboratory initiated its Environmental Program in early 1970 under a grant from the National Science Foundation the usefulness of environmental indicators in assessing the effects of technology was included as one of the initial areas for investigation James L Liverman through his encouragement and firm belief that these indicators are indispensable if we are to resolve our complex environmental problems deserves much of the credit for the publication of this book
