Preparation for Essay Writing

Prompt: What technological, social, economic, and cultural changes occurred on the Industrial Revolution?

The Industrial Revolution was a time of great change in the way people lived around the world. The invention of machines, changed the ways things were made. The possibility of creating a new business or a new invention allowed simple people to make money and climb social ladder. The migration from the countryside into cities promoted the creation of the working class. Life in the cities allowed people to have leisure time that they never had before. Art once again became a reflection of people's daily experiences. With the Industrial Revolution, life would never be the same again.

Paragraph 1: Necessity was truly the mother of money invention during the Industrial Revolution.

Examples of inventions (at least three) explain why these invention were so important.

Explain the importance of time in the Industrial Revolution.

Paragraph 2: New economic opportunities opened the gate for people to improve their lives.

- The creation of the middle class.
- Opportunities for bankers, small entrepreneurs, and merchant.
- The few millionaires (Leland Stanford, Rockefeller, etc).

Paragraph 3: Mass migration to the cities changed the way people lived. Immigration also was a direct result of the need of a new type of labor.

- From slaves to waged labor.
- Cities: Overcrowded, criminals, sanitary conditions, child exploitation etc.
- Populations → Statistics (use the information of your handout as examples for mortality rate, population increase and life expectancy (1750 to 1900 in England).

Essays in Industry and Technology in the Eighteenth Century John Raymond Harris, 1992 This collection of essays is devoted to the industrial history of England and France in the 18th century and concentrates in particular on transfers of technology between them There are specific studies of technical transfer in the steel glass and hardware industries and on the place of the skills of the workmen in the diffusion of technology Industrial espionage too early had its place and one essay investigates why it was resorted to and how it was carried out In the new introductory chapter John Harris surveys the rise of a new range of technologies in England based on dramatic increase in the use of coal and emphasises that this was basic to British industrial leadership and a main reason for her expertise being desired abroad Throughout the part played by individuals from inventors and entrepreneurs to managers ministers and skilled workers is regarded as essential to the process of industrial development Ce recueil est vou l histoire industrielle de l Angleterre et de la France au 18e si cle et se concentre plus particulie rement sur les transferts de technologie entre les deux pays Certaines tudes traitent sp cifiquement des changes techniques dans l industrie de l acier et celle du verre ainsi que de l importance de la comp tence des ouvriers quant la diffusion de la technologie L espionnage industriel qui lui aussi a rapidement vu jour fait le sujet d un article enqu atant sur sa raison d atre et les m thodes employ es Dans le nouveau chap R tre d introduction John Harris value l essor d un nouvel ventail de technologie en Angleterre bas sur l augmentation dramatique de la consommation de charbon il insiste que ce fait tait la base de la pr ponderance industrielle britannique et l une des raisons principales pour lesquelles son expertise tait si recherch e l tranger Le r le jou par l individu de l inventeur l administrateur en passant par les e

Most Wonderful Machine Judith A. McGaw, 2019-01-15 On a visit to a Berkshire paper mill the narrator of Herman Melville s *The Tartarus of Maids* views the wonderful papermaking machine with awe and calls it a miracle of inscrutable intricacy Manifesting in their factories and towns such nineteenth century fascination with machinery paper mill owners and workers made an industrial revolution in Berkshrie County Massachusetts This book examines their experiences from the era of craft production through several generations of sustained technological change to answer two major questions What accounts for the widespread and rapid adoption of machines in nineteenth century America And how did the new technology help to transform America socially and culturally Rejecting technological determinism Judith McGaw effectively integrates labor business social and women s history with technological history to bring to life the human decisions that made mechanization possible In compelling detail the author offers new explanations of how change in the craft era paved the way for industrialization and how paternalism worked in small scale industry She also provides a thoughtful discussion of the interaction between evangelical culture and the emerging industrial order and a close analysis of how nineteenth century gender distinctions fostered mechanization Judith A McGaw is Assistant Professor of History of Technology at the University of Pennsylvania

Myth, History and the Industrial Revolution D. C. Coleman, 1992-07-01 Tourists are today urged to visit the birthplace of the Industrial Revolution packaged as part of a glorious heritage Half a century and more ago the picture was very different Then the Industrial Revolution was commonly treated as having been a social catastrophe which had brought a new barbarism to the country Donald Coleman traces the history of the term Industrial Revolution and the uses to which it has been put Originating in European radical Romanticism popularised in English by Arnold Toynbee in the 1880s it has achieved with its meaning transformed the status of potent myth in the nation's history The book examines industrial revolutions real and imaginary illuminates some of the activities of businessmen engaged therein considers attitudes towards the businessmen who have thus come to occupy the historical stage and discusses the academic study of business history a subject hardly imaginable without the Industrial Revolution In the course of investigating these inter related topics the volume as a whole offers valuable insights into the ways in which economic history has been written and the concepts which have been invented and deployed in an effort to understand a central event in British history This book provides an excellent introduction to the subject

Science and Technology in the Industrial Revolution Albert Edward Musson, Eric Robinson, 1989 Concentrating on the Industrial Revolution as experienced in Great Britain and within that sphere mainly on the early development of the engineering and chemical industries the authors develop the thesis that the interaction between theorists and men of practical affairs was much closer more complex and more consequential than some historians of science have held it to be Deeply researched gracefully argued and fully documented First published in 1969 and established now as a classic in the field the present edition has a new foreword by Margaret C Jacob NW Annotation copyrighted by Book News Inc Portland OR

The Fourth Industrial Revolution Klaus Schwab, 2017-01-03 World renowned economist Klaus Schwab Founder and Executive Chairman of the World Economic Forum explains that we have an opportunity to shape the fourth industrial revolution which will fundamentally alter how we live and work Schwab argues

that this revolution is different in scale scope and complexity from any that have come before Characterized by a range of new technologies that are fusing the physical digital and biological worlds the developments are affecting all disciplines economies industries and governments and even challenging ideas about what it means to be human Artificial intelligence is already all around us from supercomputers drones and virtual assistants to 3D printing DNA sequencing smart thermostats wear able sensors and microchips smaller than a grain of sand But this is just the beginning nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development Imagine smart factories in which global systems of manu facturing are coordinated virtually or implantable mobile phones made of biosynthetic materials The fourth industrial revolution says Schwab is more significant and its ramifications more profound than in any prior period of human history He outlines the key technologies driving this revolution and discusses the major impacts expected on government business civil society and individu als Schwab also offers bold ideas on how to harness these changes and shape a better future one in which technology empowers people rather than replaces them progress serves society rather than disrupts it and in which innovators respect moral and ethical boundaries rather than cross them We all have the opportunity to contribute to developing new frame works that advance progress

The Industrial Revolution Hugh Lancelot Beales,1967 *Labor Before the Industrial Revolution* Thomas Max Safley,2018-11-09 One cannot conceive of capitalism without labor Yet many of the current debates about economic development leading to industrialization fail to directly engage with labor at all This collection of essays strives to correct this oversight and to reintroduce labor into the great debates about capitalist development and economic growth before the Industrial Revolution By attending to the effects of specific regulatory technological social and physical environments on producers and production in a set of specific industries these essays use an ecological approach that demonstrates how productivity knowledge and regime changed between 1400 and 1800 This book will be of interest to researchers in history especially labor history and European economic development *Education and Social Change* John Rury,John L. manufacturers It shows how this new working world led to sharpening class divisions and expanded consumerism Throughout groundbreaking social historians draw on 19th century primary documents and the latest research to show how the Industrial Revolution transformed the life the average American **Papermaking in Britain 1488-1988** Richard Leslie Hills,2015-11-19 This short history tells the story of five hundred years of papermaking against the general background of the coming of paper and printing in Britain through the major developments of the Industrial Revolution up to the technological advances which have made possible the enormous high speed paper machines of the present day *The Industrial Revolution Revisited* Stanley L. Engerman,1992 **The Industrial Revolution** William J. Ashworth,2017-01-26 The British Industrial Revolution has long been seen as the spark for modern global industrialization and sustained economic growth Indeed the origins of economic history as a discipline lie in 19th century European and North American attempts to understand the foundation of this process In this book William J Ashworth questions some of the orthodoxies concerning the history of the industrial revolution and offers a deep and detailed reassessment of the subject that focuses on the State and its role in the development of key British manufactures In particular he explores the role of State regulation and protectionism in nurturing Britain s negligible early manufacturing base Taking a long view from the mid 17th century through to the 19th century the analysis weaves together a vast range of factors to provide one of the fullest analyses of the industrial revolution and one that places it firmly within a global context showing that the Industrial Revolution was merely a short moment within a much larger and longer global trajectory This book is an important intervention in the debates surrounding modern industrial history will be essential reading for anyone interested in global and comparative economic history and the history of globalization *LEADING Through the Fourth Industrial Revolution* ,2019 *The Paper Trade* Albert Dykes Spicer,2009-04-01 This scarce antiquarian book is a facsimile reprint of the original Due to its age it may contain imperfections such as marks notations marginalia and flawed pages Because we believe this work is culturally important we have made it available as part of our commitment for protecting preserving and promoting the world s literature in affordable high quality modern editions that are true to the original work **The Power of Paper. How the Developments in Paper Making Influenced Human Capital and Fostered Economic Prosperity** Felix Pütz,2021-09-10 Academic Paper from the year 2020 in the subject Business economics Economic and Social History grade 1 3 Maastricht University language English abstract The Second Industrial Revolution 1870 1914 describes the rapid industrialization of the economy and huge developments in people s daily life due to enormous technological innovation Therefore it is oftentimes also called the science based revolution One of the many important innovations was the development of modern paper making This innovation reduced the cost of producing paper tremendously stopped enormous paper shortages from the beginning of the 19th century and increased the durability as well as stability of the paper According to Kuznets Murphy modern economic growth depended on the growth of knowledge and human capital Therefore through fostering this growth

developments in paper have had a strong effect on the economic prosperity of a nation This effect can for example be seen in the ancient Egyptian culture which developed and used the papyrus as their paper and consequently managed to become one of the most advanced societies of that time The importance of paper can also be seen when we compare the developments in Europe and North America to Asia Here the rise of books and newspapers did not occur at the same rate as in the Western World and led to a long time laggard economic development in those countries In order to gain more insights into the linkages between developments in paper making and economic prosperity this paper addresses the following research question How did the developments in paper making influence human capital and foster economic prosperity In order to answer this research question this paper will first analyze the developments in paper making and link them to the rise of newspapers and books Afterwards it will link the rise of newspapers to developments in education and literacy Finally these developments will be connected to the concept of human capital and economic prosperity Lastly this paper will provide a conclusion of the main findings
