M. Barrie) The Adventures of Huckleberry Finn (Mark Twain) The Call of the Wild (Jack London) Moby-Dick (Herman Melville) Little Women (Louisa May Alcott) Walden (Henry David Thoreau) Leaves of Grass (Walt Whitman) The Raven (Edgar Allan Poe) Anne of Green Gables (L. M. Montgomery) Iliad & Odyssey (Homer) The Republic (Plato) Faust, a Tragedy (Johann Wolfgang von Goethe) Siddhartha (Herman Hesse) Thus Spoke Zarathustra (Friedrich Nietzsche) 20,000 Leagues Under the Sea (Jules Verne) Journey to the Centre of the Earth (Jules Verne) Les Misérables (Victor Hugo) The Hunchback of Notre Dame (Victor Hugo) The Flowers of Evil (Charles Baudelaire) The Count of Monte Cristo (Alexandre Dumas) A Doll's House (Henrik Ibsen) Anna Karenina (Leo Tolstoy) War and Peace (Leo Tolstoy) Crime and Punishment (Fyodor Dostoevsky) The Brothers Karamazov (Fyodor Dostoyevsky) Dead Souls (Nikolai Gogol) Don Quixote (Miguel de Cervantes) Dona Perfecta (Benito Pérez Galdós) The Life of Lazarillo de Tormes (Anonymous) Life is a Dream (Pedro Calderon de la Barca) The Divine Comedy (Dante) Decameron (Giovanni Boccaccio) The Prince (Machiavelli) Arabian Nights Gitanjali (Rabindranath Tagore) The Poison Tree (Bankim Chandra Chatterjee) Shakuntala (Kalidasa) Rámáyana of Válmíkí (Válmíkí) Tao Te Ching (Laozi) Art of War (Sun Tzu) The Analects of Confucius (Confucius) Hung Lou Meng or, The Dream of the Red Chamber (Cao Xueqin) Two Years in the Forbidden City (Princess Der Ling) Bushido, the Soul of Japan (Inazo Nitobé) The Book of Tea (Kakuzo Okakura) Botchan (Soseki Natsume)...

The Sustainable Tall Building Aug 12 2023 The Sustainable Tall Building: A Design Primer is an accessible and highly illustrated guide, which primes those involved in the design and research of tall buildings to dramatically improve their performance. Using a mixture of original research and analysis, best-practice design thinking and a detailed look at exemplar case studies, author Philip Oldfield takes the reader through the architectural ideas, engineering strategies and cutting-edge technologies that are available to the tall building design team. The book takes a global perspective, examining high-rise design in different climates, cultures and contexts. It considers common functions such as high-rise housing and offices, to more radical designs such as vertical farming and vertical cemeteries. Innovation is provided by examining not only the environmental performance of tall buildings but also their social sustainability, guiding the reader through strategies to create successful communities at height. The book starts by critically appraising the sustainability of tall building architecture past and present, before demonstrating innovative ways for future tall buildings to be designed. These include themes such as climatically responsive architecture, siting a tall building in the city, zero-carbon towers, skygardens and community spaces at height, sustainable structural systems and novel façades. In doing so, the book provides essential reading for architects, engineers, consultants, developers, researchers and students engaged with sustainable design and high-rise architecture.

Political Philosophy and the Republican Future Jun 29 2022 Are we moving inevitably into an irreversible era of postnationalism and globalism? In Political Philosophy and the Republican Future, Gregory Bruce Smith asks, if participation in self-government is not central to citizens' vision of the political good, is despotism inevitable? Smith's study evolves around reconciling the early republican tradition in Greece and Rome as set out by authors such as Aristotle and Cicero, and a more recent tradition shaped by thinkers such as Machiavelli, Locke, Montesquieu, Adam Smith, Madison, and Rousseau. Gregory Smith adds a further layer of complexity by analyzing how the republican and the larger philosophical tradition have been called into question by the critiques of Nietzsche, Heidegger, and their various followers. For Smith, the republican future rests on the future of the tradition of political

philosophy. In this book he explores the nature of political philosophy and the assumptions under which that tradition can be an ongoing tradition rather than one that is finished. He concludes that political philosophy must recover its phenomenological roots and attempt to transcend the self-legislating constructivism of modern philosophy. Forgetting our past traditions, he asserts, will only lead to despotism, the true enemy of all permutations of republicanism. Cicero's thought is presented as a classic example of the phenomenological approach to political philosophy. A return to the architectonic understanding of political philosophy exemplified by Cicero is, Smith argues, the key to the republican future.

Office 2019 All-in-One For Dummies Feb 23 2022 One book that does the work of nine Knowing your way around Microsoft Office requires you to be part mathematician, part storyteller, and part graphic designer—with some scheduling wizard and database architect sprinkled in. So what do you do if these talents don't come naturally to you? Fear not! Office 2019 All-in-One For Dummies fills in the gaps and helps you create easy-to-read Word documents, smash numbers in Excel, tell your tale with PowerPoint, and keep it all organized with Outlook. With additional books covering Access, OneNote, and common Office tasks, this is the only Office book you need on your shelf. Get insight into tools common to all Office applications Find full coverage of Word, Excel, PowerPoint, Outlook, and Access Benefit from updated information based on the newest software release Discover the tricks Office pros use to enhance efficiency If you need to make sense of Office 2019 and don't have time to waste, this is the all-in-one reference you'll want to keep close by!

Reinforced Concrete Design of Tall Buildings Apr 15 2021 An exploration of the world of concrete as it applies to the construction of buildings, Reinforced Concrete Design of Tall Buildings provides a practical perspective on all aspects of reinforced concrete used in the design of structures, with particular focus on tall and ultra-tall buildings. Written by Dr. Bungale S. Taranath, this work explains t

Dan Carter: The Autobiography of an All Blacks Legend Jul 11 2023 Dan Carter's last game as an All Black culminated with him declared Man of the Match following the 2015 Rugby World Cup final at Twickenham - an unforgettable ending to the career of the greatest fly-half of all time. But along with the triumphs of his signature World Cup win, his performance against the Lions in 2005, and an unprecedented run of Bledisloe Cup successes, there was also the pain and doubt he felt during a prolonged period of injury and rehab following the 2011 World Cup. He watched that victory from the sidelines, as he had the All Blacks' defeats in two previous tournaments. Indeed, heading into the 2015 World Cup he had never finished the competition on his own terms. His autobiography tells of that redemption, and gets you up close and personal with one of the most celebrated sportsmen of our time. Threaded throughout the book is an intimate diary of his final year as a Crusader and All Black, during which he worked tirelessly to make one last run at that elusive goal: a World Cup victory achieved on the field. Dan Carter's autobiography is essential reading for all sports fans.

Bohemians, Bootleggers, Flappers, and Swells Sep 01 2022 Offering readers an inebriating swig from the great cocktail shaker of the Roaring Twenties—the Jazz Age, the age of Gatsby—Bohemians, Bootleggers, Flappers, and Swells showcases unforgettable writers in search of how to live well in a changing era. Vanity Fair editor Graydon Carter introduces these fabulous pieces written between 1913 and 1936, when the magazine published a Murderers' Row of the world's leading literary lights, including: F. Scott Fitzgerald on what a magazine should be Clarence Darrow on equality e. e. cummings on Calvin Coolidge D. H. Lawrence on women Djuna Barnes on James Joyce John Maynard Keynes on the collapse in money value Dorothy Parker on a host of topics, from why she hates actresses to why she hasn't married

Government Guarantee of Loans to Certain Air Carriers Feb 11 2021

British Design Nov 03 2022 British Design brings together leading international scholars, designers and journalists to provide new perspectives on British design in the last sixty years, and how it at once looked back to the past with the continuation of traditions that spoke to Britain's design heritage, and looked forwards with the embrace of modernist and postmodernist style. The book responds to and develops new ways of understanding the recent history of design in Britain, with case studies on designed spaces and objects, including domestic interiors, retail spaces, schools and university buildings and transport. The contributors address significant moments and phenomena in the historical and social history of British design, from the rise and fall of the English Country House style and the Brutalist architectural boom of the 1960s to the modern shopping space, and consider the work of key contemporary designers ranging from Tommy Roberts to Thomas Heatherwick. British Design provides new criticism and analysis on how design, from the immediate post-war period to the present day, has developed and changed how we live and how we interact with the spaces in which we live. British Design is split into 13 chapters and is richly illustrated with 65 images, 16 of which are in full colour.

Fire Safety Design for Tall Buildings Nov 15 2023 Fire Safety Design for Tall Buildings provides structural engineers, architects, and students with a systematic introduction to fire safety design for tall buildings based on current analysis methods, design guidelines, and codes. It covers almost all aspects of fire safety design that an engineer or an architect might encounter—such as performance-based design and the basic principles of fire development and heat transfer. It also sets out an effective way of preventing the progressive collapse of a building in fire, and it demonstrates 3D modeling techniques to perform structural fire analysis with examples that replicate real fire incidents such as the Twin Towers and WTC7. This helps readers to understand the

design of structures and analyze their behavior in fire.

Worthies of All Souls May 21 2024

The Environmental Performance of Tall Buildings Oct 14 2023 Tall buildings represent one of the most energy-intensive architectural typologies, while at the same time offering the high density work and living conditions that many believe will be an important constituent of future sustainable communities. How, then, can their environmental impact be lessened? This insightful book takes in: an overview of the tall building and its impacts (looking at cityscape, place, mobility, microclimate, energy and economics) design principles and the development of the sustainable tall building global perspectives (covering North and South America, Europe, the Middle East and Asia) detailed, qualitative case studies of buildings in design and operation the future for sustainable tall buildings. Not simply another showcase for future utopian designs and ideals, the information presented here is based on hard research from operating buildings. Highly illustrated and combining analysis with solid detail for practice, this is essential reading for architects, building engineers, design consultants, retrofitters and urban planners interested in or working with tall buildings, and researchers/students in these disciplines.

Microsoft Office Home and Student Edition 2013 All-in-One For Dummies Jun 17 2021 The go-to reference for the new Office Home & Student 2013 The Home & Student version of Microsoft Office targets the home and education markets, covering the four applications most used outside the workplace: Word, Excel, PowerPoint, and OneNote. The minibooks in this essential All-in-One guide include real-world examples and projects that cover the new features and capabilities of Office 2013. Straightforward advice and beneficial projects help you to learn the basics of creating a resume in Word, establishing a home budget in Excel, developing a dynamic school presentation with PowerPoint, and taking notes in OneNote. Targets home and school users of Office 2013, who primarily use Word, Excel, PowerPoint, and OneNote Walks you through how to use Office 2013 for everyday projects, such as creating a cover letter in Word or reusable templates in Excel Demonstrates how to jazz up a school presentation with PowerPoint Provides you with straightforward instructions for taking notes in OneNote Shares common Office 2010 tools and details the basics of the Office ribbon Office Home & Student 2013 All-in-One For Dummies is an easy-to-understand guide to the essentials of Office 2013!

What Is the Present? Jun 10 2023 A provocative new look at concepts of the present, their connection to ideas about time, and their effect on literature, art, and culture The problem of the present—what it is and what it means—is one that has vexed generations of thinkers and artists. Because modernity places so much value on the present, many critics argue that people today spend far too much time in the here and now—but how can we tell without first knowing what the here and now actually is? What Is the Present? takes a provocative new look at this moment in time that remains a mystery even though it is always with us. Michael North tackles puzzles that have preoccupied philosophy, neuroscience, psychology, history, and aesthetic theory and examines the complex role of the present in painting, fiction, and film. He engages with a range of thinkers, from Aristotle and Augustine to William James and Henri Bergson. He draws illuminating examples from artists such as Fra Angelico and Richard McGuire, filmmakers like D. W. Griffith and Christopher Nolan, and novelists such as Elizabeth Bowen and Willa Cather. North offers a critical analysis of previous models of the present, from the experiential present to the historical period we call the contemporary. He argues that the present is not a cosmological or experiential fact but a metaphor, a figurative relationship with the whole of time. Presenting an entirely new conception of the temporal mystery Georg Lukács called the "unexplained instant," What Is the Present? explores how the arts have traditionally represented the present—and also how artists have offered radical alternatives to that tradition.

The Tall Buildings Reference Book Dec 16 2023 As the ever-changing skylines of cities all over the world show, tall buildings are an increasingly important solution to accommodating growth more sustainably in today's urban areas. Whether it is residential, a workplace or mixed use, the tower is both a statement of intent and the defining image for the new global city. The Tall Buildings

Reference Book addresses all the issues of building tall, from the procurement stage through the design and construction process to new technologies and the building 's contribution to the urban habitat. A case study section highlights the latest, the most innovative, the greenest and the most inspirational tall buildings being constructed today. A team of over fifty experts in all aspects of building tall have contributed to the making of the Tall Buildings Reference Book, creating an unparalleled source of information and inspiration for architects, engineers and developers.

All-American Girl Jul 31 2022 Our image of nineteenth-century American women is generally divided into two broad classifications: victims and revolutionaries. This divide has served the purposes of modern feminists well, allowing them to claim feminism as the only viable role model for women of the nineteenth century. In All-American Girl, however, Frances B. Cogan identifies amid these extremes a third ideal of femininity: the " Real Woman. " Cogan's Real Woman exists in advice books and manuals, as well as in magazine short stories whose characters did not dedicate their lives to passivity or demand the vote. Appearing in the popular reading of middle-class America from 1842 to 1880, these women embodied qualities that neither the " True Women " —conventional ladies of leisure—nor the early feminists fully advocated, such as intelligence, physical fitness, self sufficiency, economic self-reliance, judicious marriage, and a balance between self and family. Cogan's All-American Girl reveals a system of feminine values that demanded women be neither idle nor militant.

Structures & Architecture May 17 2021 Although Architecture and Structural Engineering have both had their own historical development, their interaction has led to many fascinating and delightful structures over time. To bring this interaction to a higher level, there is the need to stimulate the inventive and creative design of architectural structures and to persuade architects and s

In Defense of Japan Apr 20 2024 In Defense of Japan provides the first complete, up-to-date, English-language account of the history, politics, and policy of Japan's strategic space development. The dual-use nature of space technologies, meaning that they cut across both market and military applications, has had two important consequences for Japan. First, Japan has developed space technologies for the market in its civilian space program that have yet to be commercially competitive. Second, faced with rising geopolitical uncertainties and in the interest of their own economics, the makers of such technologies have been critical players in the shift from the market to the military in Japan's space capabilities and policy. This book shows how the sum total of market-to-military moves across space launch vehicles, satellites and spacecraft, and emerging related technologies, already mark Japan as an advanced military space power.

Post45 Vs. The World: Literary Perspectives on the Global Contemporary Mar 07 2023 Much of the work done on the Post45 literary field carries an implicitly Americanist perspective. Even the name of the field suggests a certain literary history, with certain assumptions and blind spots about national spaces, identities, and histories. But what would Post45 look like when considered from outside of the United States? How do the current contours of the field exclude certain voices, either in the United States or elsewhere in the world? And how would such new perspectives shift the beginning and possible endpoint of that literary period? What new narratives of the contemporary emerge if we begin telling the story in a different year or from a different national or global perspective? This collection attempts to re-frame the discussions in Post45 by engaging with non-American writers, texts, and perspectives. Additionally, productive conversations emerge by attempting to think of canonical American writers like Mark Twain and Ishmael Reed from other national and global perspectives. The authors consider both the ways texts themselves as well as their reception histories approach and challenge our understandings of the contemporary. Ultimately, the collection interrogates prevailing narratives of history, culture, identity, and space within the Post45 field. In so doing, it re-considers the historical periodization of the field, which currently covers approximately 75 years of literary history. The resulting essays thus work towards a new intertwined narrative about what defines the contemporary and how national and global literatures fit into that moment of world history.

Norfolk and Western Magazine Sep 13 2023

Hearings Mar 15 2021

Women in Asia Jan 25 2022 Women in Asia: Tradition, Modernity and Globalisation surveys the transformation in the status of women since 1970 in a diverse range of nations: Malaysia, China, Indonesia, Singapore, the Philippines, India, Taiwan, Vietnam, Hong Kong, Korea, Japan and Burma. Within these 13 national case studies the book presents new arguments about being women, being Asian and being modern in contemporary Asia. Recent social changes in women's place in society are untangled in recognition that not all change is 'progress' and that not all 'modernity' enhances women's status. The authors suggest that the improvements in women's status within the Asian region vary dramatically according to the manner in which women interact with the particular economic and ideological forces in each nation. Each contributor has focussed on a particular country in their area of expertise. They present innovative arguments relating to the problem of 'being women' in Asia during a period of dramatic social and political changes. Each national case study explores key social and economic markers of women's status such as employment rates, wage differentials, literacy rates and participation in politics or business. The effects of population control programs, legislation on domestic violence and female infanticide, and women's role in the family and the workforce are also

discussed. The book poses questions as to how women have negotiated these shifts and in the process created a 'modern' Asian woman. Specialists from a variety of disciplines including history, anthropology, sociology, demography, gender studies and psychology grapple with the complexities and ambivalences presented by the multiple faces of the modern Asian woman. Complete with a list of recommended readings and a web-site with links to electronic resources, the book will be of particular interest to undergraduate students of Asian studies and women's studies as well as scholars and postgraduate students interested in comparative women's studies.

**Office 365 All-in-One For Dummies** Mar 27 2022 The deepest reference on Microsoft 's productivity service Office 365 offers the same productivity power as past versions of Microsoft Office along with tools designed to boost collaboration in the workplace and instant access to the latest Office updates without buying a whole new software package. It 's an ideal solution for both the office and home use. The author of the bestselling Office All-in-One For Dummies shares his advice on how to navigate the nuts and bolts of getting things done with Office 365. Look inside for step-by-step instructions on Excel, Outlook, Word, PowerPoint, Access, and OneNote along with a dive into the cloud services that come with Office 365. Access Office 365 Make sense of common Office tasks Use Excel, Word, outlook, PowerPoint and more Take advantage of 365 online services If you 're a home or business user interested in having a complete reference on the suite, this book has you covered.

**Office 2010 All-in-One For Dummies** Apr 27 2022 The leading book on Microsoft Office, now fully updated for Office 2010 Microsoft Office, the world's leading productivity suite, has been updated with new tools. Veteran Office users as well as newcomers will need the comprehensive information in this bestselling All-in-One guide. With a self-contained minibook devoted to each Office application plus minibooks on how Office works together and how you can expand its usefulness, Office 2010 All-in-One For Dummies gets you up to speed and answers the questions you'll have down the road. Microsoft Office is the office productivity suite used around the globe; nearly every business worker encounters it daily The 2010 revision will affect all applications in the suite Eight minibooks cover Word, Excel, PowerPoint, Outlook, Access, Publisher, common Office tools, and ways to expand Office productivity Also covers the new online versions of Word, Excel, and PowerPoint as well as changes to the interface and new tools and techniques Office 2010 All-in-One For Dummies makes it easy to learn to use Office and gets you up and running on all the changes and enhancements in Office 2010.

You 'll benefit from instructions for creating a resume in Word, establishing a home budget in Excel, jazzing up a school presentation with PowerPoint, and taking notes in OneNote. Targets home and school users of Office 2010, who primarily need and use Word, Excel, PowerPoint, and OneNote Demonstrates common, everyday projects, such as creating a cover letter in Word and creating reusable templates in Excel Walks you through spiffing up a school presentation with PowerPoint Offers straightforward instructions for taking notes in OneNote Reviews common Office 2010 tools and details the basics of the Office ribbon Office Home & Student 2010 All-in-One For Dummies is your fun and friendly guide to the essentials of Office 2010!

**The Victoria History of the County of Surrey** Jul 19 2021

**Understanding Tall Buildings** Aug 20 2021 In recent years, the rapid pace of tall building construction has fostered a certain kind of placelessness, with many new tall buildings being built out of scale, context and place. By analyzing hundreds of tall buildings and by providing hundreds of visuals that inspire, stimulate and engage, Understanding Tall Buildings contends that well-designed tall buildings can rejuvenate cities, ignite economic activity, support social life and boost city pride. Although this book does not claim to possess all the solutions, it does propose specific tall building design guidelines that may help to promote placemaking. Through this work, it is the author 's hope that ill-conceived developments will become less common in the future and that good placemaking will become the norm, not the exception. This book is a must-read for students and practitioners working to create better tall buildings and better urban environments.
