

Laboratory Activity

PULLEYS

PROBLEM: How can pulleys be arranged to make work easier?

MATERIALS: 2 single pulleys, 60 cm of string, ring stand setup, spring scale, weight.

PROCEDURE:

1. Tie a small loop that won't slip in each end of the string.
2. Find the weight of the object.
3. **NOTE:** This weight is the resistance force you will be using the meter stick. Check if you understand.
4. Record this force in Data Table 1 in all the spaces for F_R .
5. Set up the pulley as shown in Diagram 1.
6. Find the effort force necessary to lift the resistance. Record it in Data Table 1.
7. Remove the spring scale and hold the string with your fingers.
8. Position the meter stick as shown in Diagram 2, with the zero mark at the bottom.
9. Observe the distance the object moves up when you pull down 20 cm. Record these values in Data Table 1.
