Multiple Imputation in Practice Nov 17 2022 Multiple Imputation in Practice: With Examples Using IVEware provides practical guidance on multiple imputation analysis, from simple to complex problems using real and simulated data sets. Data sets from cross-sectional, retrospective, prospective and longitudinal studies, randomized clinical trials, complex sample surveys are used to illustrate both simple, and complex analyses. Version 0.3 of IVEware, the software developed by the University of Michigan, is used to illustrate analyses. IVEware can multiply impute missing values, analyze multiply imputed data sets, incorporate complex sample design features, and be used for other statistical analyses framed as missing data problems. IVEware can be used under Windows, Linux, and Mac, and with software packages like SAS, SPSS, Stata, and R, or as a stand-alone tool. This book will be helpful to researchers looking for guidance on the use of multiple imputation to address missing data problems, along with examples of correct analysis techniques.

School Libraries 3.0 May 24 2023 This textbook, for school library administration courses, is written by a professor who has taught this course at least once a year for the past twenty years. Technology is interwoven throughout the book and not listed as a separate chapter or book section. This is because the school librarian of today—and certainly the school librarian of tomorrow—is working in an environment of web resources, multimedia, mixed methods, and varying programs and services. Major chapters cover the various roles of the school librarian, curricular standards and guidelines, policies and procedures, budgeting, facilities, personnel, services, programming, ethics, advocacy, and evaluation. Sample policies, procedures, and plans make this book valuable to both new and experienced school librarians.

World History: The Modern Era Sep 27 2023

Women's Lives around the World [4 volumes] Feb 18 2023 Providing an in-depth look at the lives of women and girls in approximately 150 countries, this multivolume reference set offers readers transnational and postcolonial analysis of the many issues that are critical to the success of women and girls. For millennia, women around the world have shouldered the responsibility of caring for their families. But in recent decades, women have emerged as a major part of the global workforce, balancing careers and family life. How did this change happen? And how are societies in developing countries responding and adapting to women's newer roles in society? This four-volume encyclopedia examines the lives of women around the world, with coverage that includes the education of girls and teens; the key roles women play in their families, careers, religions, and cultures; how issues for women intersect with colonialism, transnationalism, feminism, and established norms of power and control. Organized geographically, each volume presents detailed entries about the lives of women in particular countries. Additionally, each volume offers sidebars that spotlight topics related to women and girls in specific regions or focus on individual women's lives and contributions. Primary source documents include sections of countries' constitutions that are relevant to women and girls, United Nations resolutions and national resolutions regarding women and girls, and religious statements and proclamations about women and girls. The organization of the set enables readers to take an in-depth look at individual countries as well as to make comparisons across countries.

Ultimately, this book will help new generations of physical activity professionals provide positive solutions to the problems that exist in their fields and to make lifelong impacts on their students.

Bilingualism and Bilingual Education: Politics, Policies and Practices in a Globalized Society May 12 2022 This volume presents a multinational perspective on the juxtaposition of language and politics. Bringing together an international group of authors, it offers theoretical and historical constructs on bilingualism and bilingual education. It highlights the sociocultural complexities of bilingualism in societies where indigenous and other languages coexist with colonial dominant and other prestigious immigrant languages. It underlines the linguistic diaspora and expansion of

English as the world's lingua franca and their impact on indigenous and other minority languages. Finally, it features models of language teaching and teacher education. This book challenges the existent global conditions of non-dominant languages and furthers the discourse on language politics and policies. It does so by pointing out the need to change the bilingual/multilingual educational paradigm across nations and all levels of educational systems.

International Practices to Promote Budget Literacy Jun 24 2023 Budget literacy is defined as 'the ability to read, decipher, and understand public budgets to enable and enhance meaningful citizen participation in the budget process'. It is comprised of two main parts - (i) a technical understanding of public budgets, including familiarity with government spending, tax rates and public debt and; (ii) the ability to engage in the budget process, comprising of practical knowledge on day-to-day issues, as well as an elementary understanding of the economic, social and political implications of budget policies, the stakeholders involved and when and how to provide inputs during the annual budget cycle. Given that no international standards or guidelines have been established for budget literacy education to date, this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries. The underlying presumption is that when supply-side actors in the budget process -- governments -- simplify and disseminate budget information for demand-side actors -- citizens -- this information will then be used by citizens to provide feedback on the budget. However, since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of "budget illiteracy" is to provide budget-literacy education in schools to youth, helping them evolve into civic-minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures, and the confidence and sense of social responsibility to participate in the oversight of public resources. This book elaborates on approaches, learning outcomes, pedagogical strategies and assessment approaches for budget literacy education, and presents lessons that are relevant for the development, improvement, or scaling up of budget literacy initiatives.

Building America's Skilled Technical Workforce Oct 05 2021 Skilled technical occupations are defined as occupations that require a high level of knowledge in a technical domain but do not require a bachelor's degree for entry are a key component of the U.S. economy. In response to globalization and advances in science and technology, American firms are demanding workers with greater proficiency in literacy and numeracy, as well as strong interpersonal, technical, and problem-solving skills. However, employer surveys and industry and government reports have raised concerns that the nation may not have an adequate supply of skilled technical workers to achieve its competitiveness and economic growth objectives. In response to the broader need for policy information and advice, Building America's Skilled Technical Workforce examines the coverage, effectiveness, flexibility, and coordination of the policies and various programs that prepare Americans for skilled technical jobs. This report provides action-oriented recommendations for improving the American system of technical education, training, and certification.

Social Justice and Transformative Learning Nov 29 2023 The similarities between the United States and South Africa with respect to race, power, oppression and economic inequities are striking, and a better understanding of these parallels can provide educational gains for students and educators in both countries. Through shared experiences and perspectives, this volume presents scholarly work from U.S. and South African scholars that advance educational practice in support of social justice and transformative learning. It provides a comprehensive framework for developing transformational learning experiences that facilitates leadership for social justice, and a deeper understanding of the factors influencing personal, national and global identity.

The Condition of Education in Brief Mar 02 2024

The Politics of Education in Developing Countries Mar 29 2021 Why have many developing countries that have succeeded in expanding access to education made such limited progress on improving learning outcomes? There is a growing recognition that the learning crisis constitutes a significant dimension of global inequality and also that educational outcomes in developing countries are shaped by political as well as socio-economic and other factors. The Politics of Education in Developing Countries focuses on how politics shapes the capacity and commitment of elites to tackle the learning crisis in six developing countries: Bangladesh, Cambodia, Ghana, Rwanda, South Africa, and Uganda. The problem of education quality is serious across the Global South. The Politics of Education in Developing Countries: From Schooling to Learning deploys a new conceptual framework-the domains of power approach-to show how the type of political settlement shapes the level of elite commitment and state capacity to improving learning outcomes. The domain of education is prone to being highly politicized, as it offers an important source of both rents and legitimacy to political elites, and can be central to paradigmatic elite ideas around nation-building and modernity. Of particular importance is the relative strength of coalitions pushing for access as against those focused on issues of higher quality education. This book concludes with a discussion of entry points and strategies for thinking and working politically in relation to education quality reforms and critical commentaries.

Learning from the Federal Market-Based Reforms Feb 26 2021 Over the past twenty years, educational policy has been characterized by top-down, market-focused policies combined with a push toward privatization and school choice. The new Every Student Succeeds Act continues along this path, though with decision-making authority now shifted toward the states. These market-based reforms have often been touted as the most promising response to the challenges of poverty and educational disenfranchisement. But has this approach been successful? Has learning improved? Have historically low-scoring schools "turned around" or have the reforms had little effect? Have these narrow conceptions of schooling harmed the civic and social purposes of education in a democracy? This book presents the evidence. Drawing on the work of the nation's most prominent researchers, the book explores the major elements of these reforms, as well as the social, political, and educational contexts in which they take place. It examines the evidence supporting the most common school improvement strategies: school choice; reconstitutions, or massive personnel changes; and school closures. From there, it presents the research findings cutting across these strategies by addressing the evidence on test score trends, teacher evaluation, "miracle" schools, the Common Core State Standards, school choice, the newly emerging school improvement industry, and re-segregation, among others. The weight of the evidence indisputably shows little success and no promise for these reforms. Thus, the authors counsel strongly against continuing these failed policies. The book concludes with a review of more promising avenues for educational reform, including the necessity of broader societal investments for combatting poverty and adverse social conditions. While schools cannot single-handedly overcome societal inequalities, important work can take place within the public school system, with evidence-based interventions such as early childhood education, detracking, adequate funding and full-service community schools—all intended to renew our nation's commitment to democracy and equal educational opportunity.

Education during the Time of the Revolution in Egypt Jul 14 2022 Since the 25th January 2011 revolution, Egyptians experienced and engaged in a daily debate. Controversially, some argued that the conflict and revolts in Egypt, and the Arab region, were neither coincidental, nor the result of a "domino effect" of collective actions by oppressed people against autocratic regimes. Rather, these revolts were the result of mobilization efforts made over decades by several activist groups, as well as national and international non-governmental organizations. Contrary to this view, others claim that despite the rapid economic growth of Egypt in the 2000s, there was a wide gap in the distribution of wealth and economic return, which left the majority of Egyptians suffering from poverty and high rate of unemployment, especially among youth. Obviously, while national and international economic and political dynamics dominated the daily debate, education remains the forgotten arena amidst conflict. With the exacerbation of conflict between militant extremists and modern states in the region, and most recently in many European countries, it became more important than ever before to understand the dialectics of education in conflict in different local contexts, starting in this book by the Egyptian context. The book focuses on education in Egypt during the time of the revolution as perceived by university students, youth activists, educational professionals, government officials and civil society organizations. Its chapters reveal the tension, contradiction and/or coherence among different players as related to their respective role in education for civic engagement, national identity, global citizenship, peace-building, teacher professional development, and women's and students' empowerment. The book illustrates the dialectics of education in conflict by articulating diverse meanings and perspectives given by Egyptian stakeholders when describing their actions and reality(ies) during the time of the revolution and its aftermath.

Ancient and Indigenous Wisdom Traditions in the Americas Mar 22 2023 This book brings attention to the understudied and often overlooked question of how curricula and classroom practices might inadvertently reproduce exclusionary discourses and narratives that omit or negate particular cultures, histories, and wisdom traditions. With a focus on representations and classroom practices related especially to ancient and Indigenous wisdom traditions and cultures, it includes unique contributions from scholars studying these questions in various contexts. The book offers a range of important studies from various contexts across the Americas, including Canada, the various member nations of the Caribbean Community (CARICOM), Puerto Rico, and the United States. The various chapter contributions address and discuss nuances of each of the contexts under study. The contributions also help highlight some key commonalities across these contexts, including how dominant discourses and various forces have historically shaped—and continue to shape and reproduce—such omissions, misrepresentations, and marginalization. In addition to seeking to reconcile with some of these ancient and Indigenous wisdom traditions and cultures, the book charts a path forward toward more holistic analytical frameworks as well as more inclusive and balanced representations and classroom practices in these aforementioned geographic contexts and beyond. It will appeal to scholars, researchers, undergraduate, and graduate students with interests in Indigenous education, curriculum studies, citizenship education, history of education, religion, and educational policy.

Racial Inequality in New York City since 1965 Apr 30 2021 A comprehensive exploration of racial inequality in New York City since 1965. In the past, the study of racial inequality in New York City has usually had a narrow focus, examining particular social problems affecting ethnic-racial groups. In contrast, this book provides a comprehensive overview of racial inequality in the city's economy, housing, and education sectors over the last half-century. A collection of original essays by some of New York's most well-known and emerging urban experts, *Racial Inequality in New York City since 1965* explores what city government has done and failed to do to address racial inequality. It examines the changes in circumstances of Asian, Latino, West Indian, and African American New Yorkers, outlining how theirs have either improved or deteriorated relative to their white counterparts. The contributors also analyze how practices and policies in policing, public housing, public health, and community services have maintained racial inequality and discuss how political participation can increase social capital among city residents in order to reduce racial inequality. The book concludes by offering a compendium of practical recommendations and actions that can be implemented to address racial inequality in the city. "This book provides a broad and up-to-date survey of social and demographic trends in New York City. Unlike many other works, it crosses policy arenas and is not shy in advocating community action." — J. Phillip Thompson, New York City Deputy Mayor for Strategic Policy Initiatives

Young Adult Development at the School-to-Work Transition Mar 10 2022 The school-to-work transition is a critical part of the human life-span for young adults, their families, and society. The timing of the transition varies greatly and its co-occurrence with a number of other life transitions make it challenging to summarize or generalize. Individual differences and normative developmental factors, as well as external contextual factors such as global pandemics, changing economic circumstances, workplace demands, and cultural shifts, intersect to create a range of challenges and opportunities for those navigating this transition. Written by internationally renowned scholars in developmental psychology, applied psychology, counseling, and sociology, the chapters in this book highlight the trends, issues, and actions that researchers, academics, practitioners, and policy makers need to consider in order to effectively support young adults' transition to work pathways. This volume provides an explicitly international perspective on this area, broad coverage of psychological topics on the school-to-work transition, and an inclusive focus on sub-groups and minority groups, making it a must-read for those who support young adults as they move from school to work.

Last Bell Jun 05 2024 In the mid-nineties, the Alfred Glickman School was just another failing school in one of America's most violent cities. Then SABIS, a private, for-profit education provider, took over. Twenty years later, the school is a six-time silver medalist in U.S. News & World Report's annual "America's Best High Schools" listing, and every single graduate of the school has been offered a college place. With success of this magnitude, you would think that for-profit managed charter schools like SABIS would be in high demand. On the contrary, they are fought at every turn. Why is the idea of employing for-profit companies to help rescue failing public schools treated with fear and hostility? Stranger still, why does a nation built on free enterprise refuse to embrace a free market strategy when so many students and schools would clearly benefit and with so much at stake? *Last Bell* is a book about politics, money and power. It examines the charge that for-profits running charter schools are in it for the money, not the kids, and reveals the real motives of those spreading these ideas and why they fight private sector involvement in public schools. *Last Bell* is a reasonable voice in a polarized debate. It does not call for an end to public schools but rather imagines a future in which private companies help create a competitive market for public education to boost performance, turn derelict schools into centers of excellence and give parents even in the worst neighborhoods real choice and their children a future.

Science Education in Canada Nov 05 2021 This book offers a meso-level description of demographics, science education, and science teacher education. Representing all 13 Canadian jurisdictions, the book provides local insights that serve as the basis for exploring the Canadian system as a whole and function as a common starting point from which to identify causal relationships that may be associated with Canada's successes. The book highlights commonalities, consistencies, and distinctions across the provinces and territories in a thematic analysis of the 13 jurisdiction-specific chapters. Although the analysis indicates a network of policy and practice issues warranting further consideration, the diverse nature of Canadian science education makes simple identification of causal relationships elusive. Canada has a reputation for strong science achievement. However, there is currently limited literature on science education in Canada at the general level or in specific areas such as Canadian science curriculum or science teacher education. This book fills that gap by presenting a thorough description of science education at the provincial/territorial level, as well as a more holistic description of pressing issues for Canadian science education.

America's Diverse Population Jul 26 2023 The composition of the American population is rapidly changing from a white, male dominated society to one that is so diverse it will soon be without any single, dominant race, ethnicity, or gender. The dramatic demographic shifts in American society have provoked many false claims and distortions of facts that have fueled demagoguery, as occurred during the 2016 presidential campaign. Access to unvarnished facts about people different than you—but who are becoming your neighbors—is more critical now than ever. This book, in full-color, was created to provide a single source of easily accessible facts—obtained primarily from U.S. government agencies—comparing characteristics of race, ethnicity, and gender in graphic format to enhance comprehension, as only visual presentations can achieve. Virtually all major socio-economic

topics are covered, including geographic distribution of populations, birth rates, health, wealth, poverty, income, employment, crime, incarcerations, social behaviors, education, and political preferences. Included are past and future trends for many characteristics, as are comparisons between foreign-born, natural citizens, legal and undocumented immigrants. Special Features: Socio-economic characteristics between races, ethnicities, and genders in America Comparisons include: health, education, wealth, poverty, income, employment, crime, incarcerations, social behaviors, geographic distributions, and political preferences Includes foreign-born and natural citizens, lawful and undocumented immigrants All data are graphically displayed for easy visualization and comprehension Attributed sources for all data include web addresses to enable additional research Only factual data are presented without editorial comments or opinions Interesting facts found in America's Diverse Population include: More than one-in-eight persons residing in the U.S. in 2015 were born elsewhere. Approximately one-in-four persons with "Green Cards" resided in California in 2013. Over three million temporary workers were admitted into the U.S. in 2014. In 2009 over two-thirds of convictions of undocumented immigrants were for violations of immigration law, and two percent for crimes against persons. Approximately one-of-three Black or African American children live in households with both married parents, compared with ninety-five percent of Asian households. In 2013 one-of-eight high school age Hispanic or Latino females reported they were forced to have sex. In 2015 ninety-seven percent of kindergarten teachers were women. Approximately one-half of all maids and housekeeping cleaners in 2015 were Hispanic or Latino women. In 2015, almost one-in-four Asian females held a Master's degree, the highest rate of any race or ethnicity. In 2013, the number of Non-Hispanic White children in the U.S., grades K-8, fell below fifty percent of students for the first time.

[Research for Educational Change](#) Jan 20 2023 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice. Focussing its discussion within the context of mathematics education, it argues that while research-generated insights can have beneficial effects on learning and teaching, the question of how these effects are to be generated and sustained is far from evident. The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice. In the first part of the book, four teams of researchers use different methodologies while analysing the same corpus of data, collected in a South African mathematics classroom. In the second part, each of these teams makes a specific proposal about what can be done and how so that its research-generated insights have a tangible, beneficial impact on what is happening in mathematical classrooms. Combining two discourses - that of researchers speaking to one another, and that of researchers communicating their insights to those responsible for educational practice - the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education, educational research and classroom practices. This book will be key reading for postgraduates, researchers and academics in education and particularly in the areas of mathematics education, education research, teacher education and classroom practice. It will also appeal to teacher educators, practitioners and undergraduate students interested in educational research.

Caught in the Act Aug 27 2023 The research reported in Caught in the Act draws together the insights gained from a continuous professional development initiative for high school mathematics teachers, teaching in low socio-economic status and socially challenged environments in South Africa. The chapters show the possibilities for enhancing achievement in school mathematics if a strength-based approach is adopted to develop teaching with teachers and when their concerns are taken seriously. The book demonstrates that the ecological relevance - fitness for the context in which teachers are teaching - of the "goods" developed and distributed by initiatives should be a major consideration to offer hope for sustainable implementation to improve school mathematics education. The book is of interest to mathematics teachers, school leaders, mathematics curriculum advisors, policy makers and researchers.
