Goals of the Constitution

(pg. 69)

The Framers, or writers, of the Constitution had many goals for the new national government. Six of these goals are stated in the Preamble, or introduction, of the document. They are:

2. establish justice—create fair laws to govern the country’s people
3. ensure domestic tranquility—promote peace within the country

4. provide for the common defense—defend the country against any enemy nations

5. promote the general welfare—provide a government that would make laws for the good of all citizens

6. secure the blessings of liberty for themselves and the generations to follow—create a system of government that would protect the freedoms Americans valued.

The Framers knew that the government they created would have to pay its bills, raise an army, and conduct relations with foreign countries. The government needed enough power to do these things, but many of the

Goss,1998-05 Meant to aid State local emergency managers in their efforts to develop maintain a viable all hazard emergency operations plan This guide clarifies the preparedness response short term recovery planning elements that warrant inclusion in emergency operations plans It offers the best judgment recommendations on how to deal with the entire planning process from forming a planning team to writing the plan Specific topics of discussion include preliminary considerations the planning process emergency operations plan format basic plan content functional annex content hazard unique planning linking Federal State operations **Toward a Theory of Spacepower: Selected Essays** ,2011 **The Paradox of Power** David C. Gompert,2020 The second half of the 20th century featured a strategic competition between the United States and the Soviet Union That competition avoided World War III in part because during the 1950s scholars like Henry Kissinger Thomas Schelling Herman Kahn and Albert Wohlstetter analyzed the fundamental nature of nuclear deterrence Decades of arms control negotiations reinforced these early notions of stability and created a mutual understanding that allowed U S Soviet competition to proceed without armed conflict The first half of the 21st century will be dominated by the relationship between the United States and China That relationship is likely to contain elements of both cooperation and competition Territorial disputes such as those over Taiwan and the South China Sea will be an important feature of this competition but both are traditional disputes and traditional solutions suggest themselves A more difficult set of issues relates to U S Chinese competition and cooperation in three domains in which real strategic harm can be inflicted in the current era nuclear space and cyber Just as a clearer understanding of the fundamental principles of nuclear deterrence maintained adequate stability during the Cold War a clearer understanding of the characteristics of these three domains can provide the underpinnings of strategic stability between the United States and China in the decades ahead That is what this book is about **Command Of The Air**

General Giulio Douhet, 2014-08-15 In the pantheon of air power spokesmen Giulio Douhet holds center stage His writings more often cited than perhaps actually read appear as excerpts and aphorisms in the writings of numerous other air power spokesmen advocates and critics Though a highly controversial figure the very controversy that surrounds him offers to us a testimonial of the value and depth of his work and the need for airmen today to become familiar with his thought The progressive development of air power to the point where today it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact in many ways the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision Douhet together with Hugh Boom Trenchard of Great Britain and William Billy Mitchell of the United States is justly recognized as one of the three great spokesmen of the early air power era This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book published in 1921 Readers may well find much that they disagree with in this book but also much that is of enduring value The vital necessity of Douhet s central vision that command of the air is all important in modern warfare has been proven throughout the history of wars in this century from the fighting over the Somme to the air war over Kuwait and Iraq
