Logical thinking: challenges that must be solved with logic, making inferences

until finding the solution or, sometimes, eliminating the other alternatives. Mathematical knowledge: it will be necessary to know mathematical (and sometimes physical) principles to solve certain puzzles. Paper and pencil: challenges in which drawing schemes is necessary to reach the solution of certain mental games (although the most daring will continue to solve them in the head only). Spatial vision: challenges in which one must be able to imagine figures that are intertwined in two or three dimensions. This is a unique brain teaser book where coding solution of each is also provided.
