**Dirty Secret** Jessie Sholl, 2010-12-28 A fascinating look at compulsive hoarding by a woman whose mother suffers from the disease To be the child of a compulsive hoarder is to live in a permanent state of unease Because if my mother is one of those crazy junk house people then what does that make me When her divorced mother was diagnosed with cancer New York City writer Jessie Sholl returned to her hometown of Minneapolis to help her prepare for her upcoming surgery and get her affairs in order While a daunting task for any adult dealing with an aging parent it s compounded for Sholl by one lifelong complex and confounding truth her mother is a compulsive hoarder Dirty Secret is a daughter s powerful memoir of confronting her mother s disorder of searching for the normalcy that was never hers as a child and finally cleaning out the clutter of her mother s home in the hopes of salvaging the true heart of their relationship before it s too late Growing up young Jessie knew her mother wasn t like other mothers chronically disorganized she might forgo picking Jessie up from kindergarten to spend the afternoon thrift store shopping Now tracing the downward spiral in her mother s hoarding behavior to the death of a long time boyfriend she bravely wades into a pathological sea of stuff broken appliances moldy cowboy boots twenty identical pairs of graying bargain bin sneakers abandoned arts and crafts newspapers magazines a dresser drawer crammed with discarded eyeglasses shovelfuls of junk mail the things that become a hoarder s treasures With candor wit and not a drop of sentimentality Jessie Sholl explores the many personal and psychological ramifications of hoarding while telling an unforgettable mother daughter tale

**Immunity to Change** Robert Kegan,Lisa Laskow Lahey,2009-02-15 Unlock your potential and finally move forward A recent study showed that when doctors tell heart patients they will die if they don t change their habits only one in seven will be able to follow through successfully Desire and motivation aren t enough even when it s literally a matter of life or death the ability to change remains maddeningly elusive Given that the status quo is so potent how can we change ourselves and our organizations In Immunity to Change authors Robert Kegan and Lisa Lahey show how our individual beliefs along with the collective mind sets in our organizations combine to create a natural but powerful immunity to change By revealing how this mechanism holds us back Kegan and Lahey give us the keys to unlock our potential and finally move forward And by pinpointing and uprooting our own immunities to change we can bring our organizations forward with us This persuasive and practical book filled with hands on diagnostics and compelling case studies delivers the tools you need to overcome the forces of inertia and transform your life and your work *The Lucifer Principle* Howard Bloom,2013-11-01 A philosophical look at the history of our species which alternated between fascinating and frightening like reading Dean Koontz or Stephen King Rocky Mountain News The Lucifer Principle is a revolutionary work that explores the intricate relationships among

genetics human behavior and culture to put forth the thesis that evil is a by product of nature s strategies for creation and that it is woven into our most basic biological fabric In a sweeping narrative that moves lucidly among sophisticated scientific disciplines and covers the entire span of the earth s as well as mankind s history Howard Bloom challenges some of our most popular scientific assumptions Drawing on evidence from studies of the most primitive organisms to those on ants apes and humankind the author makes a persuasive case that it is the group or superorganism rather than the lone individual that really matters in the evolutionary struggle But biology is not destiny and human culture is not always the buffer to our most primitive instincts we would like to think it is In these complex threads of thought lies the Lucifer Principle and only through understanding its mandates will we be able to avoid the nuclear crusades that await us in the twenty first century A revolutionary vision of the relationship between psychology and history The Lucifer Principle will have a profound impact on our concepts of human nature It is astonishing that a book of such importance could be such a pleasure to read Elizabeth F

Loftus author of *Memory* **Buried in Treasures** David Tolin,Randy O. Frost,Gail Steketee,2013-12 Describes the psychological roots of compulsive hoarding and presents practical strategies for treating and overcoming the behavior

**The House We Grew Up In** Lisa Jewell,2014-08-12 From the New York Times bestselling author of *Then She Was Gone* OUR HOUSE OUR FAMILY OUR SECRETS Meet the picture perfect Bird family pragmatic Meg dreamy Beth and towheaded twins Rory and Rhys one an adventurous troublemaker the other his slighter more sensitive counterpart Their father is a sweet gangly man but it s their beautiful free spirited mother Lorelei who spins at the center In those early years Lorelei tries to freeze time by filling their simple brick house with precious mementos Easter egg foils are her favorite Craft supplies too She hangs all of the children s art to her husband s chagrin Then one Easter weekend a tragedy so devastating occurs that almost imperceptibly it begins to tear the family apart Years pass and the children have become adults while Lorelei has become the county s worst hoarder She has alienated her husband and children and has been living as a recluse But then something happens that beckons the Bird family back to the house they grew up in to finally understand the events of that long ago Easter weekend and to unearth the many secrets hidden within the nooks and crannies of home *Stuff* Randy O. Frost,Gail Steketee,2010-04-20 The New York Times bestseller *Gripping* By turns fascinating and heartbreaking *Stuff* invites readers to reevaluate their desire for things Boston Globe Amazing utterly engrossing Read it The Washington Post Book World What possesses someone to save every scrap of paper that s ever come into his home What compulsions drive a person to sacrifice her marriage or career for an accumulation of seemingly useless things Randy Frost and Gail Steketee were the first to study hoarding when they began their work a decade ago They didn t expect that they would end up treating hundreds of patients and fielding thousands of calls from the families of hoarders Their vivid case studies reminiscent of Oliver Sacks in *Stuff* show how you can identify a hoarder piles on sofas and beds that make the furniture useless houses that can be navigated only by following small paths called goat trails vast piles of paper that the hoarders churn but never discard

even collections of animals and garbage and illuminate the pull that possessions exert over all of us Whether we re savers collectors or compulsive cleaners very few of us are in fact free of the impulses that drive hoarders to extremes Authoritative haunting and mysterious It is also intensely not to say compulsively readable Tracy Kidder Pulitzer Prize winning author Fascinating a good mix of cultural and psychological theories on hoarding Newsweek Pioneering researchers offer a superb overview of a complex disorder that interferes with the lives of more than six million Americans An absorbing gripping important report Kirkus Reviews starred review

**Diary of a Hoarder's Daughter** Isabelle Winter,2014-06-07 What is it really like to be the relative of a hoarder especially if you re a tidy freak How much can one person take until they snap Imagine living in a house where you can only walk sideways where Christmas lights stay up all year and tins in the kitchen eventually explode with age Of eight televisions in the lounge only one actually worked A new 20ft carpet which arrived rolled up and ready to be laid in 1974 was still there forty years later Why would a man with two feet need 173 shoes Where were his teeth his hearing aid and the vacuum cleaner In fact where was the floor Meet my dad 82 eccentric stubborn knows everything and collects stuff His house his stuff what s the problem For him there wasn t a problem until one day he had a nasty accident while up a ladder in his garden and was taken to hospital Temporarily unable to live in the house it was down to me his daughter to make the house safe for him to return I had to do something with over fifty years of accumulated stuff I had to sort the whole house knowing he would freak out if I threw anything away A true story of revisiting the house of my childhood and the demons I hoped I d left behind I discover a lot of stuff I m glad I uncovered and a lot more I d prefer to forget

*Overcoming Compulsive Hoarding* Jerome Bublick,Fugen Neziroglu,Jose Yaryura-Tobias,2004-07-15 Although the much satirized image of a house overflowing with National Geographics and infested with cats may make us chuckle the reality of compulsive hoarding is no laughing matter The most common reason for evictions in the US and a significant risk factor for fatal house fires compulsive hoarding is a treatable condition related to obsessive compulsive disorder It is characterized by the acquisition of possessions that have little or no value which the sufferer often referred to as the saver has great difficulty discarding This book the first ever written for savers and their families provides an overview of compulsive hoarding and how it relates to obsessive compulsive disorder It discusses hoarding broadly offering readers perspectives on the physical behavioral and value oriented aspects of the condition You can use its assessment tools to help decide why you or your loved one hoards Skill building exercises help you determine how to beat the hoarding problem by addressing issues that often underlie compulsive saving Even though this is fundamentally a self help book it contains a frank discussion about the need for professional help in some hoarding cases how to find it and what medications have been proven effective for savers

**Staying with the Trouble** Donna J. Haraway,2016-08-25 In the midst of spiraling ecological devastation multispecies feminist theorist Donna J Haraway offers provocative new ways to reconfigure our relations to the earth and all its inhabitants She eschews referring to our current epoch as the Anthropocene preferring to conceptualize it as

what she calls the Chthulucene as it more aptly and fully describes our epoch as one in which the human and nonhuman are inextricably linked in tentacular practices The Chthulucene Haraway explains requires sym poiesis or making with rather than auto poiesis or self making Learning to stay with the trouble of living and dying together on a damaged earth will prove more conducive to the kind of thinking that would provide the means to building more livable futures Theoretically and methodologically driven by the signifier SF string figures science fact science fiction speculative feminism speculative fabulation so far Staying with the Trouble further cements Haraway's reputation as one of the most daring and original thinkers of our time

**Mistakes Were Made (but Not by Me)** Carol Tavris, 2013 Why do people dodge responsibility when things fall apart Why the parade of public figures unable to own up when they make mistakes Why the endless marital quarrels over who is right Why can we see hypocrisy in others but not in ourselves Are we all liars Or do we really believe the stories we tell Renowned social psychologists Carol Tavris and Elliot Aronson take a compelling look into how the brain is wired for self justification When we make mistakes we must calm the cognitive dissonance that jars our feelings of self worth And so we create fictions that absolve us of responsibility
