The updated version covers the newest techniques for evaluating programs and includes state of the art implementation advice as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections. Part One discusses what to evaluate and why. Part Two presents the main impact evaluation methods. Part Three addresses how to manage impact evaluations. Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online including an applied case as well as questions and answers. Cochrane Handbook for Systematic Reviews of Interventions Julian P. T. Higgins, Sally Green, 2008-11-24. Healthcare providers consumers researchers and policy makers are inundated with unmanageable amounts of information including evidence from healthcare research. It has become impossible for all to have the time and resources to find appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying appraising and synthesizing research based evidence and presenting it in a standardized format published in The Cochrane Library [www.thecochranelibrary.com](http://www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format it is the essential manual for all those preparing maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that
