The conference is organized by SIAR (Society of Automotive Engineers from Romania) in cooperation with FISITA. The volume includes selected and reviewed papers from the European Automotive Congress held in Bucharest, Romania, in November 2015. Authors are experts from research, industry and universities coming from 14 countries worldwide. The papers are covering the latest developments in fuel economy and environment, automotive safety and comfort, automotive reliability and maintenance, new materials and technologies, traffic and road transport systems, advanced engineering methods and tools, as well as advanced powertrains and hybrid and electric drives. This volume showcases the valuable achievements of the Romanian technology and industry worldwide. It started from the premise that the history of Romanian technique is scarcely known outside the borders of Romania. The main Romanian contributions to the world ' s technological heritage are missing, except for a few names in the field of aviation, from the great encyclopedias and dictionaries published worldwide. This is due, among other reasons, to the insufficient promotion in widely spoken languages of the history of Romanian technology. The multidisciplinary approach of the volumes means that the field of technology had to be split into several branches. The present volume includes the following industries: electrical engineering, energy technology, biomedicine, maritime and rail transport, automotive industry, aviation.

The history of engineering societies, of engineering education, of intellectual property, and of inventions, as well as a synopsis of the personalities of Romanian engineering have been tackled in separate chapters. For each field, are engaged the collaboration of authors who have already published a history of their field. Certain chapters were drafted with the aid of specialists who have played the part of policy makers in the elaboration of development strategies for Romania and who are familiar not only with the facts and the history of their field, but also with the 'philosophy' behind its development. This book presents a concise framework for assessing technical and sustainability impacts of existing biorefineries and provides a possible road map for development of novel biorefineries. It offers a detailed, integrated approach to evaluate the entire biomass production chain, from the agricultural feedstock production and transportation, to the industrial conversion and commercialization & use of products. The Brazilian sugarcane biorefinery is used as a case study; however, the methods and concepts can be applied to almost any biomass alternative. Chapters explore the main issues regarding biorefinery assessment, including feedstock production and transportation modeling, biofuels and green chemistry products, as well as assessment of sustainability impacts. This book is a valuable source of information to researchers in bioenergy, green chemistry and sustainability fields. It also provides a useful framework for government agencies, investors and the energy industry to evaluate and predict the success of current and future

biorefinery alternatives. All models with 1.9 litre and 2.0 litre diesel engines. Also covers Nissan Primastar Does not cover specialist body conversions. Diesel: 1.9 litre (1870cc) & 2.0 litre (1995cc) Does not cover petrol engines or 2.5 litre diesel engine. This book presents select proceedings of the International Conference on Future Learning Aspects of Mechanical Engineering (FLAME 2020). The book focuses on latest research in mechanical engineering design and covers topics such as computational mechanics, finite element modeling, computer aided engineering and analysis, fracture mechanics, and vibration. The book brings together different aspects of engineering design and the contents will be useful for researchers and professionals working in this field.

'What is love for you?', Ish asked. That something, she always wanted to ask and know. She was expecting some wonderful words just like Krish has definitions of other things. 'Magic, love is magic', Krish replied in next second. 'Wow, magic. Is it?', for few seconds, she just stared at Krish with pleasant smile. So Krish also believed that love is somewhat special thing. It's magic and he is absolutely right. 'And magic is not possible without magician', eyes of Krish went on Ish. Krish smiled at her and her heart beats boost up with Krish 's breath. Is he talking about me that what came to her mind when he looked at me. 'And who are magicians?', Ish asked. 'Girls', Krish replied. 'Really, Am I a magician?', she asked herself with full of excitement. Love and girl seems to be synonyms of magic and magician. It's a story of four crazy girls of Mumbai Ish, Pal, Rachchu and Gudi who study in Dance

College and have a dream to open dance academy. Also it is about a friend and crush of Ish, Krish - corner boy. Can Ish create magic in life of Krish? Can Ish become magician for Krish? Let's know it. The book is designed to become a valid source of information to assist the student both in and out of the classroom to attain his or her objective. the structure of the text book is as follows: Chapter 1 is an introduction to the book, covering the basic information on automobiles. Chapter 2 deals with engines and their auxiliary units. Chapters 3-10 cover several aspects of design of automobile components - SI system, background mathematics and advice on problem solving, particularly exam questions. Chapters 11-15 cover essential theory part of support system for vehicles. Numerous designs and fully worked problems are provided at the end of the chapter. It is expected that as the student works through the examples and problems, he or she will develop a greater understanding of the mathematics required for engineering. To help the student develop a sound grasp of the principles covered there are many diagrams, notes and applications as an aid to develop knowledge and facilitate understanding. Proceedings of the FISITA 2012 World Automotive Congress are selected from nearly 2,000 papers submitted to the 34th FISITA World Automotive Congress, which is held by Society of Automotive Engineers of China (SAE-China ) and the International Federation of Automotive Engineering Societies (FISITA). standalone, full-length, English-language travel guidebook to Transylvania - the legendary, enchanting and increasingly popular region of Romania. Co-authored by former British Ambassador to Romania Paul Brummell, Romania: Transylvania has been thoroughly updated by prolific travel writer Tim Burford, who wrote his first Romania guide in 1991. Transylvania (the 'land beyond the forest') is a wild, wooded, intensely romantic region, filled with mountains and gorges, myths and legends, dragons, bears, wolves - and vampires. Bram Stoker called it 'one of the wildest and least-known parts of Europe', a description that remains true today. Comprehensive chapter-per-county coverage caters for a diverse range of interests, from city breaks to rural escapes, skiing to wildlife watching. One of the most beautiful regions in central Europe and home to three UNESCO World Heritage sites, Transylvania preserves its cultural and artistic treasures in a landscape bordered on three sides by the Carpathian Mountains, which provide Romania's finest skiing and hiking destinations. Hay meadows in the Lower Carpathians form a grassland ecosystem of extraordinary diversity, offering beautiful wildflower displays. The Carpathians are home too to lynx, wild boar and one of Europe's largest populations of brown bear. Other natural phenomena include the Scarisoara Ice Cave in the Apuseni Mountains and the Sfanta Ana volcanic crater lake in Harghita County. Transylvania's cultural riches include the Dacian fortresses of the Orastie Mountains, including Sarmizegetusa Regia, conquered by Roman Emperor Trajan in AD106. Historic

Sighisoara is a picture-perfect medieval hill town. The fortified churches of southern Transylvania are testament to the perils of life in medieval Saxon communities, subject to frequent attacks from Ottoman raiders. The historic cities of Cluj, Sibiu and Brasov are rightly feted (and host internationally renowned film, electronic music and theatre festivals). At Turda's salt mine, you can ride the big wheel in an underground amusement park. And, if you're inspired by the Hotel Transylvania or Twilight films, why not follow the Dracula trail, visiting sites linked to Bram Stoker's novel? Whatever your interests, with Bradt's Romania: Transylvania, you can discover the region's many and varied attractions.

Ukraine Investment and Business Guide Volume 1 Strategic and Practical Information "Presents the fundamental concepts of classical physics in a coherent and logical manner"-- The book provides insights from the 2nd International Conference on Communication, Computing and Networking organized by the Department of Computer Science and Engineering, National Institute of Technical Teachers Training and Research, Chandigarh, India on March 29-30, 2018. The book provides opportunities for the readers to explore the literature, identify gaps in the existing works and propose new ideas

for research. Ukraine Investment and Business Guide - Strategic and Practical Information Brands and businesses from across the globe have tried to leverage the India opportunity, based upon simplistic and widely-held assumptions. This book takes a critical look at these myths and contradictions from an inside perspective, presenting a fresh and nuanced perspective on the opportunities that the Indian market offers. It draws upon a wealth of data, from consumer research, market data, macroeconomic research, popular culture and case studies, to provide a thorough and compelling insight into what makes for success in the complex Indian market, based upon two decades of experience. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. This magazine is a specialist motoring magazine, we have always catered to the enthusiast in you and brought an unadulterated view of the world of motoring. Sharp, sassy, clean, wittier and edgier than ever before. Drive it home today! AUTONOMOUS VEHICLES The companion to Autonomous Vehicles Volume 1: Using Machine Intelligence, this second volume in the two-volume set covers intelligent techniques utilized for designing, controlling, and managing vehicular systems based on advanced algorithms of computing like machine learning, artificial intelligence, data analytics, and Internet of Things (IoT) with prediction approaches to avoid accidental

damages, security threats, and theft. Besides communicating with other vehicles, self-driving cars connected to a 5G network will also be able to communicate with different infrastructure elements that make up our roads and other transportation and communication systems. Similarly, an unmanned aerial vehicle (UAV), an aircraft without any human pilot, crew, or passengers on board, can operate under remote control by a human operator, as a remotely-piloted aircraft (RPA), or with various degrees of autonomy. These include autopilot assistance and fully autonomous aircraft that have no provision for human intervention. Transportation is a necessary, but often painful process. With fully autonomous driving, passengers will be freed to accomplish their own goals, turning the dead hours of driving into fruitful hours of learning, working, engaging, and relaxing. Similarly, UAVs can perform functions that human-operated aircraft cannot, whether because of the environment or high-risk situations. The purpose of the book is to present the needs, designs, and applications of autonomous vehicles. The topics covered range from mechanical engineering to computer science engineering, both areas playing vital roles in programming, managing, generating alerts, and GPS position, artificial intelligence-based prediction of path and events, as well as other high-tech tools, are covered in this book, as well. Whether for the student, veteran engineer, or another industry professional, this book, and its companion volume, are must-haves for any library. Describes the history and development of four-wheel drive vehicles and

some of the models manufactured around the world. In today's socially networked and highly competitive world, it is imperative that marketers are always truthful because customers eventually find out if they have been misled. This can lead to their angst with the company going viral, thereby destroying the company's reputation. Marketing Management advocates 'marketing based on absolute truth'. Also brand image is sensitive to market sentiments. Brands can be in danger: one wrong product or one shoddy campaign can destroy a brand built over years. Companies must align everything that they do with the core spirit of their brands. Further, when everything seems to go digital, it is important that marketers keep in mind that customers are primarily interested in their products/services. The book advocates that superior products and services will always be central to marketing.
