

Step by step procedure to write a term paper:

A **term paper** is a record of information collected from different resources on a specific topic. It is not as difficult as it seems to **write a term paper**. But it should be planned in advance and definite procedure should be followed to produce the perfect **term paper**. Below is listed the step by step procedure that should be followed to produce a good **term paper**.

- 1) Choose a subject
- 2) Hunt for sources
- 3) Gather notes
- 4) Make outline for the paper
- 5) Write the first draft
- 6) Edit the paper

Choose a subject: Avoid choosing a topic that is too general. Experiment with topics that are least researched on. But make sure that your topic has enough resources. Good papers are mostly built around questions. Make clear evidence and arguments to keep your paper crisp. So, use facts and prove your answers for questions that you decide to answer through your paper.

Hunt for sources: Refer those materials that are not too old depending on your topic. Sources can be primary or secondary. General encyclopedia, reviews, Books, magazines, news stories, periodicals and articles are some examples of sources. You can get professional help to search for resources for your topic. Make sure that you have gathered at least ten times the information that your would require to compose your paper.

Gather notes: Browse through your resources. Make a note of those that are strikingly good along with the author's name. Get the appropriate material. Obtain facts and work on them. Compare them with the conclusion provided by the author.

The I-search Paper Ken Macrorie,1988 This revised and retitled edition of Searching Writing includes two additional I Search papers one by a teacher and a new chapter entitled The Larger Context which shows how the I Search concept can work throughout the whole curriculum in school and college As with the first edition The I Search Paper is more than just a textbook it s a new form of instructional help a context book that shows students what authority is in matters of learning and invites them to join the author and teacher in the educational movement called Writing to Learn To put this book in the hands of all the students in the course is not only to help them carry out an I Search but to introduce them in a delightful way to the resources and tools of intellectual inquiry but one that never forgets the emotional or physical side of human activity This is a rare textbook that treats students as partners in learning It shows what it is to take charge of one s own learning and suggests that this move is one that productive people keep making throughout their lives

Writing a Research Paper Colleen Hord, 2015-01-01 There are certain steps you can take when writing a research paper that will make the finished product a lot easier Many people such as scientists and businesspeople use research skills to make products better or more useful and to teach others how to do their jobs more efficiently and effectively Picking a topic gathering and organizing your information and putting it all together are discussed in this title By following these steps you are guaranteed to get an A on your next research paper This book allows students to determine the main idea of a text and explain how it is supported by key details summarize the text

Improving 7th Grade Student Writing Skills by Teaching the Deconstruction of Writing Prompts Mayeen Quader, 2009

Research questions
To what extent will the use of multiple instructional activities impact my students abilities to respond appropriately to all aspects of a writing prompt
1 Will instruction in multiple learning strategies improve my students sense of self efficacy as writers
2 What happens when students identified with difficulty writing responses to writing prompts generate their own mnemonic device about the process of deconstructing writing prompts
3 How will using the instructional approach of teacher student modeling affect seventh graders ability to write appropriate responses to all aspects of a writing prompt
4 What happens when students identified with difficulty writing responses to writing prompts generate their own questions

Research activities
This research explored the effectiveness of multiple instructional strategies centered on the teaching of deconstructing writing prompts to improve students writing skills and self efficacy as writers

Context
The inquiry took place in a seventh grade World History classroom
The study focused on two female and three male seventh grade students
One student was high performing and the other four were average or low performing

Methods and Data
The inquiry took place over a five week period and consisted of students practicing three instructional strategies the Mnemonic Device Teacher Student Modeling and Question Generation
Students were first given an introduction to a mnemonic device created to assist them with remembering essential steps of deconstructing writing prompts
They were required to generate a mnemonic song in order to memorize this process
Students utilized this mnemonic device to deconstruct two daily opener activities and write appropriate responses
Student work was analyzed using a rubric emphasized throughout the intervention
Students learned to identify various aspects of questions
They also learned how to recognize the tasks included in writing prompt questions
This knowledge facilitated the organization of their thought process and helped them construct well written responses
This process to deconstruct writing prompts was emphasized throughout the intervention
Students completed a few worksheets illustrating their thought processes when deconstructing writing prompts

Observation data were collected through an audio recording and field notes were collected as well
Students practiced generating writing prompt questions to well written writing prompt responses and finally participated in an assessment responding to four separate writing prompt questions and to a questionnaire
To determine the results of the inquiry I asked students to respond to similar Warm Up responses prior to and after the intervention

Results
The findings suggest that explicit instruction in the deconstruction of writing prompts improved students written responses and self efficacy as writers
However there were many unexplained discrepancies
For example each time certain responses were analyzed scores vacillated
After practice with the Mnemonic Device strategy students scores vacillated
However during the Teacher Student Modeling strategy the process of deconstructing writing prompts was reinforced and scores increased by 9% the highest overall throughout the intervention
Students scores on their written responses only improved after this and they did not regress as they had before
It seems as if these two strategies combined were most effective and they greatly improved the writing of the students
On the final assessment students were required to write responses to four writing prompts and they scored a 71.5% or C if I were to give the class a letter grade
The first writing prompt responses in the baseline data scored a 54.82%
Therefore this is an increase of approximately 16.68%
Students went from writing at an F level to writing at a C level on their Warm Up responses

Grade Level
Seventh
