Public Relations in Asia Pacific reflects the growing professionalism in the practice of public relations in the world's fastest expanding economy. It is a carefully drawn road map, both strategically and tactically, for all manner of entities, for profit and not-for-profit on how to establish and maintain effective relationships with their numerous stakeholders. Particularly insightful are the many examples of public relations in action within the Asia Pacific region. It's a "must" read for those interested in public relations careers and those new to the profession; and it's a first-rate refresher for the established professional. —Harold Burson, Founding Chairman, Burson-Marsteller Worldwide Mary Devereux and Anne Peirson-Smith have combined their considerable talents and experience to produce a bible of how public relations is—and should be—practiced in the Asia Pacific. One of its many virtues is that it debunks the myth that PR is just one long lunch hosted by caricature Svengalis and Spin Doctors. Rather, it sets the profession in a cultural context that will be valuable to those starting at PR 101, professionals and corporate executives who want to know how truth can be well told (with all due credit to McCann Erickson). —Kerry McGlynn, Special Adviser, Corporate Communication Department, Cathay Pacific Airways As greater social pluralism, stakeholder influence and internet driven consumer sophistication and empowerment grow relentlessly across nearly all Asian societies, Public Relations in Asia Pacific is a timely guide to the critical role of good public relations. Clear, helpful and with a wealth of good examples of how best practice PR in action can make real and tangible contributions to governments, businesses, NGOs as well as to ordinary people, this is essential reading for anyone concerned with how to communicate well in the world's fastest growing economic region. —Tim Sutton, Chairman Asia Pacific, Weber Shandwick In an increasingly globalized world, public relations practices and strategies become critical for organizations to communicate effectively to their diverse audiences worldwide. This book is therefore an extremely timely and relevant contribution to PR students and practitioners in the Asia-Pacific region as it provides not only a comprehensive overview of the essential concepts and skills of public relations but also specific case studies which illustrate tactical uses of public relations across a wide range of issues and countries. In my opinion, this book fills a major gap in the understanding of public relations concepts and practices and will constitute a fundamental resource for all those who aspire to excel within the field. —Dr. Indrajit Banerjee, Secretary-General, Asian Media Information and Communication Centre (AMIC) Want to laugh? Want to cry? Want to laugh and cry? Get ready for Derek L. Davis' new book! It's got laughter, gut-busting laughter, and want-to-laugh-in-the-library-and-get-thrown-out laughter. Derek covers many different topics in one book. In fact, he had over 1000 pages at one point, but people started complaining. Take a read of this book and die of laughter!* *This author cannot be sued for any wrongful death associated with reading this book. Technology companies claim to connect people through touchscreens, but by conflating physical contact with emotional sentiments, they displace the constructed aspects of devices and women and other oppressed individuals’ critiques of how such technologies function. Technology companies and device designers correlate touchscreens and online sites with physical contact and emotional sentiments, promising unmediated experiences in which the screen falls away in favor of visceral materiality and connections. While touchscreens are key elements of most people’s everyday lives, critical frameworks for understanding the embodied experiences of using them are wanting. In *Touch Screen Theory*, Michele White focuses on the relation between physically touching and emotionally feeling to recenter the bodies and identities that are empowered, produced, and displaced by these digital technologies and settings. Drawing on detailed cases and humanities methods, White shows how and why gender, race, and sexuality should be further analyzed in relation to touchscreen use and design. White delves into such details as how women are informed that their bodies and fingernails are not a fit for iPhones, how cellphone surfaces are correlated with skin and understood as erotic, the ways social networks use heart buttons and icons to seem to physically and emotionally connect with individuals, how online references to feminine and queer feelings are resisted by many men, and how women producers of autonomous sensory meridian response (ASMR) videos use tactile strategies and touch screens to emotionally bond with viewers. Proposing critical methods for studying touchscreens and digital engagement, *Touch Screen Theory* expands a variety of research areas, including digital and internet cultures, hardware, interfaces, media and screens, and popular culture. Coming in June 2016!_ Creating differentiated instruction is an essential yet time-consuming component of effective teaching. Since students

learn at different paces and in different ways, some students may be able to apply a targeted comprehension skill in cognitively complex ways immediately after being taught the skill while other students may need additional scaffolding in order to grasp it. All students, regardless of their skill level, benefit from activities that are at their just right level not too difficult or too easy. In this book, Nancy Witherell and Mary McMackin share easy-to-follow lesson plans that address key reading skills for students in grades 3 to 5. A set of three, tiered, differentiated follow-up activities accompanies each lesson. Fiction and nonfiction mentor texts are included. When John Midas acquires a magical gift, everything his lips touch turns into chocolate. This concludes my cook book, which I have written with much love. I attribute my love of cooking to my Grandmother Mielke to whom I dedicate this book. As a little girl, I spent a lot of time with her on the farm. I would churn butter, stir the milk that would be sitting in a tank of cold water, to make it cool faster and help her make her delicious pumpkin pies. She would tell me how to make the filling as she made the crust. I was literally her shadow. She was a patient and loving grandmother and my goal is to be as good a grandmother to my grandchildren as she was to me. Mobile Telecommunications in a High Speed World tells the story of 3G and higher-speed mobile communication technologies. Over ten years have passed since the first third-generation (3G) licences were awarded following debates about the merits of auctions versus 'beauty contests' then, nothing much happened. More licences were issued, a few roll-outs commenced and everyone began to think it had all been a horribly expensive mistake. That may still turn out to be the case, but in the meantime there have been massive developments in terms of the number of licences and launches worldwide, in the range of services that can be accessed, in the range of devices that can be used to access them, in operator strategies etc. Even the technology has improved considerably with 4G now under discussion. Much of this story has been chronicled, largely on the Internet, but the information is in tens of thousands of bits and pieces and a large part of it is either misleading or just plain wrong. Here, Peter Curwen and Jason Whalley introduce the outcomes of research that has involved the compilation of a unique database which details every licence and launch worldwide involving 3G. The authors discuss the structure of the industry and the strategic behaviour of operators, as well as the social consequences of the spread of 3G. They examine the role of new entry upon competition, and present analysis of the main operators involved, the development of handsets and especially smartphones. A number of country case studies are included. This comprehensive and up-to-date volume includes a number of country studies and is written by two of the world's foremost researchers on this industry. Mobile Telecommunications in a High Speed World will serve the needs of students, academics and those involved, or contemplating involvement, with the telecoms industry. Why pay thousands of dollars to consultancies to separate the wheat from the chaff with respect to 3G when you can read this book.
