

"The command module pilot (CMP), the second in command of an Apollo spacecraft, was the least understood and least appreciated crew member by the media and the general public. In *Falling to Earth*, Al Worden, CMP of Apollo 15, clearly and candidly recounts the wonder, the challenge, the triumph, and the pitfalls of flying to the moon."

—Neil Armstrong, Gemini 8 and Apollo 11 astronaut

Falling To Earth An Apollo 15 Astronauts Journey The Moon Al Worden

Falling to Earth Al Worden, Francis French, 2012-07-24 As command module pilot for the Apollo 15 mission to the moon in 1971 Al Worden flew on what is widely regarded as the greatest exploration mission that humans have ever attempted He spent six days orbiting the moon including three days completely alone the most isolated human in existence During the return from the moon to earth he also conducted the first spacewalk in deep space becoming the first human ever to see both the entire earth and moon simply by turning his head The Apollo 15 flight capped an already impressive career as an astronaut including important work on the pioneering Apollo 9 and Apollo 12 missions as well as the perilous flight of Apollo 13 Nine months after his return from the moon Worden received a phone call telling him he was fired and ordering him out of his office by the end of the week He refused to leave What happened in those nine months from being honored with parades and meetings with world leaders to being unceremoniously fired has been a source of much speculation for four decades Worden has never before told the full story around the dramatic events that shook NASA and ended his spaceflight career Readers will learn them here for the first time along with the exhilarating account of what it is like to journey to the moon and back It s an unprecedentedly candid account of what it was like to be an Apollo astronaut with all its glory but also its pitfalls

Falling to Earth Al Worden, Francis French, 2011 The author describes his life from his early years growing up on a farm to his years as an astronaut with NASA including flying the Apollo 15 mission to the moon in 1971 [The Light of Earth](#) Al Worden, Francis French, 2021-11 Apollo 15 command module pilot Al Worden was one of the highest profile personalities among the Apollo astronauts renowned for his outspokenness and potent views but also recognized as a warm and well liked person who devoted much of his life after retiring from NASA to sharing his spaceflight experiences Worden had nearly finished writing this book before his passing in 2020 at the age of eighty eight Coauthored with spaceflight historian Francis French *The Light of Earth* is Worden s wide ranging look at the greatest ever scientific undertaking in which he was privileged to be a leading participant Here Worden gives readers his refreshingly candid opinions on the space program flying to the moon and the people involved in the Apollo and later shuttle programs as well as sharing hard hitting reflections on the space shuttle program the agonies and extraordinary sights and delights of being a NASA Apollo astronaut and the space program s triumphs and failures Worden delves into areas of personal grief that reveal the noble and truly human side of the space program s earliest years He does not hold back when discussing the shocking deaths of his fellow astronauts in the three major tragedies that struck the space agency nor does he shy away from sharing his personal feelings about fellow Apollo astronauts including Neil Armstrong and Buzz Aldrin Worden was known as a charismatic speaker and one of the most thoughtful Apollo astronauts His candid entertaining and unique perspective in *The Light of Earth* will captivate and surprise [Forever Young](#) John W Young, 2012-09-16 He walked on the Moon He flew six space missions in

three different programs more than any other human He served with NASA for more than four decades His peers called him the astronaut s astronaut Enthusiasts of space exploration have long waited for John Young to tell the story of his two Gemini flights his two Apollo missions the first ever Space Shuttle flight and the first Spacelab mission Forever Young delivers all that and more Young s personal journey from engineering graduate to fighter pilot to test pilot to astronaut to high NASA official to clear headed predictor of the fate of Planet Earth Young with the assistance of internationally distinguished aerospace historian James Hansen recounts the great episodes of his amazing flying career in fascinating detail and with wry humor He portrays astronauts as ordinary human beings and NASA as an institution with the same ups and downs as other major bureaucracies He frankly discusses the risks of space travel including what went wrong with the Challenger and Columbia shuttles Forever Young is one of the last memoirs produced by an early American astronaut It is the first memoir written by a chief of the NASA astronaut corps Young s experiences and candor make this book indispensable to everyone interested in the U S space program

Earthrise Edgar Mitchell, Ellen Mahoney, 2014-04-01 This vibrant memoir features the life story of Apollo 14 astronaut Edgar Mitchell focusing on Mitchell s amazing journey to the Moon in 1971 and highlighting the many steps he took to get there The former astronaut recounts his childhood as a farm boy in New Mexico flying solo as a teen living in Roswell during the alleged UFO crash studying at Carnegie Mellon and MIT his experiences as a navy combat pilot and finally a NASA astronaut In suspenseful prose he details his historic flight to the Moon with Alan Shepard and Stu Roosa describing everything from the practical eating sleeping and going to the bathroom in space to the metaphysical such as the life changing sense of connectedness to the universe that he felt during his return to Earth Resources include lists of websites about space museums and organizations films and videos and books for further reading Edgar Mitchell was the Lunar Module Pilot for the Apollo 14 mission and the sixth man to walk on the Moon He is the author of *The Way of the Explorer* *Paradigm Shift* and *The Space Less Traveled* the recipient of many medals and awards the founder of the Institute of Noetic Sciences He lives in Lake Worth Florida Ellen Mahoney is an instructor in the Department of Journalism and Technical Communication at Metro State University of Denver She lives in Boulder Colorado Dr Brian Cox is a professor and Royal Society University Research Fellow at the University of Manchester School of Physics and Astronomy Manchester England

We Have Capture Thomas P. Stafford, Michael Cassutt, 2014-01-14 What an amazing career Tom Stafford attained the highest speed ever reached by a test pilot 28 547 mph carried a cosmonaut s coffin with Soviet Secretary Leonid Brezhnev led the team that designed the sequence of missions leading to the original lunar landing and drafted the original specifications for the B 2 stealth bomber on a piece of hotel stationery But his crowning achievement was surely his role as America s unofficial space ambassador to the Soviet Union during the darkest

days of the Cold War In this lively memoir written with Michael Cassutt Stafford begins by recounting his early successes as a test pilot Gemini and Apollo astronaut and USAF general As President Nixon s stand in at the 1971 Soviet funeral for three cosmonauts he opened the door to the possibility of cooperation in space between Russians and Americans Stafford s Apollo Soyuz team was the first group of Americans to work at the cosmonaut training center and also the first to visit Baikonur the top secret Soviet launch center in 1974 His 17 July 1975 handshake in space with Soviet commander Alexei Leonov who became a lifelong friend proved to the world that the two opposing countries could indeed work successfully together Stafford has continued in this leadership role right up to the present participating in designing and evaluating the Space Shuttle Mir and the International Space Station He is truly an American hero who personifies the broadest spirit of exploration and cooperation

Marketing the Moon David Meerman Scott, Richard Jurek, 2014-02-28 One of the most successful public relations campaigns in history featuring heroic astronauts press savvy rocket scientists enthusiastic reporters deep pocketed defense contractors and Tang In July 1969 ninety four percent of American televisions were tuned to coverage of Apollo 11 s mission to the moon How did space exploration once the purview of rocket scientists reach a larger audience than My Three Sons Why did a government program whose standard operating procedure had been secrecy turn its greatest achievement into a communal experience In Marketing the Moon David Meerman Scott and Richard Jurek tell the story of one of the most successful marketing and public relations campaigns in history the selling of the Apollo program Primed by science fiction magazine articles and appearances by Wernher von Braun on the Tomorrowland segments of the Disneyland prime time television show Americans were a receptive audience for NASA s pioneering brand journalism Scott and Jurek describe sophisticated efforts by NASA and its many contractors to market the facts about space travel through press releases bylined articles lavishly detailed background materials and fully produced radio and television features rather than push an agenda American astronauts who signed exclusive agreements with Life magazine became the heroic and patriotic faces of the program And there was some judicious product placement Hasselblad was the first camera on the moon Sony cassette recorders and supplies of Tang were on board the capsule and astronauts were equipped with the Exer Genie personal exerciser Everyone wanted a place on the bandwagon Generously illustrated with vintage photographs artwork and advertisements many never published before Marketing the Moon shows that when Neil Armstrong took that giant leap for mankind it was a triumph not just for American engineering and rocketry but for American marketing and public relations

Exploring the Moon David M. Harland, 2008-04-16 In this comprehensive overview of Man s relationship with his planet s nearest neighbor David Harland opens with a review of the robotic probes namely the Rangers which returned television before crashing into the Moon the Surveyors which soft landed in order to investigate the nature of the surface and the Lunar Orbiters which mapped prospective Apollo landing sites He then outlines the historic landing by Apollo 11 and the final three missions of comprehensive geological investigations He concludes with a review of the robotic spacecraft that

The All American Boys Walter Cunningham, 2008-01-30 The All American Boys is a no holds barred candid memoir by a former Marine jet jockey and physicist who became NASA s second civilian astronaut Walter Cunningham presents the astronauts in all their glory in this

dramatically revised and updated edition From its insider s view of the astropolitics that guided the functioning of the astronaut corps to its thoughtful discussion of the Columbia tragedy The All American Boys resonates with Cunningham s passion for humanity s destiny in space Cunningham brings us into NASA s training program and reveals what it takes to be an astronaut He poignantly relates the story of the devastating Apollo 1 fire that took the lives of three astronauts and his own later successful flight on Apollo 7

Countdown to a Moon Launch Jonathan H. Ward,2015-07-07 Thousands of workers labored at Kennedy Space Center around the clock seven days a week for half a year to prepare a mission for the liftoff of Apollo 11 This is the story of what went on during those hectic six months Countdown to a Moon Launch provides an in depth look at the carefully choreographed workflow for an Apollo mission at KSC Using the Apollo 11 mission as an example readers will learn what went on day by day to transform partially completed stages and crates of parts into a ready to fly Saturn V Firsthand accounts of launch pad accidents near misses suspected sabotage and last minute changes to hardware are told by more than 70 NASA employees and its contractors A companion to Rocket Ranch it includes many diagrams and photographs some never before published to illustrate all aspects of the process NASA s groundbreaking use of computers for testing and advanced management techniques are also covered in detail This book will demystify the question of how NASA could build and launch Apollo missions using 1960s technology You ll discover that there was no magic involved just an abundance of discipline willpower and creativity

Lunar Science: A Post - Apollo View Stuart Ross Taylor,2016-06-06 Lunar Science A Post Apollo View Scientific Results and Insights from the Lunar Samples explains the scientific results and discoveries of the manned Apollo lunar missions as they are understood The emphasis is less on sample description and data and more on the interpretative aspects of the study with the aim of providing a coherent story of the evolution of the moon and its origin as revealed by the lunar samples and the Apollo missions This text has seven chapters the first of which provides a historical background of efforts to study the moon prior to the Apollo missions including lunar photogeologic mapping and direct exploration by spacecraft Attention then turns to the Apollo missions and the lunar samples collected beginning with Apollo 11 that landed on the moon on July 20 1969 and followed by more missions The next chapter describes the geology of the moon with emphasis on craters central peaks and peak rings the large ringed basins rilles and maria lava flows The reader is also introduced to the nature of the lunar surface material the maria basalts the highlands and the moon s interior This book concludes with a discussion on the evidence that has been gathered by the Apollo missions that offers insights into the origin and evolution of the moon An epilogue reflects on the usefulness of manned space flight This book will appeal to lunar scientists as well as to those with an interest in astronomy and space exploration
