Dunleavy,2014-06-03 First published in 1991 This book initially offers a critique of some key rational public choice models to  
show that they were internally inconsistent and ideologically slanted Then due to the authors research the ideas are  
restructured around a particular kind of institutional public choice method recognizing the value of instrumental models as a  
mode of thinking clearly about the manifold complexities of political life      **Middle-class School Choice in Urban Spaces**  
Emma Rowe,2016-12-01 Middle class School Choice in Urban Spaces examines government funded public schools from a  
range of perspectives and scholarship in order to examine the historical political and economic conditions of public schooling  
within a globalized post welfare context In this book Rowe argues that post welfare policy conditions are detrimental to  
government funded public schools as they engender consistent pressure in rearticulating the public school in alignment with  
the market produce tensions in serving the more historical conceptualizations of public schooling and are preoccupied by  
contemporary profit driven concerns Chapters focus on public schooling from different global perspectives with examples  
from Chile and the US to examine how various social movements encapsulate ideologies around public schooling Rowe also  
draws upon a rich five year ethnographic study of campaigns lobbying the Victorian State Government in Australia for a  
brand new local specific public school Critical attention is paid to the public school as a means to achieve empowerment and  
overcome discrimination and both a local and global lens are used to identify how parents choose the public school the values  
they attach to it and the strategies they use to obtain it Also considered however are how quality gaps distances and  
differences between public schools threaten to undermine the democracy of education as a means for individuals to be  
socially mobile and escape poverty This book makes an important contribution to our understanding of global social  
movements and activism around public education As such it will be of key interest to researchers academics and  
postgraduate students in the field of education specifically those working on school choice class and identity as well as  
educational geography      **Fruit World of Australasia** ,1928      *Glory Daze* Jim Chalmers,2013-07-01 Why does Australia a  
nation with one of the world s best economies have such a dim view of its own performance Why does it see itself as worse  
off than some of the basket case economies of southern Europe How did a country that was smart enough to avoid recession  
and mass unemployment despite a global meltdown get so down on itself In *Glory Daze* Jim Chalmers argues that the  
combination of hyper partisanship and self serving incentives in politics have resulted in a deficit of national self esteem This  
insider account provides a unique perspective on national identity Chalmers concludes that unless a stop is put to the  
poisonous politics of recent years Australia runs the risk of squandering existing national advantages and compromising our  
ability to tackle the challenges of the future      [Applied Regression Analysis](#) Norman R. Draper,Harry Smith,2014-08-25 An

Renne,2021-05-03 Adaptation Urbanism and Resilient Communities outlines and explains adaptation urbanism as a theoretical framework for understanding and evaluating resilience projects in cities and relates it to pressing contemporary policy issues related to urban climate change mitigation and adaptation Through a series of

detailed case studies this book uncovers the promise and tensions of a new wave of resilient communities in Europe Copenhagen Rotterdam and London and the United States New Orleans and South Florida In addition best practice projects in Amsterdam Barcelona Delft Utrecht and Vancouver are examined The authors highlight how these communities are reinventing the role of streets and connecting public spaces in adapting to and mitigating climate change through green blue infrastructure planning maintaining and enhancing sustainable transportation options and struggling to ensure equitable development for all residents The case studies demonstrate that while there are some more universal aspects to encouraging adaptation urbanism there are also important local characteristics that need to be both acknowledged and celebrated to help local communities thrive in the era of climate change The book also provides key policy lessons and a roadmap for future research in adaptation urbanism Advancing resilience policy discourse through multidisciplinary framework this work will be of great interest to students of urban planning geography transportation landscape architecture and environmental studies as well as resilience practitioners around the world **Western Canner and Packer** ,1925
