Improve your perception and use of colour in oil paint and gain many practical insights

into techniques, set up and more in this fantastic book from the artist John Collier. Broken down into sections on the Practical and Theory of painting Collier is particularly useful for those looking to paint (or study) in his own Pre-Raphaelite style, although any student of oil painting would do well to study his techniques. The section on Theory discusses colour in a way very different to modern teachers, so while it may be difficult to understand for some others may find that it suits their mind and opens up new concepts. Collier was particularly well known for his use of colour, portraits and history painting, and his skills in these areas

shine through in the advice he gives in *A Manual of Oil Painting*. This makes this little book a must read for those interested in the art of his period from both practical and academic perspectives. Provides guidance on the use of art materials such as pigments, solvents, oil paints, pastels, and varnishes. Much more than just another guide to artists' materials, *The Painter's Handbook* is an amazingly useful resource, with information on everything from the canvas up: the canvas itself, plus paper, sizes and grounds, pigments and binders, solvents and thinners, varnishes and preservatives. Dozens of step-by-step recipes for make-it-yourself paints, pastels, varnishes, gessoes, sizes, supports, and equipment take this indispensable guide way beyond the competition. Authoritatively written by Mark David Gottsegen, chair of the

federal government's ASTM committee on artist's materials, the revised Painter's Handbook considers the enormous changes in the art-materials world since the first edition was published in 1993. New materials, new health issues, new information on outmoded and even harmful supplies and practices mean that every painter needs a copy of The Painter's Handbook. Excerpt from A Practical Manual of House-Painting, Graining, Marbling and Sign-Writing: Containing Full Information on the Processes of House-Painting in Oil and Distemper, the Formation of Letters and Practice of Sign-Writing, the Principles of Decorative Art, a

Course of Elementary Drawing for House-Painters, Writers, Etc The essentially practical character of this manual would almost seem to render a preface unnecessary; these introductory lines are therefore penned more in accordance with custom, than for the purpose of supplying a want. The trade of a House Painter is too often supposed to consist of manual processes only, and it is thought by many, that a young man has only to follow others in order to become a competent workman.
