Textbook of Neonatal Resuscitation Apr 18 2023 The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). This updated edition reflects the 2015 AAP/AHA Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care of the Neonate. Full color.

Guidelines for Level Three Neonatal Intensive Care Oct 13 2022

Beyond the NICU: Comprehensive Care of the High-Risk Infant Aug 30 2021 Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. Improve medical and developmental outcomes in high-risk infants with evidence-based management strategies Beyond the NICU is the first book to deliver practical, evidence-based strategies for healthcare providers caring for the NICU graduate during convalescence and after discharge. It is a guide to the successful transition of a high-risk infant from intensive care to the intermediate-level nursery, and then, to help the child thrive outside of the hospital in a home environment. To advance the standard of care of these vulnerable patients, Beyond the NICU draws together clinically focused guidelines to improve patient outcomes and reduce hospital readmissions. Drawing on an international team of respected authorities, Beyond the NICU provides the strategies necessary to ensure the success of convalescing NICU graduates in both inpatient and outpatient settings. Doody's Review! Score: 95/100 Description This is a nearly 1,000-page softcover book written by over 100 contributors on convalescent neonatal care and post-discharge care of the high-risk infant. The format is similar to other neonatal handbooks (Neonatology: Management, Procedures, On-Call Problems, Diseases, and Drugs, 7th edition, Gomella, et al. (McGraw-Hill, 2013); Manual of Neonatal Care, 7th edition, Cloherty et al. (Lippincott

Williams & Wilkins, 2011)), but it emphasizes transitional care of the sick infant. Purpose The purpose is to provide "practical, evidence-based strategies for the NICU graduate during convalescence and after discharge." The book functions like a practical handbook for clinicians in the NICU, covering almost all aspects of neonatal care, but emphasizing convalescent care. This is an area that has not been well covered in other neonatal books, and this book meets the objectives. Audience The audience is NICU caregivers at all levels and of all disciplines. The book is written in outline format and emphasizes care rather than pathophysiology. The senior editor, his three consultants, and many of the contributors are recognizable names in the field. Features The 51 chapters are grouped into four sections. After an introductory section which includes chapters on the role of the primary care provider for the NICU graduate, the book covers most aspects of care of preterm and term infants in the next two sections. A final section on developmental care includes chapters on early intervention and palliative care. Although the book is supposed to emphasize convalescent and post-discharge care, much of the second and third sections deals with standard early diagnosis and treatment of common neonatal issues, which adds significant length to the book. The book is at its best when it sticks to its title and emphasizes care "beyond the NICU." Helpful appendixes include discharge checklists, home equipment, and even billing coding for the NICU graduate. Illustrations and tables are sparse, but some are unique and very helpful. Assessment This is a unique neonatal book in its emphasis on convalescent and post-discharge care for the sick neonate. It should become a standard text for clinicians in this field and, as it matures in subsequent editions, should abbreviate the acute care sections and concentrate on its title.

Neonatal Intensive Care Oct 01 2021

Neonatology at a Glance Jan 28 2024 Neonatology at a Glance provides a concise, illustrated overview of neonatal medicine. Written by leading international experts, it provides essential information on perinatal medicine, delivery, the normal newborn infant and neonatal problems encountered in neonatal intensive care units and their management. Each topic is supported by excellent illustrations, diagrams, and, for the first time, video clips to show neonatal resuscitation and stabilizing the sick newborn, normal examination, the baby with hypoxic-ischemic encephalopathy, recognition of seizures and practical procedures. Neonatology at a Glance: • Provides up to date coverage of the important conditions you will encounter • Covers challenging topics including pain, ethical issues, quality improvement, evidence based medicine and palliative care • Features new sections on fetal medicine, respiratory support, therapeutic hypothermia, amplified EEG and perinatal neuroimaging • Integrates invaluable details about practical procedures including neonatal resuscitation and transport • Supplemented by video materials and artwork which can be viewed via the companion website at www.ataglanceseries.com/neonatology Neonatology at a Glance is the perfect guide for all health professionals looking after newborn infants, including pediatric trainees, medical students, neonatal nurse practitioners and neonatal nurses, therapists and midwives. For neonatologists, pediatricians and nurse tutors it is a valuable resource to assist with teaching.

Death in the Nursery Jan 04 2022

Current Concepts in Neonatal Intensive Care Jul 30 2021

Parent-Baby Attachment in Premature Infants (Psychology Revivals) Sep 11 2022 Originally published in 1983, in the two decades prior to publication, specialised neonatal units for the treatment of sick or preterm babies had been set up in most major neonatal centres. In the early years these units did little to prevent separation of parents and babies and evidence accumulated of the ill effects of this situation. In addition, we had gradually become aware of the difficulties of building a relationship with a sick or immature baby even under more ideal circumstances. This book, in a series of authoritative review chapters, sets out to describe the process by which social relationships develop after birth and the ways in which this process may be distorted by separation, the condition of the baby or by the process of medical treatment. Experienced practitioners describe

practical steps which may be taken to support parents and foster their relationship with their babies in treatment situations. The final section of the book examines the organisation of neonatal care in a number of widely different settings and indicates that diverse approaches may be successful in achieving the same ends.

The Problem of Practice Variation in Newborn Medicine Mar 18 2023 Neonatal intensive care unit (NICU) teams in the US and around the world receive performance reports that locate their particular value for selected process and outcome measures within the range of values from all reporting NICUs. Understandably, many providers focus primarily, if not exclusively, on their particular value. When a value appears undesirable, providers often justify it in an apparent reflex response rather than critically analysing their data. Exceedingly few reflect on the width or implications of the range within which their performance lies. Standard medical education does not include these skills, yet unwarranted practice variation necessarily compromises a population's overall quality of care. Researchers report wide variation in health care resource use with little connection to patient outcomes, challenging the belief that directing incrementally more resources at certain healthcare problems necessarily produces better results. This book provides requisite knowledge to enable readers without research expertise to understand the notion of unwarranted practice variation, how to recognize it, its ubiquity, and why it is generally undesirable - why narrowing is pervasiveness improves quality. The book begins by describing practice variation, its prevalence, and why it matters. Next, it examines alternative conceptualizations of NICU work. One view is task-oriented, while the other is aim-oriented. NICU teams rarely articulate their aims explicitly, so this book offers examples that guide thinking and action. Finally, this book asks, "Which rate is 'right'; what is the performance target?" The answer entails identifying the lowest resource use rate associated with desirable outcomes. This requires data describing efficient and predictably performing provision of current evidence-based care, along with relationships to a variety of outcomes. Provider conceptualization of healthcare quality also is often vague. The challenge lies in defining this notion operationally. This book does precisely that and gives readers tools to think critically about process, outcome, and quality measures, via some understanding of systems, risk-adjustment modelling, and discriminating signal from noise in process data.

Cost of Neonatal Intensive Care Feb 14 2023

PCEP Perinatal Continuing Education Program Jul 22 2023 New 2nd edition features step-by-step skill instruction, and practice-focused exercises. Developed by a distinguished editorial board, the Perinatal Continuing Education Program (PCEP) is a comprehensive, self-paced education program in four volumes.

Manual of Neonatal Care Mar 30 2024

Cloherty and Stark's Manual of Neonatal Care Dec 27 2023 Concise and easy to read, this popular manual has provided a practical approach to the diagnosis and medical management of problems in the newborn through seven outstanding editions. The Eighth Edition of Cloherty and Stark's Manual of Neonatal Care maintains that tradition of excellence, offering NICU physicians, neonatal-perinatal fellows, residents, and neonatal nurse practitioners quick access to key clinical information, fully updated to reflect recent advances in the field. Written in an easy-access outline format, this extensively revised edition covers current, practical approaches to the evaluation and management of routine and complex conditions encountered in the fetus and the newborn.

Rickham's Neonatal Surgery Aug 11 2022 This book provides a detailed guide to neonatal surgery and its related disciplines including: fetal medicine, fetal surgery, radiology, newborn anaesthesia, intensive care, neonatal medicine, medical genetics, pathology, cardiac surgery, and urology. The book aims to cover all the latest advances in newborn surgery, with contributions from the basic sciences and laboratory research to reflect the steady progress in our current working knowledge and understanding of many neonatal surgical disorders. As huge advances have been

made in neonatal surgery in the past decades, ethical issues, long term outcomes, and quality of life are also emphasised. This book is an authoritative reference for surgical residents in training, consultant surgeons, general surgeons with an interest in paediatric surgery, neonatologists, paediatricians, intensive care specialists, and nursing staff.

Textbook of Neonatal Resuscitation Dec 03 2021 CD includes: full text plus dramatic footage of actual resuscitation events, laryngoscopic view of the airway, digitized animation, review questions, and learner-directed interactive video scenarios.

Current Advances in Neonatal Care, An Issue of Pediatric Clinics of North America May 20 2023 In collaboration with Consulting Editor, Dr. Bonita Stanton, Drs. Beena Sood and Dara Brodsky have assembled expert authors to bring current information to pediatricians on the topic of Current Advances in Neonatal Care. The focus of the issue spans the full continuum of care, including articles on prenatal care, care in the delivery room, nursery, and post-discharge. Articles are specifically devoted to the following topics: Prenatal Genetic Testing Options; Current Intrauterine Surgery Options; Recent Changes in Neonatal Resuscitation (include LMA); Current Recommendations of Sepsis Evaluation in the Newborn; Hypoglycemia in the Newborn; Maternal Thyroid Disease and Impact on Newborn; Current Approach to Neonatal Abstinence Syndrome; The Current State of State Newborn Screening; Late Preterm Infant: Known risks and monitoring recommendations; Intrauterine Growth Restriction: Postnatal Monitoring and Outcomes; Hearing Risks in Preterm Infants: Who is at risk and how to monitor?; Management Options for Hemangiomas in the Neonate; GERD in the Newborn: Who needs to be treated and what approach is beneficial?; Outpatient Management of NICU Graduate; and Neurodevelopmental Outcome of Premature Infants. Readers will come away with the most current information they need to improve patient outcomes with evidentiary support.

NEONATAL CARE Jun 08 2022

Neonatal Bioethics Apr 30 2024 Neonatal intensive care has been one of the most morally controversial areas of medicine during the past thirty years. This study examines the interconnected development of four key aspects of neonatal intensive care: medical advances, ethical analysis, legal scrutiny, and econometric evaluation. The authors assert that a dramatic shift in societal attitudes toward newborns and their medical care was a stimulus for and then a result of developments in the medical care of newborns. They divide their analysis into three eras of neonatal intensive care. The first, characterized by the rapid advance of medical technology from the late 1960s to the Baby Doe case of 1982, established neonatal care as a legitimate specialty of medical care, separate from the rest of pediatrics and medicine. During this era, legal scholars and moral philosophers debated the relative importance of parental autonomy, clinical prognosis, and children's rights. The second era, beginning with the Baby Doe case (a legal battle that spurred legislation mandating that infants with debilitating birth defects be treated unless the attending physician deems efforts to prolong life "futile"), stimulated efforts to establish a consistent federal standard on neonatal care decisions and raised important moral questions concerning the meaning of "futility" and of "inhumane" treatment. In the third era, a consistent set of decision-making criteria and policies was established. These policies were the result of the synergy and harmonization of newly agreed upon ethical principles and newly discovered epidemiological characteristics of neonatal care. Tracing the field's recent history, notable advances, and considerable challenges yet to be faced, the authors present neonatal bioethics as a paradigm of complex conversation among physicians, philosophers, policy makers, judges, and legislators which has led to responsible societal oversight of a controversial medical innovation.

Neonatal Intensive Care Nursing Dec 15 2022 Thoroughly revised and updated, this new edition of Neonatal Intensive Care Nursing is a comprehensive, evidence-based text for nurses and allied health professionals caring for sick newborn infants. This user-friendly text focuses on the common problems and related care occurring within the neonatal specialty. All previous chapters have been thoroughly updated and new content

includes chapters on, for example, organisation of neonatal care, assessment of the neonate, the premature and low birth weight neonate as well as palliative care. In addition, the book now includes a broad and in-depth web-based companion comprising online resources, case studies with answer guides and learning activities. This accessible and interactive approach enables nurses to recognise, rationalise and understand clinical problems using an evidence-based approach. Divided into four parts, the book provides an overview of neonatal care, and a detailed look at the physical and emotional wellbeing of neonate and family, a range of clinical aspects of neonatal care, and key practices and procedures. Neonatal Intensive Care Nursing will be essential reading for both new and experienced nurses, allied health professionals and students learning about neonatal care including those undertaking qualifications in the neonatal specialism and pre-registration students taking relevant modules or placements.

The Ethics of Perinatal and Neonatal Care May 27 2021

Pcep Book Ii Nov 13 2022 Step-by-step skill instruction, and practice-focused exercises. Developed by the University of Virginia and leading perinatal medicine experts, the Perinatal Continuing Education Program (PCEP) is a comprehensive, self-paced education program in four volumes. Now published by the AAP, the PCEP workbooks have been brought up-to-date with leading-edge procedures and techniques. The revised volumes are filled with clear explanations, step-by-step skill instruction, and practice-focused exercises. They offer time-saving, low-cost solutions for self-paced learning or as adjuncts to instructor-led skills training. Testimonial: 5 Star Review! PCEP offers a unique course in perinatal care and there is no comparable published material. The books are easy to read and each section is well organized as a self-contained unit. Doody's Review.

The Lazarus Case Feb 27 2024 In this volume, John Lantos weaves a story that captures the dilemmas of modern medical practice. He draws on his experience in neonatal medicine, paediatrics and medical ethics to explore ethical dilemmas through one poignant representative situation.

PCEP: Specialized newborn care Jun 20 2023 Revision of work developed in 1978 at the University of Virginia under contract from the National Heart, Lung, and Blood Institute.

A Manual of Neonatal Intensive Care Apr 26 2021 Highly Commended, BMA Medical Book Awards 2014The fifth edition of this highly successful and well-regarded book continues to provide those working in neonatal intensive care units with precise instructions on the diagnosis and management of common neonatal problems. This edition has been extensively updated and revised, while retaining the backgro

50 Studies Every Neonatologist Should Know Nov 01 2021 50 Studies Every Neonatologist Should Know presents a selection of seminal trials in neonatology, including both cornerstones of practice and frontiers in trial design. The included trials cover a broad range of care topics in neonatology, as well as important learning points in a number of dimensions. The text explores each trial in a dedicated chapter, with a concise summary of methods and results, accompanied by a brief discussion of special considerations, including risks of bias, interpretation, and implications for practice. Additionally, there is a short interview with the trialist (or an editorial commentary) at the end of each chapter, to give a flavor of the ongoing conversation after trial publication. As with all books in the "50 Studies" series, each study was selected using an objective selection criterion that included citations per year, high levels of evidence, clinical studies and trials, and a 3-stage Delphi review by international experts in the field. It is a must-read for neonatologists, trainees, or anyone involved in neonatal care or trial design.

Patrick Bouvier Kennedy Oct 25 2023 On August 9, 1963, the infant son of John and Jacqueline Kennedy, born premature at 34 weeks, died of a common lung ailment after 39 hours of life. This book tells, for the very first time, the entire story of those tense and desperate days from the viewpoint of Patrick's pediatrician and the team of doctors who tried to save him. It also chronicles the captivating history of newborn care and the way the death of the Kennedy baby, faced by his heartbroken parents with consummate courage and grace, triggered a worldwide medical response that ultimately led to major advances in newborn care that have saved the lives of millions of infants. Book jacket.

Psychological Care of Infant and Child Feb 22 2021

PCEP Neonatal Care (Book III) Jan 16 2023 Developed by a distinguished editorial board, the Perinatal Continuing Education Program (PCEP) is a comprehensive, self-paced education program in four volumes. The PCEP workbooks have been significantly revised and brought up-to-date with leading-edge procedures and techniques. The revised volumes are filled with clear explanations, step-by-step skill instruction, and practice-focused exercises. They offer time-saving, low-cost solutions for self-paced learning or as adjuncts to instructor-led skills training. The new Book III 2nd edition features 10 units covering information and skills for assessment and initial management of frequently encountered neonatal illnesses, plus the comprehensive unit Review: Is the Baby Sick?, which ties all neonatal therapies and skills together for management of sick and at-risk newborns. In addition, Preparation for Neonatal Transport presents care for the newborn and for the baby's family.

Manual of Neonatal Care Jul 02 2024 This edition of the Manual of Neonatal Care has been completely updated and extensively revised to reflect the changes in fetal, perinatal, and neonatal care that have occurred since the sixth edition. This portable text covers current and practical approaches to evaluation and management of conditions encountered in the fetus and the newborn, as practiced in high volume clinical services that include contemporary prenatal and postnatal care of infants with routine, as well as complex medical and surgical problems. Written by expert authors from the Harvard Program in Neonatology and other major neonatology programs across the United States, the manual's outline format gives readers rapid access to large amounts of valuable information quickly. The Children's Hospital Boston Neonatology Program at Harvard has grown to include 57 attending neonatologists and 18 fellows who care for more than 28,000 newborns delivered annually. The book also includes the popular appendices on topics such as common NICU medication guidelines, the effects of maternal drugs on the fetus, and the use of maternal medications during lactation. Plus, there are intubation/sedation guidelines and a guide to neonatal resuscitation on the inside covers that provide crucial information in a quick and easy format.

Certification and Core Review for Neonatal Intensive Care Nursing - E-Book Jun 28 2021 The only exam review for the two leading neonatal critical-care nursing certification examinations, Certification and Core Review for Neonatal Intensive Care Nursing, 4th Edition prepares you for your exam with realistic questions and test simulation. Based on the blueprints of the AACN's CCRN-Neonatal exam and the NCC's Neonatal Intensive Care Nursing (RNC-NIC) exam, review questions cover the information in Core Curriculum for Neonatal Intensive Care Nursing, 3rd Edition, and reflect essential knowledge, the latest evidence, and best practices. A total of 600 questions and answers with rationales are provided. Developed by the AACN, AWHONN, and NANN, this powerful review tool offers excellent preparation for your certification exam! This title includes additional digital media when purchased in print format. For this digital book edition, media content is not included. Endorsed by the three most authoritative associations in neonatal intensive care nursing: the American Association of Critical-Care Nurses (AACN); the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN); and the National Association of Neonatal Nurses (NANN). Answers are provided for each question, accompanied by rationales and references, to enhance your understanding of the material. Realistic exam practice is offered through questions that mirror the certification exam content, the multiple-choice question format, and the distribution of content. Online exam simulation, included free with this text, mirrors the test-taking experience with an interactive, timed format. The online dual blueprint organization offers questions organized according to either of the two major certification examinations: the AACN's CCRN-Neonatal exam and the NCC's Neonatal Intensive Care (RNC-NIC) exam. Updated questions reflect the information in Core Curriculum for Neonatal Intensive Care Nursing, 4th Edition, and the latest test plans by both AACN and NCC. Two modes of online study let you choose whether to work through the questions in Study Mode or Examination Simulation. A flexible format in online exams tailors the test plan and question format to the preferred examination, either the AACN or NCC. Complete

remediation includes rationales for both correct and incorrect answers. A compact, portable size makes the book easier to study anytime, anywhere.

Textbook of Neonatal Resuscitation Feb 02 2022

Klaus and Fanaroff's Care of the High-Risk Neonate E-Book Apr 06 2022 Stay up to date with recent advances in the NICU with Klaus and Fanaroff's Care of the High-Risk Neonate, 6th Edition. This trusted neonatology reference thoroughly covers the new guidelines, equipment, drugs, and treatments that have greatly increased the chance of survival for high-risk infants. Expert contributors deliver the information you need to stay on top of the technological and medical advances in this challenging field. Consult this title on your favorite e-reader with intuitive search tools and adjustable font sizes. Elsevier eBooks provide instant portable access to your entire library, no matter what device you're using or where you're located. Benefit from the expert advice offered in concise, easy-to-read editorial comments throughout the book. Assess your knowledge with comprehensive question-and-answer sections at the end of each chapter. Understand the clinical relevance of what you've learned with case studies that highlight real-world application. Own the reference trusted for nearly 40 years by those who care for at-risk neonates in the dynamic and challenging NICU. Get fast access to need-to-know information on drugs used in the NICU, normal values, and much more in the fully updated appendices. Keep your knowledge up to date with expanded coverage of evidence-based medicine and the role of networks in generating evidence. Stay current with all aspects of neonatal care, including resuscitation, transport, nutrition, respiratory problems and assisted ventilation, and organ-specific care.

Neonatal Nursing Jul 10 2022 There are many books on the care of the sick infant and some are excellent. Most, however, are written with medicine in mind. This book is written mainly by experienced neonatal nurses, although some chapters have been written by the appropriate specialists. It is intended primarily for nurses who look after sick infants and is not intended to be an exhaustive reference but to address some of the issues and concepts of neonatal care in the 1990s. Nursing models are an important part of neonatal care in the 1990s but this book has not been written within this framework. There are several reasons for this: arguably no current model is ideally suited to neonates and the favouring of one particular model might restrict the book's applicability. Also, as contributors from other disciplines were invited to contribute we were anxious that these chapters did not stand out as oddities. Additionally, much neonatal care overlaps and were a framework to be used in its entirety for each nursing care chapter we felt that there could be some repetition; conversely, if a framework was fragmented in some chapters to cover specific areas of care, we were concerned that the overall effect would have been 'bitty'. We felt that such treatment of nursing models would have been unjustifiable. In this book, the terms 'infant' and 'baby' are used interchangeably and where the term 'he' is used, the term 'she' is equally appropriate.

Manual of Neonatal Care Jun 01 2024 This Spiral® Manual provides a practical approach to the diagnosis and medical management of newborns. Chapters cover maternal, fetal, and neonatal problems and common neonatal procedures. An outline format provides quick access to a large amount of information, and the outline headings are standardized in this edition. The updated coverage includes new information on fetal assessment, survival of premature infants, and perinatal asphyxia and new guidelines on neonatal jaundice. The popular appendices include effects of maternal drugs on the fetus, maternal medications during lactation, and NICU medication guidelines. A neonatal dosing chart and intubation/sedation guidelines appear on the inside covers.

Perinatal Continuing Education Program (PCEP) May 08 2022 Now published by the AAP, the PCEP workbooks have been brought up-to-date with leading-edge procedures and techniques. The volumes are filled with clear explanations, step-by-step skill instruction, and practice-focused exercises. They offer time-saving, low-cost solutions for self-paced learning or as adjuncts to instructor-led skills training. 5 Star Review! "PCEP offers a unique course in perinatal care and there is no comparable published material. The books are easy to read and each section is well organized

as a self-contained unit." Doody's Review Perinatal Continuing Education Program (PCEP) -- Maternal and Fetal Set (2-book set) John Kattwinkel, MD; Lynn J. Cook, RNC, MPH; Hallam Hurt, MD; George A. Nowacek, PhD; Jerry G. Short, PhD; Warren M. Crosby, MD Earn Up To 51 CME credit hours or nursing contact hours! Focusing on care for pregnant women, the Maternal and Fetal Set includes 2 publications: Maternal and Fetal Evaluation and Immediate Newborn Care (Book I) and Maternal and Fetal Care (Book II) Developed by the University of Virginia and leading perinatal medicine experts, the Perinatal Continuing Education Program (PCEP) is a comprehensive, self-paced education program in four volumes. Now published by the AAP, the PCEP workbooks have been brought up-to-date with leading-edge procedures and techniques. The revised volumes are filled with clear explanations, step-by-step skill instruction, and practice-focused exercises. They offer time- saving, low-cost solutions for self-paced learning or as adjuncts to instructor-led skills training. For more information about the Perinatal Continuing Education Program (PCEP) and how to earn continuing education credit, visit www.pcep.org.

Comprehensive Neonatal Care Mar 06 2022 A comprehensive examination of neonatal nursing management from a physiologic and pathophysiologic approach. The book features a complete physiologic and embryonic foundation for each neonatal system as well as coverage of associated risk factors, genetics, critical periods of development, nutrition and parenting.

Manual of Equine Neonatal Medicine Mar 25 2021 An easy-to-use source of information for the veterinarian working on foals in the field, clinic, or critical care. Veterinarians, veterinary students, animal health technicians, and horse owners around the world have relied on the Manual to help them diagnose and treat a neonatal foal. The popular 4th edition has been revised and updated to allow rapid access to needed information.

Neonatal Handbook Nov 25 2023 Handbook for nurses, trainees in neonatology and paediatricians caring for the baby in a non-tertiary institution. Covers routine care of the newborn, management of common disorders and implementation of preventative strategies. Places emphasis on early identification of a problem, institution of appropriate therapy and early transfer to a tertiary referral hospital where necessary. Foreword by William Tarnow-Mordi, Professor of Neonatal Medicine at the University of Sydney. Author is Emeritus Consultant at Westmead Hospital.

Clinical Decision Making in Neonatal Intensive Care Sep 23 2023

PCEP Aug 23 2023 Now published by the AAP, the PCEP workbooks have been brought up-to-date with leading-edge procedures and techniques. The revised volumes are filled with clear explanations, step-by-step skill instruction, and practice-focused exercises.
