Free Speech and the Regulation of Social Media Content Valerie C. Brannon,2019-04-03 As the Supreme Court has recognized social media sites like Facebook and Twitter have become important venues for users to exercise free speech rights protected under the First Amendment Commentators and legislators however have questioned whether these social media platforms are living up to their reputation as digital public forums Some have expressed concern that these sites are not doing enough to counter violent or false speech At the same time many argue that the platforms are unfairly banning and restricting access to potentially valuable speech Currently federal law does not offer much recourse for social media users who seek to challenge a social media provider s decision about whether and how to present a user s content Lawsuits predicated on these sites decisions to host or remove content have been largely unsuccessful facing at least two significant barriers under existing federal law First while individuals have sometimes alleged that these companies violated their free speech rights by discriminating against users content courts have held that the First Amendment which provides protection against state action is not implicated by the actions of these private companies Second courts have concluded that many non constitutional claims are barred by Section 230 of the Communications Decency Act 47 U S C 230 which provides immunity to providers of interactive computer services including social media providers both for certain decisions to host content created by others and for actions taken voluntarily and in good faith to restrict access to objectionable material Some have argued that Congress should step in to regulate social media sites Government action regulating internet content would constitute state action that may implicate the First Amendment In particular social media providers may argue that government regulations impermissibly infringe on the providers own constitutional free speech rights Legal commentators have argued that when social media platforms decide whether and how to post users content these publication decisions are themselves protected under the First Amendment There are few court decisions evaluating whether a social media site by virtue of publishing organizing or even editing protected speech is itself exercising free speech rights Consequently commentators have largely analyzed the question of whether the First Amendment protects a social media site s publication decisions by analogy to other types of First Amendment cases There are at least three possible frameworks for analyzing governmental restrictions on social media sites ability to moderate user content Which of these three frameworks applies will depend largely on the particular action being regulated Under existing law social media platforms may be more likely to receive First Amendment protection when they exercise more editorial discretion in presenting user generated content rather than if they neutrally transmit all such content In addition certain types of speech receive less protection under the First Amendment Courts may be more likely to uphold regulations targeting certain disfavored categories of speech such as obscenity or speech inciting violence Finally if a law targets a social media site s conduct rather than speech it may not trigger the protections of the First Amendment at all

Emergency Care for Children Institute of Medicine, Board on Health Care Services, Committee on the Future of Emergency Care in the United States Health System, 2007-05-08 Children represent a special challenge for emergency care providers because they have unique medical needs in comparison to adults. For decades policy makers and providers have recognized the special needs of children but the system has been slow to develop an adequate response to their needs. This is in part due to inadequacies within the broader emergency care system. *Emergency Care for Children* examines the challenges associated with the provision of emergency services to children and families and evaluates progress since the publication of the Institute of Medicine report *Emergency Medical Services for Children* 1993 the first comprehensive look at pediatric emergency care in the United States. This new book offers an analysis of the role of pediatric emergency services as an integrated component of the overall health system. System wide pediatric emergency care planning preparedness coordination and funding. Pediatric training in professional education. Research in pediatric emergency care. *Emergency Care for Children* is one of three books in the *Future of Emergency Care* series. This book will be of particular interest to emergency health care providers professional organizations and policy makers looking to address the pediatric deficiencies within their emergency care systems.
