Summit develops competence and confidence in all four skills.

Presentation Zen Garr Reynolds, 2009-04-15 FOREWORD BY GUY KAWASAKI Presentation designer and internationally acclaimed communications expert Garr Reynolds, creator of the most popular Web site on presentation design and delivery on the Net, presentationzen.com, shares his experience in a provocative mix of illumination, inspiration, education, and guidance that will change the way you think about making presentations with PowerPoint or Keynote. *Presentation Zen* challenges the conventional wisdom of making slide presentations in today's world and encourages you to think differently and more creatively about the preparation, design, and delivery of your presentations. Garr shares lessons and perspectives that draw upon practical advice from the fields of communication and business. Combining solid principles of design with the tenets of Zen simplicity, this book will help you along the path to simpler, more effective presentations.

Geometry Basics, Grades 5 - 8 Schyrlet Cameron, Carolyn Craig, 2016-01-04 *Geometry Basics* for grades 5 to 8 targets the basic geometry concepts students need to understand and perform operations involved in higher-level math. In this standards-based series, students are given practice with lines, angles, circles, perimeter, area, volume, two-dimensional figures, and three-dimensional figures. Mark Twain Media Publishing Company specializes in providing engaging supplemental books and decorative resources to complement middle and upper-grade classrooms. Designed by leading educators, this product line covers a range of subjects including math, science, language arts, social studies, history, government, fine arts, and character.

Top Notch 2 Workbook Joan Saslow, Allen Ascher, 2015-01-08

The Fearless Organization Amy C. Edmondson, 2018-11-14 Conquer the most essential adaptation to the knowledge economy. The Fearless Organization: Creating Psychological Safety in the Workplace for Learning, Innovation, and Growth offers practical guidance for teams and organizations who are serious about success in the modern economy. With so much riding on innovation, creativity, and spark, it is essential to attract and retain quality talent, but what good does this talent do if no one is able to speak their mind? The traditional culture of fitting in and going along spells doom in the knowledge economy. Success requires a continuous influx of new ideas, new challenges, and critical thought, and the interpersonal climate must not suppress, silence, ridicule, or intimidate. Not every idea is good, and yes, there are stupid questions, and yes, dissent can slow things down, but talking through these things is an essential part of the creative process. People must be allowed to voice half-finished thoughts, ask

questions from left field and brainstorm out loud it creates a culture in which a minor flub or momentary lapse is no big deal and where actual mistakes are owned and corrected and where the next left field idea could be the next big thing This book explores this culture of psychological safety and provides a blueprint for bringing it to life The road is sometimes bumpy but succinct and informative scenario based explanations provide a clear path forward to constant learning and healthy innovation Explore the link between psychological safety and high performance Create a culture where it s safe to express ideas ask questions and admit mistakes Nurture the level of engagement and candor required in today s knowledge economy Follow a step by step framework for establishing psychological safety in your team or organization Shed the yes men approach and step into real performance Fertilize creativity clarify goals achieve accountability redefine leadership and much more The Fearless Organization helps you bring about this most critical transformation *Mine the Gap for Mathematical Understanding, Grades 6-8* John SanGiovanni, Jennifer Rose Novak, 2017-09-12 Being an effective math educator is one part based on the quality of the tasks we give one part how we diagnose what we see and one part what we do with what we find Yet with so many students and big concepts to cover it can be hard to slow down enough to look for those moments when students responses tell us what we need to know about next best steps In this remarkable book John SanGiovanni and Jennifer Rose Novak help us value our students misconceptions and incomplete understandings as much as their correct ones because it s the gap in their understanding today that holds the secrets to planning tomorrow s best teaching The authors lay out 180 high quality tasks aligned to the standards and big ideas of Grades 6 8 mathematics including number systems integers ratio and proportion equations and expressions geometry and statistics and probability The tasks are all downloadable so you can use or modify them for instruction and assessment Each big idea offers a starting task followed by what makes it a high quality task what you might anticipate before students work with the task four student examples of the completed task showcasing a distinct gap commentary on what precisely counts for mathematical understanding and the next instructional steps commentary on the misconception or incomplete understanding so you learn why the student veered off course three additional tasks aligned to the mathematics topic and ideas about what students might do with these additional tasks It s time to break our habit of rushing into re teaching for correctness and instead get curious about the space between right and wrong answers *Mine the Gap for Mathematical Understanding* is a book you will return to again and again to get better at selecting tasks that will uncover students reasoning better at discerning the quality and clarity of students understanding and better at planning teaching based on the gaps you see **Excavation & Grading Handbook** Nick Capachi, 1987 It includes hundreds of tips pictures diagrams and tables that every excavation contractor and supervisor can use This revised edition explains how to handle all types of excavation grading paving pipeline and compaction jobs whether it s a highway subdivision commercial or trenching job This edition has been completely rewritten to cover new materials equipment and techniques It includes hundreds of tips pictures diagrams and tables *The*
