The Dance of Change Peter M. Senge, 2014-05-14 Since Peter Senge published his groundbreaking book *The Fifth Discipline* he and his associates have frequently been asked by the business community How do we go beyond the first steps of corporate change How do we sustain momentum They know that companies and organizations cannot thrive today without learning to adapt their attitudes and practices But companies that establish change initiatives discover after initial success that even the most promising efforts to transform or revitalize organizations despite interest resources and compelling business results can fail to sustain themselves over time That is because organizations have complex well developed immune systems aimed at preserving the status quo Now drawing upon new theories about leadership and the long term success of change initiatives and based upon twenty five years of experience building learning organizations the authors of *The Fifth Discipline Fieldbook* show how to accelerate success and avoid the obstacles that can stall momentum *The Dance of Change* written for managers and executives at every level of an organization reveals how business leaders can work together to anticipate the challenges that profound change will ultimately force the organization to face Then in a down to earth and compellingly clear format readers will learn how to build the personal and organizational capabilities needed to meet those challenges These challenges are not imposed from the outside they are the product of assumptions and practices that people take for granted an inherent natural part of the processes of change And they can stop innovation cold unless managers at all levels learn to anticipate them and recognize the hidden rewards in each challenge and the potential to spur further growth Within the frequently encountered challenge of Not Enough Time for example the lack of control over time available for innovation and learning initiatives lies a valuable opportunity to reframe the way people organize their workplaces This book identifies universal challenges that organizations ultimately find themselves confronting including the challenge of Fear and Anxiety the need to diffuse learning across organizational boundaries the ways in which assumptions built in to corporate measurement systems can handcuff learning initiatives and the almost unavoidable misunderstandings between true believers and nonbelievers in a company Filled with individual and team exercises in depth accounts of sustaining learning initiatives by managers and leaders in the field and well tested practical advice *The Dance of Change* provides an insider s perspective on implementing learning and change initiatives at such corporations as British Petroleum Chrysler Dupont Ford General Electric Harley Davidson Hewlett Packard Mitsubishi Electric Royal DutchShell Shell Oil Company Toyota the United States Army and Xerox It offers crucial advice for line level managers executive leaders internal networkers educators and others who are struggling to put change initiatives into practice

Systems Thinking For Social Change David Peter Stroh, 2015-09-24 David Stroh has produced an elegant and cogent guide to what works. Research with early learners is showing that children are natural systems thinkers. This book will help to resuscitate these intuitive capabilities and strengthen them in the fire of facing our toughest problems. Peter Senge, author of *The Fifth Discipline*, provides concrete guidance on how to incorporate systems thinking in problem solving, decision making, and strategic planning for everyone. Donors, leaders of nonprofits, and public policy makers usually have the best of intentions to serve society and improve social conditions. But often their solutions fall far short of what they want to accomplish and what is truly needed. Moreover, the answers they propose and fund often produce the opposite of what they want over time. We end up with temporary shelters that increase homelessness, drug busts that increase drug-related crime, or food aid that increases starvation. How do these unintended consequences come about, and how can we avoid them? By applying conventional thinking to complex social problems, we often perpetuate the very problems we try so hard to solve, but it is possible to think differently and get different results. *Systems Thinking for Social Change* enables readers to contribute more effectively to society by helping them understand what systems thinking is and why it is so important in their work. It also gives concrete guidance on how to incorporate systems thinking in problem solving, decision making, and strategic planning without becoming a technical expert. Systems thinking leader David Stroh walks readers through techniques he has used to help people improve their efforts on complex problems like ending homelessness, improving public health, strengthening education, designing a system for early childhood development, protecting child welfare, developing rural economies, facilitating the reentry of formerly incarcerated people into society, resolving identity-based conflicts, and more. The result is a highly readable, effective guide to understanding systems and using that knowledge to get the results you want.

Presence Peter M. Senge, C. Otto Scharmer, Joseph Jaworski, Betty Sue Flowers, 2008-01-15 *Presence* is an intimate look at the development of a new theory about change and learning. In wide-ranging conversations held over a year and a half, organizational learning pioneers Peter Senge, C. Otto Scharmer, Joseph Jaworski, and Betty Sue Flowers explored the nature of transformational change, how it arises, and the fresh possibilities it offers a world dangerously out of balance. The book introduces the idea of presence, a concept borrowed from the natural world that the whole is entirely present in any of its parts, to the worlds of business, education, government, and leadership. Too often, the authors found, we remain stuck in old patterns of seeing and acting. By encouraging deeper levels of learning, we create an awareness of the larger whole, leading to actions that can help to shape its evolution and our future. Drawing on the wisdom and experience of 150 scientists, social leaders, and entrepreneurs, including Brian Arthur, Rupert Sheldrake, Buckminster Fuller, Lao Tzu, and Carl Jung, *Presence* is both revolutionary in its exploration and hopeful in its message. This astonishing and completely original work goes on to define the capabilities that underlie our ability to see sense and realize new possibilities in ourselves, in our institutions and organizations, and in society itself.

The Necessary Revolution Peter Senge, Bryan Smith, 2011-03-04 This is a timely and groundbreaking book from the bestselling author of The Fifth Discipline series and Presence The Necessary Revolution reveals how corporations and organizations are in the face of looming environmental crises and pressure from social issues finding solutions that ensure both long term survival and real time business success The Necessary Revolution is destined to become the essential handbook for everyone who understands the need to act and work together now to create a sustainable world for ourselves and the generations to come A revolution is underway and spreading fast Organizations everywhere are boldly leading the change from the dead end of business as usual to new strategies and transformative practices that promote a flourishing sustainable world Pragmatic and powerful today s most innovative leaders know that revolutionary not incremental changes in the way we live and work are necessary for their and our survival Brimming with inspiring stories from around the globe and organizations ranging from Alcoa to Oxfam DuPont to GE The Necessary Revolution clearly shows that ordinary people at every level within every organization have the ability and innovative spirit to do extraordinary things By working collaboratively across boundaries they are amplifying their creativity to find unprecedented solutions in an intensely interdependent world The Necessary Revolution contains a wealth of strategies to help anyone regardless of role or title build the confidence and competence to respond effectively to the greatest challenge of our time It is destined to become the essential handbook for everyone who understands the need to act and work together now to create a sustainable world for ourselves and the generations to follow
