We Have Never Been Modern Bruno Latour, 2012-10-01 With the rise of science we moderns believe the world changed irrevocably separating us forever from our primitive premodern ancestors But if we were to let go of this fond conviction Bruno Latour asks what would the world look like His book an anthropology of science shows us how much of modernity is actually a matter of faith What does it mean to be modern What difference does the scientific method make The difference Latour explains is in our careful distinctions between nature and society between human and thing distinctions that our benighted ancestors in their world of alchemy astrology and phrenology never made But alongside this purifying practice that defines modernity there exists another seemingly contrary one the construction of systems that mix politics science technology and nature The ozone debate is such a hybrid in Latour s analysis as are global warming deforestation even the idea of black holes As these hybrids proliferate the prospect of keeping nature and culture in their separate mental chambers becomes overwhelming and rather than try Latour suggests we should rethink our distinctions rethink the definition and constitution of modernity itself His book offers a new explanation of science that finally recognizes the connections between nature and culture and so between our culture and others past and present Nothing short of a reworking of our mental

landscape We Have Never Been Modern blurs the boundaries among science the humanities and the social sciences to enhance understanding on all sides A summation of the work of one of the most influential and provocative interpreters of science it aims at saving what is good and valuable in modernity and replacing the rest with a broader fairer and finer sense of possibility

Sonic Interaction Design Karmen Franinovic,Stefania Serafin,2013-03-22 An overview of emerging topics theories methods and practices in sonic interactive design with a focus on the multisensory aspects of sonic experience Sound is an integral part of every user experience but a neglected medium in design disciplines Design of an artifact s sonic qualities is often limited to the shaping of functional representational and signaling roles of sound The interdisciplinary field of sonic interaction design SID challenges these prevalent approaches by considering sound as an active medium that can enable novel sensory and social

experiences through interactive technologies This book offers an overview of the emerging SID research discussing theories methods and practices with a focus on the multisensory aspects of sonic experience Sonic Interaction Design gathers contributions from scholars artists and designers working at the intersections of fields ranging from electronic music to cognitive science They offer both theoretical considerations of key themes and case studies of products and systems created for such contexts as mobile music sensorimotor learning rehabilitation and gaming The goal is not only to extend the existing research and pedagogical approaches to SID but also to foster domains of practice for sound designers architects interaction designers media artists product designers and urban planners Taken together the chapters provide a foundation for a still emerging field affording a new generation of designers a fresh perspective on interactive sound as a situated and multisensory experience Contributors Federico Avanzini Gerold Baier Stephen Barrass Olivier Bau Karin Bijsterveld Roberto Bresin Stephen Brewster Jeremy Coopersotck Amalia De Gotzen Stefano Delle Monache Cumhuri Erkut George Essl Karmen Franinovi Bruno L Giordano Antti Jylh Thomas Hermann Daniel Hug Johan Kildal Stefan Krebs Anatole Lecuyer Wendy Mackay David Merrill Roderick Murray Smith Sile O Modhrain Pietro Polotti Hayes Raffle Michal Rinott Davide Rocchesso Antonio Rod Christopher Salter Zack Settler Stefania Serafin Simone Spagnol Jean Sreng Patrick Susini Atau Tanaka Yon Visell Mike Wezniewski John Williamson

Marketing Identities Through Language E. The French Resistance Olivier Wieviorka, 2016-04-25 Whatever happens the flame of French resistance must not and will not go out As Charles de Gaulle ended his radio address to the French nation in June 1940 listeners must have felt a surge of patriotism tinged with uncertainty Who would keep the flame burning through dark years of occupation At what cost Olivier Wieviorka presents a comprehensive history of the French Resistance synthesizing its social political and military aspects to offer fresh insights into its operation Detailing the Resistance from the inside out he reveals not one organization but many interlocking groups often at odds over goals methods and leadership He debunks lingering myths including the idea that the Resistance sprang up in response to the exhortations of de Gaulle s Free French government in exile The Resistance was homegrown arising from the soil of French civil society Resisters had to improvise in the fight against the Nazis and the collaborationist Vichy regime They had no blueprint to follow but resisters from all walks of life and across the political spectrum formed networks organizing activities from printing newspapers to rescuing downed airmen to sabotage Although the Resistance was never strong enough to fight the Germans openly it provided the Allies invaluable intelligence sowed havoc behind enemy lines on D Day and played a key role in Paris s liberation Wieviorka shatters the conventional image of a united resistance with no interest in political power But setting the record straight does not tarnish the legacy of its fighters who braved Nazism without blinking

Transforming Automobile Assembly Koichi Shimokawa, Ulrich Jürgens, Takahiro Fujimoto, 2012-12-06 For the world's leading car makers the early 1990s brought radical changes. The reports published by MIT shocked management in European and American industries. Former major companies had to face consequences no one had expected. The assembly lines were reorganized in order to achieve higher quality at lower costs. Five years after the MIT report this book poses the question: What are the results of this revolution in work organization? Scientists and practitioners, many of them involved in earlier reports, evaluate the changes to the automotive industry in Europe and Japan. An insight into recent concepts in automation and the organization of production. **Drum**, 2006 **Great Commanders** Christopher Richard Gabel, James H.

Willbanks, 2012-01-01 This volume is not a study of the greatest commanders; rather, it is an examination of commanders who should be considered great. The seven leaders examined in various domains of ground, sea, and air each in their own way successfully addressed the challenges of military endeavor in their time and changed the world in which they lived. Foreword

Transformation of Cities in Central and Eastern Europe F. E. Ian Hamilton, Kaliopa Dimitrovska Andrews, Nataša Pichler-Milanović, 2005 Annotation: This volume is one in a series initiated by the United Nations University Institute of Advanced Studies on the interrelationship between globalisation and urban transformation. It identifies and describes the inter and intra urban transformations of Central and Eastern European cities and considers their pre-1945 historic legacies, the socialist period, and their contemporary transition towards market-oriented and democratic systems. The dramatic changes since 1989, including the collapse of Communist ideology, the break-up of the Soviet Union, Czechoslovakia, and Yugoslavia, the end of the Cold War, and the impact of globalisation and European integration, have reconfigured this region and affected their re-integration into European and global networks. This book first examines the similarities and differences between significant Central and Eastern European cities, comparing the differing patterns of historical context and socialist legacies before 1990 and the impacts of internal and external forces on re-shaping these cities and their paths of transformation since 1990. It also examines the role of contemporary planning within the overall development of Central and Eastern European cities. The conclusion demonstrates the similarities and differences between Central and Eastern European cities and their re-integration into global networks.
