Where You Go Is Not Who You'll Be Mar 28 2021 Read award-winning journalist Frank Bruni's New York Times bestseller: an inspiring manifesto about everything wrong with today's frenzied college admissions process and how to make the most of your college years. Over the last few decades, Americans have turned college admissions into a terrifying and occasionally devastating process, preceded by test prep, tutors, all sorts of stratagems, all kinds of rankings, and a conviction among too many young people that their futures will be determined and their worth established by which schools say yes and which say no. In *Where You Go Is Not Who You'll Be*, Frank Bruni explains why this mindset is wrong, giving students and their parents a new perspective on this brutal, deeply flawed competition and a path out of the anxiety that it provokes. Bruni, a bestselling author and a columnist for the New York Times, shows that the Ivy League has no monopoly on corner offices, governors' mansions, or the most prestigious academic and scientific grants. Through statistics, surveys, and the stories of hugely successful people, he demonstrates that many kinds of colleges serve as ideal springboards. And he illuminates how to make the most of them. What matters in the end are students' efforts in and out of the classroom, not the name on their diploma. Where you go isn't who you'll be. Americans need to hear that--and this indispensable manifesto says it with eloquence and respect for the real promise of higher education.

***Billion-Dollar Ball* Feb 25 2021** "A penetrating examination of how the elite college football programs have become 'giant entertainment businesses that happened to do a little education on the side.'"—Mark Kram, *The New York Times* Two-time Pulitzer-Prize-winning journalist Gilbert M. Gaul offers a riveting and sometimes shocking look inside the money culture of college football and how it has come to dominate a surprising number of colleges and universities. Over the past decade college football has not only doubled in size, but its elite programs have become a \$2.5-billion-a-year entertainment business, with lavishly paid coaches, lucrative television deals, and corporate sponsors eager to slap their logos on everything from scoreboards to footballs and uniforms. Profit margins among the top football schools range from 60% to 75%—results that dwarf those of such high-profile companies as Apple, Facebook, and Microsoft—yet thanks to the support of their football-mad representatives in Congress, teams aren't required to pay taxes. In most cases, those windfalls are not passed on to the universities themselves, but flow directly back into their athletic departments. College presidents have been unwilling or powerless to stop a system that has spawned a wildly profligate infrastructure of coaches, trainers, marketing gurus, and a growing cadre of bureaucrats whose sole purpose is to ensure that players remain academically eligible to play. From the University of Oregon's lavish \$42 million academic center for athletes to Alabama coach Nick Saban's \$7 million paycheck—ten times what the school pays its president, and 70 times what a full-time professor there earns—Gaul examines in depth the extraordinary financial model that supports college football and the effect it has had not only on other athletic programs but on academic ones as well. What are the consequences when college football coaches are the highest paid public employees in over half the states in an economically troubled country, or when football players at some schools receive ten times the amount of scholarship awards that academically gifted students do? *Billion-Dollar Ball* considers these and many other issues in a compelling account of how an astonishingly wealthy sports franchise has begun to reframe campus values and distort the fundamental academic mission of our universities.

Going to College in the Sixties Aug 14 2022 The 1960s was the most transformative decade in the history of American higher education—but not for the reasons you might think. Picture going to college in the sixties: the protests and marches, the teach-ins and sit-ins, the drugs, sex, and rock 'n' roll—hip, electric, psychedelic. Not so fast, says bestselling historian John R. Thelin. Even at radicalized campuses, volatile student demonstrations coexisted with the "business as usual" of a flagship state university: athletics, fraternities and sororities, and student government. In *Going to College in the Sixties*, Thelin reinterprets the campus world shaped during one of the most dramatic decades in American history. Reconstructing all phases of the college experience, Thelin explores how students competed for admission, paid for college in an era before Pell Grants, dealt with crowded classes and dormitories, voiced concerns about the curriculum, grappled with new tensions in big-time college sports, and overcame discrimination. Thelin augments his anecdotal experience with a survey of landmark state and federal policies and programs shaping higher education, a chronological look at media coverage of college campuses over the course of the decade, and an account of institutional changes in terms of curricula and administration. Combining student memoirs, campus publications, oral histories, and newsreels, along with archival sources and

institutional records, the book goes beyond facile stereotypes about going to school in the sixties. Grounded in social and political history, with a scope that will appeal both to a new generation of scholars and to alumni of the era, this engaging book allows readers to consider "going to college" in both the past and the present.

When Grit Isn't Enough Oct 28 2023 Examines major myths informing American education and explores how educators can better serve students, increase college retention rates, and develop alternatives to college that don’t disadvantage students on the basis of race or income Each year, as the founding headmaster of the Boston Arts Academy (BAA), an urban high school that boasts a 94 percent college acceptance rate, Linda Nathan made a promise to the incoming freshmen: “All of you will graduate from high school and go on to college or a career.” After fourteen years at the helm, Nathan stepped down and took stock of her alumni: of those who went to college, a third dropped out. Feeling like she failed to fulfill her promise, Nathan reflected on ideas she and others have perpetuated about education: that college is for all, that hard work and determination are enough to get you through, that America is a land of equality. In *When Grit Isn't Enough*, Nathan investigates five assumptions that inform our ideas about education today, revealing how these beliefs mask systemic inequity. Seeing a rift between these false promises and the lived experiences of her students, she argues that it is time for educators to face these uncomfortable issues head-on and explores how educators can better serve all students, increase college retention rates, and develop alternatives to college that don’t disadvantage students on the basis of race or income. Drawing on the voices of BAA alumni whose stories provide a window through which to view urban education today, *When Grit Isn't Enough* helps imagine greater purposes for schooling.

Who Gets In and Why Jun 23 2023 From award-winning higher education journalist and New York Times bestselling author Jeffrey Selingo comes a revealing look from inside the admissions office—one that identifies surprising strategies that will aid in the college search. Getting into a top-ranked college has never seemed more impossible, with acceptance rates at some elite universities dipping into the single digits. In *Who Gets In and*

Why, journalist and higher education expert Jeffrey Selingo dispels entrenched notions of how to compete and win at the admissions game, and reveals that teenagers and parents have much to gain by broadening their notion of what qualifies as a “good college.” Hint: it’s not all about the sticker on the car window. Selingo, who was embedded in three different admissions offices—a selective private university, a leading liberal arts college, and a flagship public campus—closely observed gatekeepers as they made their often agonizing and sometimes life-changing decisions. He also followed select students and their parents, and he traveled around the country meeting with high school counselors, marketers, behind-the-scenes consultants, and college rankers. While many have long believed that admissions is merit-based, rewarding the best students, *Who Gets In and Why* presents a more complicated truth, showing that “who gets in” is frequently more about the college’s agenda than the applicant. In a world where thousands of equally qualified students vie for a fixed number of spots at elite institutions, admissions officers often make split-second decisions based on a variety of factors—like diversity, money, and, ultimately, whether a student will enroll if accepted. One of the most insightful books ever about “getting in” and what higher education has become, *Who Gets In and Why* not only provides an unusually intimate look at how admissions decisions get made, but guides prospective students on how to honestly assess their strengths and match with the schools that will best serve their interests.

***The Price You Pay for College* Dec 18 2022 Named one of the best books of 2021 by NPR New York Times Bestseller and a New York Times Book Review Editor’s Choice pick “Masterly . . . represents an extraordinary**

achievement: It is comprehensive and detailed without being tedious, practical without being banal, impeccably well judged and unusually rigorous.”—Daniel Markovits, New York Times Book Review “Ron Lieber is a gift.”—Scott Galloway The hugely popular New York Times Your Money columnist and author of the bestselling *The Opposite of Spoiled* offers a deeply reported and emotionally honest approach to the biggest financial decision families will ever make: what to pay for college—a decision made even more confusing because of the Covid-19 pandemic. Sending a teenager to a flagship state university for four years of on-campus living costs more than \$100,000 in many parts of the United States. Meanwhile, many families of freshmen attending selective private colleges will spend triple—over \$300,000. With the same passion, smarts, and humor that infuse his personal finance column, Ron Lieber offers a much-needed roadmap to help families navigate this difficult and often confusing journey. Lieber begins by explaining who pays what and why and how the financial aid system got so complicated. He also pulls the curtain back on merit aid, an entirely new form of discounting that most colleges now use to compete with peers. While price is essential, value is paramount. So what is worth paying extra for, and how do you know when it exists in abundance at any particular school? Is a small college better than a big one? Who actually does the teaching? Given that every college claims to have reinvented its career center, who should we actually believe? He asks the tough questions of college presidents and financial aid gatekeepers that parents don’t know (or are afraid) to ask and summarizes the research about what matters and what doesn’t. Finally, Lieber calmly walks families through the process of setting financial goals, explaining the system to their children and figuring out the right ways to save, borrow, and bargain for a better deal. *The Price You Pay for College* gives parents the clarity they need to make informed choices and helps restore the joy and wonder the college experience is supposed to represent.

Beyond College For All Sep 02 2021 In a society where everyone is supposed to go to college, the problems facing high school graduates who do not continue their education are often forgotten. Many cannot find jobs, and those who do are often stuck in low-wage, dead-end positions. Meanwhile employers complain that high school graduates lack the necessary skills for today's workplace. *Beyond College for All* focuses on this crisis in the American labor market. Around the world, author James E. Rosenbaum finds, employers view high school graduates as valuable workers. Why not here? Rosenbaum reports on new studies of the interaction between employers and high schools in the United States. He concludes that each fails to communicate its needs to the other, leading to a predictable array of problems for young people in the years after

graduation. High schools caught up in the college-for-all myth, provide little job advice or preparation, leading students to make unrealistic plans and hampering both students who do not go to college and those who start college but do not finish. Employers say they care about academic skills, but then do not consider grades when deciding whom to hire. Faced with few incentives to achieve, many students lapse into precisely the kinds of habits employers deplore, doing as little as possible in high school and developing poor attitudes. Rosenbaum contrasts the situation in the United States with that of two other industrialized nations—Japan and Germany—which have formal systems for aiding young people who are looking for employment. Virtually all Japanese high school graduates obtain work, and in Germany, eighteen-year-olds routinely hold responsible jobs. While the American system lacks such formal linkages, Rosenbaum uncovers an encouraging hidden system that helps many high school graduates find work. He shows that some American teachers, particularly vocational teachers, create informal networks with employers to guide students into the labor market. Enterprising employers have figured out how to use these networks to meet their labor needs, while students themselves can take steps to increase their ability to land desirable jobs. *Beyond College for All* suggests new policies based on such practices. Rosenbaum presents a compelling case that the problems faced by American high school graduates and employers can be solved if young people, employers, and high schools build upon existing informal networks to create formal paths for students to enter the world of work. Colleges That Change Lives May 03 2024 Prospective college students and their parents have been relying on Loren Pope's expertise since 1995, when he published the first edition of this indispensable guide. This new edition profiles 41 colleges—all of which outdo the Ivies and research universities in producing performers, not only among A students but also among those who get Bs and Cs. Contents include: Evaluations of each school's program and "personality" Candid assessments by students, professors, and deans Information on the progress of graduates This new edition not only revisits schools listed in previous volumes to give readers a comprehensive assessment, it also addresses such issues as homeschooling, learning disabilities, and single-sex education.

The College Conversation Apr 02 2024 From an Ivy League dean and a college admissions expert, a guide to help parents support their children as they navigate their way to college *The College Conversation* is a comprehensive resource for mapping the path through the college application process that provides practical advice and reassurance to keep both anxious parents and confused children sane and grounded. Rather

than adding to the existing canon of "How to Get In" college guides or rankings, Eric Furda and Jacques Steinberg provide a step-by-step approach to having the tough conversations on this topic with less stress and more success. The book is organized around key discussions and themes that trace the chronological arc of admissions and financial aid--beginning before the assembly of a list of potential colleges and continuing through the receipt of decisions--with a final section that includes advice on the first year of college. The topics include preliminary conversations about the search, and specifically how parents can think about their children's interests and what kind of college would best suit them; choosing a college (based on its curriculum, culture, and community); writing the most effective essays; assessing acceptances, including considerations of finances and aid; and making the transition from high school to college life. The College Conversation will provide parents, students, and counselors with the credible, level-headed information often missing in this process, as well as a much-needed dash of perspective borne of experience.

College Mar 01 2024 As the commercialization of American higher education accelerates, more and more students are coming to college with the narrow aim of obtaining a preprofessional credential. The traditional four-year college experience—an exploratory time for students to discover their passions and test ideas and values with the help of teachers and peers—is in danger of becoming a thing of the past. In *College*, prominent cultural critic Andrew Delbanco offers a trenchant defense of such an education, and warns that it is becoming a privilege reserved for the relatively rich. In describing what a true college education should be, he demonstrates why making it available to as many young people as possible remains central to America's democratic promise. In a brisk and vivid historical narrative, Delbanco explains how the idea of college arose in the colonial period from the Puritan idea of the gathered church, how it struggled to survive in the nineteenth century in the shadow of the new research universities, and how, in the twentieth century, it slowly opened its doors to women, minorities, and students from low-income families. He describes the unique strengths of America's colleges in our era of globalization and, while recognizing the growing centrality of science, technology, and vocational subjects in the curriculum, he mounts a vigorous defense of a broadly humanistic education for all. Acknowledging the serious financial, intellectual, and ethical challenges that all colleges face today, Delbanco considers what is at stake in the urgent effort to protect these venerable institutions for future generations. In a new afterword, Delbanco responds to recent developments—both ominous and promising—in the changing landscape of higher education.

Preparing Your Teens for College Jun 04 2024 Will my teens' faith be strong enough to withstand the tests of college? Will they focus on their studies or squander their free time? Will they form healthy friendships or join the wrong crowd? Dr. Alex Chediak has watched too many college students flounder over these issues and many others. Sadly, 45 percent of those who start off at a four-year college will not complete their degree. At a time when college has never been more expensive, too many of our children are failing. What makes the difference? Character, a strong faith, and a willingness to delay gratification. And where is that learned? Ideally, at home. In this book, Alex will give you everything you need to help your teens not only successfully navigate the college years but also real life. Alex covers all the hot-button issues: dating, premarital sex, roommates, grades, career guidance, God, and much more. You won't want to be without this essential survival manual for college.

***Hold Fast to Dreams Mar 09 2022* An "invaluable" memoir by a counselor who left the elite private-school world to help poor and working-class kids get into college (Washington Monthly). Winner of the Studs and Ida Terkel Award Joshua Steckel left an elite Manhattan school to serve as the first-ever college guidance counselor at a Brooklyn public high school—and has helped hundreds of disadvantaged kids gain acceptance. But getting in is only one part of the drama. This riveting work of narrative nonfiction follows the lives of ten of Josh's students as they navigate the vast, obstacle-ridden landscape of college in America, where students for whom the stakes of education are highest find unequal access and inadequate support. Among the students we meet are Mike, who writes his essays from a homeless shelter and is torn between his longing to get away to an idyllic campus and his fear of leaving his family in desperate circumstances; Santiago, a talented, motivated, and undocumented student, who battles bureaucracy and low expectations as he seeks a life outside the low-wage world of manual labor; and Ashley, who pursues her ambition to become a doctor with almost superhuman drive—but then forges a path that challenges received wisdom about the value of an elite liberal arts education. At a time when the idea of "college for all" is hotly debated, this book uncovers, in heartrending detail, the ways the American education system fails in its promise as a ladder to opportunity—yet provides hope in its portrayal of the intelligence, resilience, and everyday heroics of young people whose potential is too often ignored. "A profound examination of the obstacles faced by low-income students . . . and the kinds of reforms needed to make higher education and the upward mobility it promises more accessible." —Booklist**

***How to College* Jul 13 2022** The first practical guide of its kind that helps students transition smoothly from high school to college The transition from high school—and home—to college can be stressful. Students and parents often arrive on campus unprepared for what college is really like. Academic standards and expectations are different from high school; families aren't present to serve as “scaffolding” for students; and first-years have to do what they call “adulthood.” Nothing in the college admissions process prepares students for these new realities. As a result, first-year college students report higher stress, more mental health issues, and lower completion rates than in the past. In fact, up to one third of first-year college students will not return for their second year—and colleges are reporting an increase in underprepared first-year students. *How to College* is here to help. Professors Andrea Malkin Brenner and Lara Schwartz guide first-year students and their families through the transition process, during the summer after high school graduation and throughout the school year, preparing students to succeed and thrive as they transition and adapt to college. The book draws on the authors' experience teaching, writing curricula, and designing programs for thousands of first-year college students over decades.

***Right College, Right Price* Apr 09 2022** Describes how the "Financial Fit" program can help families determine how much college will really cost beyond the sticker price and factor cost into the college search, and explains how to maximize financial aid benefits.

***Paying for the Party* Nov 28 2023** Two young women, dormitory mates, embark on their education at a big state university. Five years later, one is earning a good salary at a prestigious accounting firm. With no loans to repay, she lives in a fashionable apartment with her fiancé. The other woman, saddled with burdensome debt and a low GPA, is still struggling to finish her degree in tourism. In an era of skyrocketing tuition and mounting concern over whether college is “worth it,” *Paying for the Party* is an

indispensable contribution to the dialogue assessing the state of American higher education. A powerful exposé of unmet obligations and misplaced priorities, it explains in vivid detail why so many leave college with so little to show for it. Drawing on findings from a five-year interview study, Elizabeth Armstrong and Laura Hamilton bring us to the campus of "MU," a flagship Midwestern public university, where we follow a group of women drawn into a culture of status seeking and sororities. Mapping different pathways available to MU students, the authors demonstrate that the most well-resourced and seductive route is a "party pathway" anchored in the Greek system and facilitated by the administration. This pathway exerts influence over the academic and social experiences of all students, and while it benefits the affluent and well-connected, Armstrong and Hamilton make clear how it seriously disadvantages the majority. Eye-opening and provocative, *Paying for the Party* reveals how outcomes can differ so dramatically for those whom universities enroll.

[The College Finder](#) Aug 02 2021 A user-friendly guide written for the college shopper. A book of lists, this is the way to identify colleges where students will get in and fit in; includes the best schools in various fields, hidden gems, best dorm food, great low-cost colleges, best places to study abroad, and activist campuses.

[Navigating College](#) Dec 30 2023 Leaving high school and going to college is complicated for everyone. But if you're a student on the autism spectrum who is about to enter higher education for the first time, it might be a little bit more complicated for you. Maybe you're worried about getting accommodations, getting places on time, or dealing with sensory issues in a new environment. Maybe you could use some advice on how to stay healthy at school, handle dating and relationships, or talk to your friends and classmates about your disability. Maybe you want to talk to someone who's already dealt with these issues. That's where we come in. *Navigating College* is an introduction to the college experience from those of us who've been there. The writers and contributors are Autistic adults, and we're giving you the advice that we wish someone could have given us when we headed off to college. We wish we could sit down and have a chat with each of you, to share our experiences and answer your questions. But since we can't teleport, and some of us have trouble meeting new people, this book is the next best thing. So as you go back to school, check out a copy of *Navigating College* for yourself or your loved one. We've done this all before--let us help you out.

[The Case against Education](#) Feb 17 2023 Why we need to stop wasting public funds on education Despite being immensely popular—and immensely lucrative—education is grossly overrated. Now with a new afterword by Bryan Caplan, this explosive book argues that the primary

function of education is not to enhance students' skills but to signal the qualities of a good employee. Learn why students hunt for easy As only to forget most of what they learn after the final exam, why decades of growing access to education have not resulted in better jobs for average workers, how employers reward workers for costly schooling they rarely ever use, and why cutting education spending is the best remedy. Romantic notions about education being "good for the soul" must yield to careful research and common sense—The Case against Education points the way.

***What the Best College Students Do* Nov 16 2022** The author of the best-selling *What the Best College Teachers Do* is back with more humane, doable, and inspiring help, this time for students who want to get the most out of college—and every other educational enterprise, too. The first thing they should do? Think beyond the transcript. The creative, successful people profiled in this book—college graduates who went on to change the world we live in—aimed higher than straight A's. They used their four years to cultivate habits of thought that would enable them to grow and adapt throughout their lives. Combining academic research on learning and motivation with insights drawn from interviews with people who have won Nobel Prizes, Emmys, fame, or the admiration of people in their field, Ken Bain identifies the key attitudes that distinguished the best college students from their peers. These individuals started out with the belief that intelligence and ability are expandable, not fixed. This led them to make connections across disciplines, to develop a "meta-cognitive" understanding of their own ways of thinking, and to find ways to negotiate ill-structured problems rather than simply looking for right answers. Intrinsically motivated by their own sense of purpose, they were not demoralized by failure nor overly impressed with conventional notions of success. These movers and shakers didn't achieve success by making success their goal. For them, it was a byproduct of following their intellectual curiosity, solving useful problems, and taking risks in order to learn and grow.

No other book offers this much practical guidance on choosing and paying for college.

The College Choice Jan 07 2022 Choosing a college is a decision many young people will make, often with parental involvement. Christian families muddle through the world's system for choosing a school, typically relying on factors such as school rankings, majors, location, cost, and extra-curricular activities. But does God have anything to say about how His children should choose a college? Of course He does. Todd Sorrell offers students and parents a biblical roadmap for making this important decision. The College Choice will encourage setting aside preconceived notions about where and how to spend the college years, and point you to God's Word for guidance. Book jacket.

The Real World of College Oct 16 2022 Why higher education in the United States has lost its way, and how universities and colleges can focus sharply on their core mission. For The Real World of College, Wendy Fischman and Howard Gardner analyzed in-depth interviews with more than 2,000 students, alumni, faculty, administrators, parents, trustees, and others, which were conducted at ten institutions ranging from highly selective liberal arts colleges to less-selective state schools. What they found challenged characterizations in the media: students are not preoccupied by political correctness, free speech, or even the cost of college. They are most concerned about their GPA and their resumes; they see jobs and earning potential as more important than learning. Many say they face mental health challenges, fear that they don't belong, and feel a deep sense of alienation. Given this daily reality for students, has higher education lost its way? Fischman and Gardner contend that US universities and colleges must focus sharply on their core educational mission. Fischman and Gardner, both recognized authorities on education and learning, argue that higher education in the United States has lost sight of its principal reason for existing: not vocational training, not the provision of campus amenities, but to increase what Fischman and Gardner call "higher education capital"—to help students think well and broadly,

express themselves clearly, explore new areas, and be open to possible transformations. Fischman and Gardner offer cogent recommendations for how every college can become a community of learners who are open to change as thinkers, citizens, and human beings.

Practice for Life Sep 14 2022 From the day they arrive on campus, college students spend four years—or sometimes more—making decisions that shape every aspect of their academic and social lives. Whether choosing a major or a roommate, some students embrace decision-making as an opportunity for growth, while others seek to minimize challenges and avoid risk. **Practice for Life** builds a compelling case that a liberal arts education offers students a complex, valuable process of self-creation, one that begins in college but continues far beyond graduation. Sifting data from a five-year study that followed over two hundred students at seven New England liberal arts colleges, the authors uncover what drives undergraduates to become engaged with their education. They found that students do not experience college as having a clear beginning and end but as a continuous series of new beginnings. They start and restart college many times, owing to the rhythms of the academic calendar, the vagaries of student housing allocation, and other factors. This dynamic has drawbacks as well as advantages. Not only students but also parents and faculty place enormous weight on some decisions, such as declaring a major, while overlooking the small but significant choices that shape students' daily experience. For most undergraduates, deep engagement with their college education is at best episodic rather than sustained. Yet these disruptions in engagement provide students with abundant opportunities for reflection and course-correction as they learn to navigate the future uncertainties of adult life.

How to Run a College May 11 2022 How can colleges stay relevant in the twenty-first century? Residential colleges are the foundation on which US higher education is based. These institutions possess storied traditions fondly cherished by students, alumni, and faculty. There is no denying, however, that all colleges today struggle with changing consumer preferences, high sticker prices, and aging infrastructure. Technological and pedagogical alternatives—not to mention growing political pressure—present complex challenges. What can colleges and smaller universities do to stay relevant in today's educational and economic climate? In their concise guide, **How to Run a College**, Brian C. Mitchell and W. Joseph King analyze how colleges operate. Widely experienced as trustees, administrators, and faculty, they understand that colleges must update their practices, monetize their assets, and focus on core educational strategies in order to build strong institutions. Mitchell and King offer a frank yet optimistic vision for how colleges can change without

losing their fundamental strengths. To survive and become sustainable, they must be centers of dynamic learning, as well as economic engines able to power regional, state, and national economies. Rejecting the notion that American colleges are holdovers from a bygone time, *How to Run a College* shows instead that they are centers of experimentation and innovation that heavily influence higher education not only in the United States but also worldwide.

How College Works Jun 11 2022 Constrained by shrinking budgets, can colleges do more to improve the quality of education? And can students get more out of college without paying higher tuition? Daniel Chambliss and Christopher Takacs conclude that limited resources need not diminish the undergraduate experience. *How College Works* reveals the decisive role that personal relationships play in determining a student's success, and puts forward a set of small, inexpensive interventions that yield substantial improvements in educational outcomes. At a liberal arts college in New York, the authors followed nearly one hundred students over eight years. The curricular and technological innovations beloved by administrators mattered much less than did professors and peers, especially early on. At every turning point in undergraduate lives, it was the people, not the programs, that proved critical. Great teachers were more important than the topics studied, and just two or three good friendships made a significant difference academically as well as socially. For most students, college works best when it provides the daily motivation to learn, not just access to information. Improving higher education means focusing on the quality of relationships with mentors and classmates, for when students form the right bonds, they make the most of their education.
