Now in its fifth edition, *Diffusion of Innovations* is a classic work on the spread of new ideas. In this renowned book, Everett M. Rogers, professor and chair of the Department of Communication & Journalism at the University of New Mexico, explains how new ideas spread via communication channels over time. Such innovations are initially perceived as uncertain and even risky. To overcome this uncertainty, most people seek out others like themselves who have already adopted the new idea. Thus the diffusion process consists of a few individuals who first adopt an

innovation, then spread the word among their circle of acquaintances—a process which typically takes months or years. But there are exceptions: use of the Internet in the 1990s, for example, may have spread more rapidly than any other innovation in the history of humankind. Furthermore, the Internet is changing the very nature of diffusion by decreasing the importance of physical distance between people. The fifth edition addresses the spread of the Internet, and how it has transformed the way human beings communicate and adopt new ideas. The 2003 Statutory and Case Supplement that accompanies *Copyright in a*

*Global Information Economy*, or any copyright law coursebook, includes relevant materials from the United States Code (Title 17, Title 18, Title 44), The Code of Federal Regulations (Title 37) And The major international copyright treaties, As well as European Union materials. Back and better than ever, Darby and Walsh's *Dental Hygiene: Theory and Practice*, 5th Edition offers everything you need to succeed in your coursework, at certification, and in clinical practice. No other dental hygiene text incorporates the clinical skills, theory, and evidence-based practice in such an approachable way. All

discussions - from foundational concepts to diagnosis to pain management - are presented within the context of a unique patient-centered model that takes the entire person into consideration. New to this fifth edition is a much more streamlined approach - one that stays focused on need-to-know information, yet also houses expanded content on things like alternative practice settings, pediatric care, risk assessment, and dental hygiene diagnosis to give you added context when needed. This edition is also filled with new modern illustrations and new clinical photos to augment your learning. If you want a better grasp of all the dental

hygienist's roles and responsibilities in today's practice, they Darby and Walsh's renowned text is a must-have. Focus on research and evidence-base practice provide proven findings and practical applications for topics of interest in modern dental hygiene care. Step-by-step procedure boxes with accompanying illustrations, clinical photos, and rationales outline the equipment required and the steps involved in performing key procedures. Critical thinking exercises, cases, and scenarios help hone your application and problem-solving skills. Feature boxes highlight patient education, law, ethics, and safety.

perform essential skills and utilize clinical technology. NEW! Online procedures videos guide you step-by-step through core clinical skills. NEW! Editorial team brings a fresh perspective and more than 30 years of experience in dental hygiene education, practice, and research. "This is the best Norton Critical Edition yet! All my students have become intensely interested in reading Conrad—largely because of this excellent work." —Elise F. Knapp, Western Connecticut State University This Norton Critical Edition includes: - A newly edited text based on the first English book edition (1902), the last version to which Conrad is known to

have actively contributed. "Textual History and Editing Principles" provides an overview of the textual controversies and ambiguities perpetually surrounding Heart of Darkness. - Background and source materials on colonialism and the Congo, nineteenth-century attitudes toward race, Conrad in the Congo, and Conrad on art and literature. - Fifteen illustrations. - Seven contemporary responses to the novella along with eighteen essays in criticism—ten of them new to the Fifth Edition, including an entirely new subsection on film adaptations of Heart of Darkness. - A Chronology and an updated Selected Bibliography.

INTRODUCTION TO HEALTH CARE, 3E provides learners with an easy-to-read introduction to the foundational skills necessary for a range of health care professions. This redesigned and updated new edition offers a comprehensive but introductory survey of basic clinical health care skills for learners entering health care programs or for those that think they may be interested in pursuing a career in health care. Core competencies shared by all health care professions such as communication, infection control, and professionalism are provided to expose learners to the reality of practice. This

book emphasizes developing critical thinking skills through a five-step problem solving model that teaches how to assess a situation, consider alternatives, choose an appropriate alternative, evaluate the results, and revise as needed. This resource demonstrates how to think like a health care professional and is a terrific first step towards a rewarding career. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. This popular text continues using the format of the three approaches—The Executive, The Facilitator, and The Liberationist. For the Fifth

Edition, the authors add four new case studies: “Scripted Teaching,” “Accountability and Merit,” “What Is the Value of Caring Relationships?” and “School Funding.” Using these and other realistic case studies, they explore the strengths and weaknesses of each approach so that teachers can critically assess their own philosophical positions on teaching. Teachers are urged to ask themselves such questions as: What is the main goal of teaching? What is the most important purpose of education? What do I expect my students to eventually become? Is the way I structure my teaching influenced by how I view my role and goals? This updated edition also adds a

new section called “Topics and Resources” to encourage further inquiry into teaching. Approaches to Teaching is one of the five books in the highly regarded Teachers College Press THINKING ABOUT EDUCATION SERIES, now in its Fifth Edition. All of the books in this series are designed to help pre- and in-service teachers bridge the gap between theory and practice. Gary D Fenstermacher is Professor of Education at the University of Michigan, Ann Arbor. Jonas F. Soltis is William Heard Kilpatrick Professor Emeritus of Philosophy and Education at Teachers College, Columbia University. Matthew N Sanger is Assistant Professor

of Educational Foundations at Idaho State University. " Were you looking for the book with access to MasteringBiology? Written in plain English, it explains the workings of the Australian system of family law and sets out the practical issues to be dealt with by a separating couple. The Family Law Handbook addresses not only how the family law system works, but all aspects of separation and the making of workable parenting, property and financial arrangements for

a successful post-separation life, including: what to do immediately after separation ; how to negotiate with your former partner ; how family dispute resolution works ; making the best possible arrangements for children ; how to achieve a fair property settlement ; what happens at court and what each party, with or without a lawyer, should do. This book contains samples of parenting plan provisions, court orders, forms and affidavits that can be adapted for individual use, and a list of useful contacts and resources. This new IFSTA manual details the training required of Company Officers according to NFPA® 1021,

Standard for Fire Officer Professional Qualifications, 2014 Edition. The manual is divided into two sections to make a clear distinction between the information needed for Fire Officer Level I and Fire Officer Level II. Both print and eBook formats are available. There is no shortage of issues that a company officer might face in the everyday operation of a fire company or unit. This manual addresses the wide range of topics and issues encountered by a company officer, from leadership and supervision to health and safety issues. Great attention was given to focus on the job performance requirements of NFPA® 1021. The fifth edition

of Fire and Emergency Services Company Officer builds on the previous edition of the manual while presenting the material in a more concise manner to make it easier for students to read and instructors to teach. By merging related topics, the number of chapters was reduced from 32 in the fourth edition to 17 in the new manual while preserving the material related to the NFPA® standard. The number of appendices was reduced from 20 to 4 by removing information that can be found in other media. Along with reducing the volume of material from the fourth edition, the fifth edition of Fire

and Emergency Services Company Officer offers several new features. The manual features a new look with IFSTA's single-column format and upgraded and updated curriculum components. Learning activities are included to help instructors present the material to their students. Case Histories open each chapter to illustrate important lessons learned in the real world. Photographs, illustrations, and tables are included throughout the manual to illustrate key points and improve the overall instructional value of the material. Provides an all-in-one guide to the most commonly cited code violations encountered by building

inspectors. From award-winning author Karen Kearns, *The Big Picture, 5e* is written to support training delivery in CHC30113 Certificate III in Early Childhood Education and Care. It provides students with a practical introduction to working in a children's service environment, while helping to bridge the gap between theory and best practice. It is designed to address the relevant units of competency in a holistic and integrated way while covering the skills and knowledge students need to be deemed competent in this qualification. The text also examines the personal and professional skills needed to be an effective early childhood

educator. Students are introduced to the Early Childhood Australia Code of Ethics and the challenges faced by educators when working with families and children. In addition, Kearns emphasises the importance of knowing the traditional domains of early education and development, and links them to the Early Years Learning Framework (EYLF) and the National Quality Standards (NQS). *The Big Picture, 5e* is a highly visual and engaging text for students, or anyone wanting to undertake study in Early Childhood Education and Care. and professionals working within imaging, including medical physicists and nurses. Real Property Law in Queensland gives a clear and concise account of the fundamental principles of real property law as applied in Queensland today. The fifth edition has been revised and updated to deal with developments in real property case law and legislation since the last edition. The latest edition of a popular text and reference on database research, with substantial new material and revision; covers classical literature and recent hot topics. Lessons from database research have been applied in academic fields

ranging from bioinformatics to next-generation Internet architecture and in industrial uses including Web-based e-commerce and search engines. The core ideas in the field have become increasingly influential. This text provides both students and professionals with a grounding in database research and a technical context for understanding recent innovations in the field. The readings included treat the most important issues in the database area--the basic material for any DBMS professional. This fourth edition has been substantially updated and revised, with 21 of the 48 papers new to the edition, four of them published

for the first time. Many of the sections have been newly organized, and each section includes a new or substantially revised introduction that discusses the context, motivation, and controversies in a particular area, placing it in the broader perspective of database research. Two introductory articles, never before published, provide an organized, current introduction to basic knowledge of the field; one discusses the history of data models and query languages and the other offers an architectural overview of a database system. The remaining articles range from the classical literature on database research to

treatments of current hot topics, including a paper on search engine architecture and a paper on application servers, both written expressly for this edition. The result is a collection of papers that are seminal and also accessible to a reader who has a basic familiarity with database systems. The accompanying CD-ROM contains clinical examples, critical appraisals and background papers. *Days in the Lives of Social Workers* is a collection of first-person narratives describing typical days in the lives of 62 social workers in a variety of settings and roles. Appendices list organizations, websites, government resources, social

media, blogs, and podcasts related to social work. This new edition has been updated and revised to accompany the Fifth edition of English Grammar in Use, the first choice for intermediate (B1-B2) learners. This book contains 200 varied exercises to provide learners with extra practice of the grammar they have studied. A flexible and engaging casebook, Evidence: Cases, Commentary, and Problems focuses on core concepts and central controversies in evidence law, presented through tightly edited cases, stimulating commentary from a wide range of perspectives, and carefully crafted problems. The Fifth Edition, while as

streamlined and teachable as its predecessors, includes excerpts from more than fifty new cases and twenty new articles, fresh problems and enhanced editorial material, and three entirely new sections: one on machine-generated proof, one on digital forensics, and one on authenticating electronic evidence. There is new, up-to-date material on sexual assault cases, DNA evidence, social science evidence, privileges, judicial notice, hearsay, confrontation, “other crimes” evidence, and other key topics. New to the Fifth Edition: New sections on machine-generated proof, digital forensics, and authenticating electronic

evidence New materials on confrontation and hearsay, character evidence in sexual assault and child molestation cases, DNA evidence, social science evidence, “other crimes” evidence, and other key topics Excerpts from more than 50 new cases and 20 new articles New problems and editorial material throughout Professors and students will benefit from: Flexible structure that allows the book to be taught cover-to-cover in a four-unit, one-semester class, but also can be abridged or rearranged to suit course length and instructor’s preferences. Comprehensive coverage with a wide range of perspectives. Text that is

written with clarity and concision and includes well-selected and tightly edited cases. A balanced mix of cases, commentary, and problems covering relevance, hearsay, character evidence, impeachment, privilege, expert testimony, and authentication. Well-written introductory materials that identify key issues, important distinctions, and common sources of confusion. Health Care and the Law 4th Edition is recognised as one of the leading texts setting out the basic principles of health care law in New Zealand. This book is an easy-to-understand, practical and uncomplicated account of health care law, making it an

essential text for health practitioners, lawyers and students. Since 2004 when the 3rd edition of this book was published, there have been a number of legislative changes in the area of health law. This edition keeps you current with these changes, with updates made to all chapters. The inclusion of relevant case law also provides readers a greater understanding of the practicalities of the law, how it has been applied and how it may relate to them. Effective communication is essential to meeting basic human needs. In the latest edition of their popular text, Smith and Tague-Busler are joined by new author Starla Herbig in

presenting interpersonal communication concepts and techniques in a lively, accessible manner. Updated examples and exercises enhance established chapter coverage and minor reorganization prompts readers to explore the role of self-concept and self-esteem in their interactions with others before authors introduce elements of interpersonal communication. Affordable and straightforward, The Key to Survival is intended for those with varying backgrounds. Engaging chapter-opener narratives link common miscommunication experiences to essential topics. Boxes throughout chapters provide

sidebar commentary on primary topics and approachable exercises. Key terms, discussion questions, and a comprehensive glossary support an enjoyable teaching and learning experience. Getting an innovation adopted is difficult; a common problem is increasing the rate of its diffusion. Diffusion is the communication of an innovation through certain channels over time among members of a social system. It is a communication whose messages are concerned with new ideas; it is a process where participants create and share information to achieve a mutual understanding. Initial chapters of the book discuss the history

of diffusion research, some major criticisms of diffusion research, and the meta-research procedures used in the book. This text is the third edition of this well-respected work. The first edition was published in 1962, and the fifth edition in 2003. The book's theoretical framework relies on the concepts of information and uncertainty. Uncertainty is the degree to which alternatives are perceived with respect to an event and the relative probabilities of these alternatives; uncertainty implies a lack of predictability and motivates an individual to seek information. A technological innovation embodies information, thus

reducing uncertainty. Information affects uncertainty in a situation where a choice exists among alternatives; information about a technological innovation can be software information or innovation-evaluation information. An innovation is an idea, practice, or object that is perceived as new by an individual or an other unit of adoption; innovation presents an individual or organization with a new alternative(s) or new means of solving problems. Whether new alternatives are superior is not precisely known by problem solvers. Thus people seek new information. Information about new ideas is exchanged

through a process of convergence involving interpersonal networks. Thus, diffusion of innovations is a social process that communicates perceived information about a new idea; it produces an alteration in the structure and function of a social system, producing social consequences. Diffusion has four elements: (1) an innovation that is perceived as new, (2) communication channels, (3) time, and (4) a social system (members jointly solving to accomplish a common goal). Diffusion systems can be centralized or decentralized. The innovation-development process has five steps passing from recognition

of a need, through R&D, commercialization, diffusions and adoption, to consequences. Time enters the diffusion process in three ways: (1) innovation-decision process, (2) innovativeness, and (3) rate of the innovation's adoption. The innovation-decision process is an information-seeking and information-processing activity that motivates an individual to reduce uncertainty about the (dis)advantages of the innovation. There are five steps in the process: (1) knowledge for an adoption/rejection/implementation decision; (2) persuasion to form an attitude, (3) decision, (4) implementation, and (5) confirmation (reinforcement or

rejection). Innovations can also be re-invented (changed or modified) by the user. The innovation-decision period is the time required to pass through the innovation-decision process. Rates of adoption of an innovation depend on (and can be predicted by) how its characteristics are perceived in terms of relative advantage, compatibility, complexity, trialability, and observability. The diffusion effect is the increasing, cumulative pressure from interpersonal networks to adopt (or reject) an innovation. Overadoption is an innovation's adoption when experts suggest its rejection. Diffusion networks convey innovation-evaluation

information to decrease uncertainty about an idea's use. The heart of the diffusion process is the modeling and imitation by potential adopters of their network partners who have adopted already. Change agents influence innovation decisions in a direction deemed desirable. Opinion leadership is the degree individuals influence others' attitudes. Named a 2013 Doody's Core Title! "This is a wonderful book for both novice and experienced physician assistants and nurse practitioners. This latest edition will see frequent use in your daily practice." Score: 100, 5 stars--Doody's Medical Reviews "This textbook

provides comprehensive coverage of primary care disorders in an easy-to-read format and contains invaluable step-by-step instructions for evaluating and managing primary care patients. . .
