By claiming that it does not necessarily belong to any one mind in particular is inferring then that the self is not in fact a property. Then how can it be said to exist? Thomas Reid (Macquarie, lecture 17) also raises an important objection to Locke's theory of personal identity that seems fairly self-evident to me. We can consider a man as: a child, then in middle age and at old age. If the man in middle age can remember occurrences when he was a young boy, but now that he is an old man can't, then can he be considered a different person from the young boy?

Of Personal Identity Hume

According to Locke the old man is the same as the middle aged one, and the middle aged is the same as the child. Yet there is no continuity of consciousness between the three, any break in memory would render them a 'non-person' if we follow Locke's argument-clearly it is logically inconsistent. David Hume's 'bundle theory' of the self seems to me rather more logically coherent. He claimed that humans tend to think of themselves as the same person as they were, say, 10 years ago; that we believed that although one had evolved over the period in a number of ways that the self had endured.

According to Hume however, this was a mistake, and when examined empirically no more than a practical habit: "I never can catch myself at any time without a perception, and never observe anything but the perception"(TI, vi, p. 251). It is clear, posits Hume, our thoughts and perceptions flow from one idea to the next; so we encounter a 'bundle', or grouping, of perceptions throughout our life but no actual continuous and enduring underlying self- or "I" -as a 'unity of consciousness'.

While there is a stability of perceptions over the short term, and some loose association of experiences, there is no overarching continuity of "I" in reality. Hume agrees that we extend over time in actions, we begin a job and finish it some time later, and that our desires also extend in some sort of continuity over time. Furthermore our physical bodies endure reasonably consistently; we age gradually. This according to Hume is what ultimately defines our sense of personal identity. While Hume's theory of the self is attractive in my view, if anything it doesn't go far

Persons and Personal Identity Amy Kind, 2015-10-02 As persons we are importantly different from all other creatures in the universe But in what exactly does this difference consist What kinds of entities are we and what makes each of us the same person today that we were yesterday Could we survive having all of our memories erased and replaced with false ones What about if our bodies were destroyed and our brains were transplanted into android bodies or if instead our minds were simply uploaded to computers In this engaging and accessible introduction to these important philosophical questions Amy Kind brings together three different areas of research the nature of personhood theories of personal identity over time and the constitution of self identity Surveying the key contemporary theories in the philosophical literature Kind analyzes and assesses their strengths and weaknesses As she shows our intuitions on these issues often pull us in different directions making it difficult to develop an adequate general theory Throughout her discussion Kind seamlessly interweaves a vast array of up to date examples drawn from both real life and popular fiction all of which greatly help to elucidate this central topic in metaphysics A perfect text for readers coming to these issues for the first time *Persons and Personal Identity* engages with some of the deepest and most important questions about human nature and our place in the world making it a vital resource for students and researchers alike

An Exploratory Study of Personal Identity Based on the Psychology of Personal Constructs Edwin Lewis Morse, 1966

Handbook of Identity Theory and Research Seth J. Schwartz, Koen Luyckx, Vivian L. Vignoles, 2011-06-22 Identity is one of the most extensively studied constructs in the social sciences. Yet despite the wealth of findings across many disciplines, identity researchers remain divided over such enduring fundamental questions as: What exactly is identity and how do identity processes function? Do people have a single identity or multiple identities? Is identity individually or collectively oriented? Personally or socially constructed? Stable or constantly in flux? The *Handbook of Identity Theory and Research* offers the rare opportunity to address the questions and reconcile these seeming contradictions, bringing unity and clarity to a diverse and fragmented literature. This exhaustive reference work emphasizes the depth and complexity of identity processes and domains and presents perspectives from many different theoretical schools and empirical approaches. Contributing authors provide perspectives from psychology (e.g., narrative social identity theory, neo-Eriksonian) and from other disciplines (e.g., sociology, political science, ethnic studies), and the editors highlight the links between chapters that provide complementary insights on related subjects. In addition to covering identity processes and categories that are well known to the field, the *Handbook* tackles many emerging issues, including: Identity development among adopted persons; Identity processes in interpersonal relationships; Effects of globalization on cultural identity; Transgender experience and identity; Consumer identity and shopping behavior; Social identity processes in xenophobia and genocide. The *Handbook of Identity Theory and Research* lends itself to a wealth of uses by scholars, clinicians, and graduate students across many disciplines, including social developmental and child school psychology, human development, and family studies, sociology, cultural anthropology, gender, ethnic, and communication studies, education, and counseling.

Emerging Perspectives on Self and Identity Michael J. Bernstein, Elizabeth L. Haines, 2020-05-21 The broad concept of the self is fundamental to psychology, serving as an anchor by which we perceive and make sense of the world as well as how we relate to and think about others. This book develops creative points of view of the self which have not previously been reviewed, creating a web of interconnected concepts under the umbrella of the self. The various contributions to this book discuss these concepts such as self-regulation, self-concept, self-esteem, self-awareness, social comparison, and self-reference. All of them are related to the self and all would justify a review of their own, yet none of them have up to this point. As a whole, the book develops these new creative points of view of the self, the integral primary component of our experience as social beings. Offering numerous perspectives on various aspects of the self which can foster new thinking and research, this timely and important book makes suggestions for future research that will spur additional lines of work by readers. This book was originally published as a special issue of *Self and Identity*.

Self and Social Identity Marilyn B. Brewer, Miles Hewstone, 2004-01-26 The study of the interplay between the individual self and collective selves is an arena of rich theory and research in social psychology. *Self and Social Identity* is a collection of readings from the four-volume set of *Blackwell Handbooks of Social Psychology* that examine how group memberships shape the content of the individual's self-concept and how the sense of self is expanded as a consequence of identification with other individuals and the group as a whole. Collects readings from the four-volume set of *Blackwell Handbooks of Social Psychology* and includes introductions by two world-renowned researchers. Provides a sampling of exciting research and theory that is both comprehensive and current and cross-cuts the levels of analysis from intrapersonal to intergroup. Organized around two broad themes: self and identity and group identities and designed for course use.
