extensive research from both Australia and Britain, this book is a

comprehensive history of the Australian Light Horse in war and peace, from its antecedents in the middle of the 19th century until the disbandment of the last regiment in 1944. Computer support for laboratory experimentation is becoming increasingly important in all types of scientific research. The more complex an experiment becomes, the greater the need for computer calculation, control, and data acquisition. This report describes a particular data acquisition instrument control applications to an experiment in 'Thermo-aging'. Emphasis has been placed on installation and operation to aid in future applications of the data acquisition system.
