*Child Development* Dec 15 2022 In the topically organized *Child Development: An Active Learning Approach, Fourth Edition*, authors Laura E. Levine and Joyce Munsch take students on an active journey toward understanding children and their development. Active Learning activities integrated throughout the text capture student interest and turn reading into an engaged learning process. Through the authors' active learning philosophy, students are challenged to test their knowledge, confront common misconceptions, relate the material to their own experiences, and participate in real-world activities independently and with children. Because consuming research is equally important in the study of child development, *Journey of Research* features provide both historical context and its links to today's cutting-edge research studies. Students will discover the excitement of studying child development while gaining skills they can use long after course completion. This title is accompanied by a complete teaching and learning package.

**Learning Begins** Oct 13 2022 *Learning Begins*, written by a teacher for teachers, translates current brain research into practical classroom strategies. Because students learn with their brains, it simply makes sense for teachers to explore educational psychology and neuroscience. And yet, information in these fields can be daunting and contradictory. Worse still, few researchers can clearly explain the specific classroom uses of their remarkable discoveries. *Learning Begins* both explains this research and makes it useful for teachers and administrators. Part I investigates the science of working memory: a cognitive capacity essential to all school work. When teachers recognize the many classroom perils that can overwhelm working memory, they can use research-aligned strategies to protect it, and thereby promote student learning. Part II reveals the complexities of student attention. By understanding the three neural sub-processes that create attention, teachers can structure their classrooms and their lessons to help students focus on and understand new material. Written in a lively and approachable voice, based on years of classroom experience and a decade of scientific study, *Learning Begins* makes educational psychology and neuroscience clear and useful in schools and classrooms.

And maybe a drinking problem too. -Because Genesis knows this is all her fault. -Because she wasn’t born looking like Mama. -Because she is too black. Genesis is determined to fix her family, and she’s willing to try anything to do so...even if it means harming herself in the process. The House on Mango Street Jul 30 2021 NATIONAL BESTSELLER • A coming-of-age classic about a young girl growing up in Chicago • Acclaimed by critics, beloved by readers of all ages, taught in schools and universities alike, and translated around the world—from the winner of the 2019 PEN/Nabokov Award for Achievement in International Literature. “Cisneros draws on her rich [Latino] heritage...and seduces with precise, spare prose, creat[ing] unforgettable characters we want to lift off the page. She is not only a gifted writer, but an absolutely essential one.” —The New York Times Book Review The House on Mango Street is one of the most cherished novels of the last fifty years. Readers from all walks of life have fallen for the voice of Esperanza Cordero, growing up in Chicago and inventing for herself who and what she will become. “In English my name means hope,” she says. “In Spanish it means too many letters. It means sadness, it means waiting.” Told in a series of vignettes—sometimes heartbreaking, sometimes joyous—Cisneros’s masterpiece is a classic story of childhood and self-discovery and one of the greatest neighborhood novels of all time. Like Sinclair Lewis’s Main Street or Toni Morrison’s Sula, it makes a world through people and their voices, and it does so in language that is poetic and direct. This gorgeous coming-of-age novel is a celebration of the power of telling one’s story and of being proud of where you’re from.
