In 1963, the first edition of Legal and Regulatory Environment of Business, authored by Bob Corley, started a new course emphasizing the legal environment in which business is conducted. By focusing on the public nature of how government regulates business activities, rather than simply how businesses privately make transactions, a movement away from traditional Business Law began. Through its previous 14 editions, The Legal and Regulatory Environment of Business has been the leader in setting the standard for materials covered in an introduction to the legal and regulatory environment of business. "The goal of the 16th edition of Marketing is to create an exceptional experience for to day's students and instructors of marketing. The development of Marketing was based on a rigorous process of assessment, and the

outcome of the process is a text and package of learning tools that are based on engagement, leadership, and innovation in marketing education"-- Business and Society: Stakeholder Relations, Ethics and Public Policy by Lawrence/Weber/Post, has continued through several successive author teams to be the market-leader in its field. For over thirty years, Business and Society has been updated and reinvented in response to society's relationship to business. Business and Society, 11e highlights why government regulation is sometimes required as well as new models of business-community collaboration. Business and Society, 11e is a book with a point of view. Lawrence, Weber and Post believe that businesses have social (as well as economic) responsibilities to society; that business and government both have important roles to play in the modern economy; and that ethics and integrity are essential to personal fulfillment and to business success. The book is designed to be easily modularized; an instructor who wishes to focus on a particular portion of the material may select individual chapters or cases to be packaged in a Primis custom product.

Brad Schiller's text, *The Macro Economy Today*, 12e, is noted for three great strengths: readability, policy orientation, and pedagogy. Schiller emphasizes how policymakers must choose between government intervention and market reliance to resolve the core issues of what, how, and for whom to produce. This strategic choice is highlighted

throughout the full range of micro, macro, and international issues, and every chapter ends with a policy issue that emphasizes the markets vs. government dilemma. Schiller teaches economics in a relevant context, filling his chapters with the real facts and applications of economic life. Schiller is also the only principles text that presents all macro theory in the single consistent context of the AS/AD framework. This new edition provides students content and scope of the subfields of geography, emphasizes its unifying themes, and provides the foundation for further work in their areas of interest. "The Economy Today is exceptionally well suited for this task. From its inception, this text has been motivated by policy issues. The primary goal has been to help students understand the challenges of economic policy and the consequences of specific actions like tariffs, regulation, and tax reform. It has always provided a balanced discussion of these issues, allowing students to assess different perspectives on critical issues. For this edition, instructors will particularly appreciate

the unique chapters that provide a solid foundation for explaining, illustrating, and assessing major Trump initiatives. Chapter 16, for example, is devoted to supply-side theory, a core foundation of Trumponomics. Students can explore the theoretical basis for tax cuts, deregulation, and immigration reform. Chapter 35 on international trade goes beyond the theory of comparative advantage to explain why and how some market participants seek to erect trade barriers. The unique chapter devoted to deregulation (Chapter 27) examines the rationale for government regulation of industry, the inherent trade-offs, and the consequences of (de)regulation. The same kind of insistence on critical thinking about policy issues is apparent in Chapter 28 on environmental protection"--
