Excerpt from Historical Record of Nameaug Engine Co: Together With an Original Poem, Read at the Re-Union, February 22nd, 1871, Also, a List of Its Members From Its Organization to the Present Time Your committee on the history of this Company approached their duties deeply impressed with the belief of their inability to do justice to the subject. The history of the Nameaug Company, extending over twenty years, has taken volumes to record. It will be the duty of your committee to cull from these records prominent incidents calculated to bring back remembrances of the good old times. The first written records of this Company to be found are dated August 6th. 1849; but it is supposed by many, and some of the old inhabitants assert that the organization existed many years previous to this date. As reliable historians we will discard tradition and confine ourselves to the written records. At the above date the organization existed as Reliance No. 5. We will give in full the record of the annual election at that date. Company met at 8 o'clock, P. M.; after collection of fines and dues, the Company proceeded (it being the annual meeting) to choice of officers, which resulted as follows, viz: F. I. Allen, Foreman, H. E. West, 1st Assistant, A. W. Gallaer, 2nd Assistant, C. G. Si stare, Secretary. The following new members were then proposed and elected; William H. Barns, Jonathan Starr, Jr., William Read, Patrick Kelley. Miscellaneous business being in order, it was moved and seconded that the leading committee consist hereafter of ten, and that they hold their office one year; that they be taken from the head of the list of members, following every year in succession; passed. B. S. Beckwich, D. A. Pollock, Thomas Edgar, George E. Starr, John A. Comstock, were chosen suction hose committee. No further business, Company adjourned.

About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. Ford was unique in that it had two very different big-block engine designs during the height of the muscle car era. The original FE engine design was pioneered in the late 1950s, primarily as a more powerful replacement for the dated Y-block design. What began as torquey engines meant to move heavyweight sedans morphed into screaming high-performance mills that won Le Mans and drag racing championships throughout the 1960s. By the late 1960s, the FE design was dated, so Ford replaced it with the 385 series, also known as the Lima design, in displacements of 429 and 460 ci, which was similar to the canted-valve Cleveland design being pioneered at the same time. It didn't share the FE pedigree of racing success, mostly due to timing, but the new design was better in almost every way; it exists via Ford Motorsports' offerings to this day. Beginning in 1971, the 429 found its way between the fenders of Mustangs and Torinos in high-compression 4-barrel versions called the Cobra Jet and Super Cobra Jet, and they were some of the most powerful passenger car engines Ford had ever built. If the muscle car era had not died out shortly after the release of these powerful engines, without a doubt the 429 performance variants would be ranked with the legendary big-blocks of all time. In this revised edition of How to Rebuild Big-Block Ford Engines, now titled Ford 429/460 Engines: How to Rebuild, Ford expert Charles Morris covers all the procedures, processes, and techniques for rebuilding your 385 Series big-block. Step-by-step text provides details for determining whether your engine actually needs a rebuild, preparation and removal, disassembly, inspection, cleaning, machining and parts selection, reassembly, start-up, and tuning. Also included is a chapter in building the special Boss 429 engines, as well as a bonus chapter on the Ford 351 Cleveland, Ford's little brother to the big-block. Excerpt from Josiah Hornblower, and the First Steam-Engine in America: With Some Notices of the Schuyler Copper Mines at Second River, N. J., And a Genealogy of

the Hornblower Family The New York Mercury of the same date says Last Week Captain Hey sham of this Port arrived here from Holland, but last from Dover, after a very tedious Passage of 17 Weeks; tis said had their last piece of Meat in the Pot, when they got into the Hook.
