CATEGORY: Apple Digital Media **COVERS:** Apple iPhone **USER LEVEL:** Beginning-Intermediate En un escenario de crisis global, el sector de la prensa augura el final de su difusión en soporte papel, pero no el fin de la industria periodística. Durante los tres últimos años, los diarios, que arrastraban una crisis de identidad no siempre reconocida por la industria, han sufrido mermas dramáticas en los dos pilares que le dan estabilidad: las ventas, especialmente afectadas por la migración de los lectores al soporte digital, y la publicidad, sin que el crecimiento de la inversión comercial en las ediciones digitales marque aún expectativas de rentabilidad que equilibren la economía del medio. No obstante, comienzan a vislumbrarse soluciones de futuro. A ello ha contribuido el hecho de que las empresas editoras hayan aceptado que el negocio de la prensa en soporte papel ya no es plenamente recuperable. Un reconocimiento al que se habían resistido durante demasiado tiempo, con la pérdida de muchas de las oportunidades que el nuevo escenario tecnológico abría a la comunicación periodística.
