K.C. Nicolaou - Winner of the Nemitsas Prize 2014 in Chemistry Here, the best-selling author and renowned researcher, K. C. Nicolaou, presents around 40 natural products that all have an enormous impact on our everyday life. Printed in full color throughout with a host of pictures, this book is written in the author's very enjoyable and distinct style, such that each chapter is full of interesting and entertaining information on the facts, stories and people behind the scenes. Molecules covered span the healthy and useful, as well as the much-needed and extremely toxic, including Aspirin, urea,

camphor, morphine, strychnine, penicillin, vitamin B12, Taxol, Brevetoxin and quinine. A veritable pleasure to read. "Top political and social events of the 20th century as well as highlights from the worlds of culture, science, and sports, all documented in more than 100 stunning photographs." -- BACK COVER. Beginning with Norman Borlaug and going back to those who influenced him directly or indirectly, shows how one ordinary boy came to develop "super plants" that helped save billions of people from starvation. Two French Protestant refugees in eighteenth-century Amsterdam gave the world an extraordinary work that intrigued and outraged readers across Europe. In this captivating account, Lynn Hunt, Margaret Jacob, and Wijnand Mijnhardt take us to the vibrant Dutch Republic and its flourishing book trade to explore the work that sowed the radical idea that religions could be considered on equal terms. Famed engraver Bernard Picart and author and publisher Jean Frederic Bernard produced *The Religious Ceremonies and Customs of All the Peoples of the World*, which appeared in the first of seven folio volumes in 1723. They put religion in comparative perspective, offering images and analysis of Jews, Catholics, Muslims, the peoples of the Orient and the Americas, Protestants, deists, freemasons, and assorted sects. Despite condemnation by the Catholic Church, the work was a resounding success. For the next century it was copied or adapted, but without the context of its

original radicalism and its debt to clandestine literature, English deists, and the philosophy of Spinoza. Ceremonies and Customs prepared the ground for religious toleration amid seemingly unending religious conflict, and demonstrated the impact of the global on Western consciousness. In this beautifully illustrated book, Hunt, Jacob, and Mijnhardt cast new light on the profound insight found in one book as it shaped the development of a modern, secular understanding of religion. "A biography on the Kenyan activist and environmentalist Wangari Muta Maathai"-- We take thousands of inventions for granted, using them daily and enjoying their benefits. But how much do we really know about their origins and development? This absorbing new book tells the stories behind the inventions that have changed the world. A biography of the pioneering scientist and environmentalist, Rachel Carson, author of Silent Spring. "Once you are aware of the wonder and beauty of earth, you will want to learn about it," wrote Rachel Carson. Determined and curious even as a child, Rachel Carson's fascination with the natural world led her to study biology, and pursue a career in science at a time when very few women worked in the field. This lyrical, illustrated biography follows Carson's journey—from a girl exploring the woods, to a woman working to help support her family during the Great Depression, to a journalist and pioneering researcher, investigating and exposing the harmful effects of pesticide

overuse. Best known for writing *Silent Spring*, Rachel Carson was a major figure in the early environmental movement, and her work brought a greater understanding of the impact humans have on our planet. *Rachel Carson and Her Book That Changed the World* offers a glimpse at the early life that shaped her interest in nature, and the way one person's determination can inspire others to fight for real change. An author's note delves into how *Silent Spring* helped shape the modern environmental movement and inspired a generation of readers to get involved in conservation. Detailed source notes and a list of recommended reading are included. A National Science Teachers Association Outstanding Science Trade Book A Bank Street Best Children's Book of the Year

The first Christians turned the world upside down in the space of a generation. How can we learn from them today? In this book Michael Green opens up the gripping story of Acts, highlighting the volcanic eruption of faith described there and contrasting it with the often halfhearted Christianity of the modern Western world. Green explores the life and faith of the Christians of Acts, answering such questions as, What kind of people were they? How did they live? And how did they organize and practice as members of the new church? Besides describing life in the early church, Green discusses how we today can apply the first Christians' dynamic efforts at church planting, pastoral care, social concern, gospel proclamation, and prayer. Combining

trusted scholarship with a popular, enjoyable writing style, *Thirty Years That Changed the World* is an ideal book for church, group, or personal study. A thought-provoking chronological journey through the world's most influential books. Many books have become classics, must-reads or overnight publishing sensations, but how many can genuinely claim to have changed the way we see and think? In *100 Books that Changed the World*, authors Scott Christianson and Colin Salter bring together an exceptional collection of truly groundbreaking books – from scriptures that founded religions, to scientific treatises that challenged beliefs, to novels that kick-started literary genres. This elegantly designed book, first published in 2018 but updated with an exciting new cover, offers a chronological timeline of three millennia of human thought distilled in print, from the earliest illuminated manuscripts to the age of ebooks and audiobooks. Entries include: • *The Iliad and The Odyssey*, Homer (750 BC) • *Shakespeare's First Folio* (1623) • *A Vindication of the Rights of Woman*, Mary Wollstonecraft (1792) • *Narrative of the Life of Frederick Douglass* (1845) • *The Diary of a Young Girl*, Anne Frank (1947) • *Things Fall Apart*, Chinua Achebe (1958) • *A Brief History of Time*, Stephen Hawking (1988) For literary lovers and rebellious readers, this book offers a fascinating overview of world history through the books that influenced and changed it. From the ranging curiosity of Leonardo da Vinci to the dedication and sacrifice of

Marie Curie, *Inventors Who Changed the World* is a young child's first introduction to the brilliant people who taught us the meaning of perseverance and innovation. Simple text and adorable illustrations tell the contributions of nine renowned inventors from around the world: Cai Lun, Leonardo da Vinci, Marie Curie, Thomas Edison, Orville and Wilbur Wright, Grace Hopper, Johannes Gutenberg, and Louis Pasteur. Inspire your own little inventor with the words of these inventive heroes who changed the world. First published in 1969, *How the World Changed: Volume 1 1900-1939* is the first of two volumes that together outline the political history of the twentieth century up to 1968. This volume extends from 1900-1939 and explores life prior to, during, and after the First World War. In doing so, it covers significant political events and features of the period, including the Chinese Revolution and the rise of Japan, the different stages of the First World War, the peace process, the Russian Revolution, economic challenges, and the British Empire and Commonwealth. The fascinating and heartbreaking account of the first publicly exhibited captive killer whale — a story that forever changed the way we see orcas and sparked the movement to save them. Killer whales had always been seen as bloodthirsty sea monsters. That all changed when a young killer whale was captured off the west coast of North America and displayed to the public in 1964. *Moby Doll* — as the whale became known — was an instant

celebrity, drawing 20,000 visitors on the one and only day he was exhibited. He died within a few months, but his famous gentleness sparked a worldwide crusade that transformed how people understood and appreciated orcas. Because of Moby Doll, we stopped fearing “killers” and grew to love and respect “orcas.”

How the World Changed Social Media is the first book in *Why We Post*, a book series that investigates the findings of anthropologists who each spent 15 months living in communities across the world. This book offers a comparative analysis summarising the results of the research and explores the impact of social media on politics and gender, education and commerce. What is the result of the increased emphasis on visual communication? Are we becoming more individual or more social? Why is public social media so conservative? Why does equality online fail to shift inequality offline? How did memes become the moral police of the internet? Supported by an introduction to the project’s academic framework and theoretical terms that help to account for the findings, the book argues that the only way to appreciate and understand something as intimate and ubiquitous as social media is to be immersed in the lives of the people who post. Only then can we discover how people all around the world have already transformed social media in such unexpected ways and assess the consequences.

From the light bulb, automobile and computer to vaccinations and tectonic theory, this text reports on the

most significant scientific and technological breakthroughs - in the form of ideas, inventions and discoveries - that have driven human progress. Did you know that what you do today can change the world forever? The Boy Who Changed the World opens with a young Norman Borlaug playing in his family's cornfields with his sisters. One day, Norman would grow up and use his knowledge of agriculture to save the lives of two billion people. Two billion! Norman changed the world! Or was it Henry Wallace who changed the world? Or maybe it was George Washington Carver? This engaging story reveals the incredible truth that everything we do matters! Based on The Butterfly Effect, Andy's timeless tale shows children that even the smallest of our actions can affect all of humanity. The book is beautifully illustrated and shares the stories of Nobel Laureate Norman Borlaug, Vice President Henry Wallace, Inventor George Washington Carver, and Farmer Moses Carver. Through the stories of each, a different butterfly will appear. The book will end with a flourish of butterflies and a charge to the child that they, too, can be the boy or girl who changes the world. 'Mr Gorbachev, tear down this wall!' This declamation by president Ronald Reagan when visiting Berlin in 1987 is widely cited as the clarion call that brought the Cold War to an end. The West had won, so this version of events goes, because the West had stood firm. American and Western European resoluteness had brought an evil empire to its knees.

Michael Meyer, in this extraordinarily compelling account of the revolutions that roiled Eastern Europe in 1989, begs to differ. Drawing together breathtakingly vivid, on-the-ground accounts of the rise of Solidarity in Poland, the stealth opening of the Hungarian border, the Velvet Revolution in Prague, and the collapse of the infamous wall in Berlin, Meyer shows that western intransigence was only one of the many factors that provoked such world-shaking change. More important, Meyer contends, were the stands taken by individuals in the thick of the struggle, leaders such as poet and playwright Vaclav Havel in Prague; Lech Walesa; the quiet and determined reform prime minister in Budapest, Miklos Nemeth; and the man who realized his empire was already lost and decided, with courage and intelligence, to let it go in peace, Soviet president Mikhail Gorbachev. Michael Meyer captures these heady days in all their rich drama and unpredictability. In doing so he provides not just a thrilling chronicle of perhaps the most important year of the 20th century but also a crucial refutation of American mythology and a misunderstanding of history that was deliberately employed to lead the United States into some of the intractable conflicts it faces today. Rodney Castleden presents a thought-provoking look at the various people whose lives have illuminated the world in one way or another, highlighting extraordinary individuals and the impact they made on human society. In his best-selling book, 24 Hours that

Changed the World, pastor and popular author Adam Hamilton helped readers relive the one day in history that changed everything. Hamilton invites readers and viewers to experience and understand the significance of Jesus' final hours. Based on this popular series by Adam Hamilton, 24 Hours That Changed the World For Youth offers an age-appropriate perspective on the final day in Jesus' life on earth. Religious beliefs have shaped the history of the world. Their effect can be seen in culture, philosophy and politics, and they have inspired people to serve others and to create great works of art, architecture and music. Yet differences in belief can cause bloodshed and war. Never before has it been more urgent to understand the great religions if we are to make sense of our 21st century world, its achievements and its conflicts. This new, revised edition of Beliefs That Changed the World tells the story of the major faiths from their earliest beginnings to their present day impact. When we think of great events in the history of the world, we tend to think of war, revolution, political upheaval or natural catastrophe. But throughout history there have been moments of vital importance that have taken place not on the battlefield, or in the palaces of power, or even in the violence of nature, but between the pages of a book. In our digitised age of instant information it is easy to underestimate the power of the printed word. In his fascinating book, Melvyn Bragg presents a vivid reminder of the book as agent of social, political and personal

revolution. 12 Books that Changed the World presents a rich variety of human endeavour and a great diversity of characters. There are also surprises. Here are famous books by Darwin, Newton and Shakespeare - but we also discover the stories behind some less well-known works, such as Marie Stopes' Married Love, the original radical feminist Mary Wollstonecraft's A Vindication of the Rights of Woman - and even the rules to an obscure ball game that became the most popular sport in the world . . .

When this award-winning husband-and-wife team discovered that they each had sugar in their family history, they were inspired to trace the globe-spanning story of the sweet substance and to seek out the voices of those who led bitter sugar lives. The trail ran like a bright band from religious ceremonies in India to Europe's Middle Ages, then on to Columbus, who brought the first cane cuttings to the Americas. Sugar was the substance that drove the bloody slave trade and caused the loss of countless lives, but it also planted the seeds of revolution that led to freedom in the American colonies, Haiti, and France. With songs, oral histories, maps, and more than eighty archival illustrations, here is the story of how one product moved the grand currents of world history. Book jacket. In this volume the author offers a thought-provoking examination of the many pivotal events in the course of world history. A collection of 175 ideas which have changed the world are presented in this volume - from time to evolution,

and anarchy to Zen. Using illustrations to bring the concepts to life, this thought-provoking book could be great for dinner party conversations. The English East India Company was the mother of the modern multinational. Its trading empire encircled the globe, importing Asian luxuries such as spices, textiles, and teas. But it also conquered much of India with its private army and broke open China's markets with opium. The Company's practices shocked its contemporaries and still reverberate today. The Corporation That Changed the World is the first book to reveal the Company's enduring legacy as a corporation. This expanded edition explores how the four forces of scale, technology, finance, and regulation drove its spectacular rise and fall. For decades, the Company was simply too big to fail, and stock market bubbles, famines, drug-running, and even duels between rival executives are to be found in this new account. For Robins, the Company's story provides vital lessons on both the role of corporations in world history and the steps required to make global business accountable today. Some of the greatest discoveries and inventions have stemmed from doubt. Read about some of the most awe-inspiring inventions in this planner. Be a "doubting Thomas" as you plan ahead. The defining conflicts of world history from the ancient Greeks to the war on terror. Going after you dream doesn't have to wait - be empowered by these incredible women and start changing the world now. From the

inspiring author of *Girls Who Rocked the World* comes another comprehensive collection of true, inspiring profiles of successful young women throughout history who made their mark on the world before turning twenty. Young women today crave strong, independent role models to look to for motivation. *Girls Who Changed the World* offers a fun and uplifting collection of influential stories with forty-five more movers and shakers who made a difference early on in life. From Cleopatra to Mindy Kaling, and Aretha Franklin to Emma Watson - each with her own incredible story of how she created life-changing opportunities for herself and the world - you'll get to know these capable queens of empires and courageous icons of entertainment. Also included are profiles of gutsy teenagers who are out there rocking the world right now and personal aspirations from today's young women. This book is the perfect fashion accessory--a sumptuous, exquisitely designed exploration of the most influential fashion icons, ideas, designers, pieces, and trends from throughout history. Filled with colorful images--many of them full-page--and extensive essays that are both informative and engaging, this indispensable reference offers a historical snapshot of what we used to wear and why we choose the clothes that we do today. Presents a review of technological innovations and inventions, from the ancient world to the present day. A collection of funny and informative stories describe how technological

progress has been advanced throughout human history by some of the greatest inventing catastrophies ever, from primitive discoveries such as fire and the wheel, to modern creations such as the jet engine and the internet. Draws conclusions for the future of the industry in the USA. Books that Changed the World tells the fascinating stories behind 50 books that, in ways great and small, have changed the course of human history. Andrew Taylor sets each text in its historical context and explores its wider influence and legacy. Whether he's discussing the incandescent effect of The Qu'ran, the enduring influence of Adam Smith's Wealth of Nations, of the way in which Uncle Tom's Cabin by Harriet Beecher Stowe glvanized the anti-slavery movement, Taylor has written a stirring and informative testament to human ingenuity and endeavour. Ranging from The Iliad to Harry Potter and the Philosopher's Stone, the Kama Sutra to Lady Chatterley's Lover, this is the ultimate, thought-provoking read for book-lovers everywhere. From the courage of Stubby the war dog to the empathy of Koko the gorilla, Amazing Animals Who Changed the World is a young child's first introduction to the incredible animals who taught us that you don't have to be big (or human) to make a difference. Simple text and adorable illustrations tell the contributions of nine animals who went down in history as interspecies heroes: Blossom the vaccine cow Stubby the war dog Cher Ami the carrier pigeon Winnie the

friendly bear Simon the seacat Togo the sled dog Able and Baker the space monkeys Koko the signing gorilla Ideas and concepts have been a driving force in human progress, and they may be the most important legacy of the United Nations. UN ideas have set past, present, and future international agendas in many global economic and social arenas and have also led to initiatives and actions that have improved the quality of human life. This capstone volume draws upon findings of the other 14 books in the acclaimed United Nations Intellectual History Project Series. The authors not only assess the development and implementation of UN ideas regarding sustainable economic development and human security, but also apply lessons learned to suggest ways in which the United Nations can play a fuller role in confronting the challenges of human survival with dignity in the 21st century. Experience the uplifting power of art on this breathtaking visual tour of 2,500 paintings and sculptures created by more than 700 artists from Michelangelo to Damien Hirst. This beautiful book brings you the very best of world art from cave paintings to Neoexpressionism. Enjoy iconic must-see works, such as Leonardo da Vinci's Last Supper and Monet's Waterlilies and discover less familiar artists and genres from all parts of the globe. Art That Changed the World covers the full sweep of world art, including the Ming era in China, and Japanese, Hindu, and Indigenous Australian art. It analyses recurring themes such as love and

religion, explaining key genres from Romanesque to Conceptual art. *Art That Changed the World* explores each artist's key works and vision, showing details of their technique, such as Leonardo's use of light and shade. It tells the story of avant-garde works like Manet's *Le Dejeuner sur l'herbe* (Lunch on the Grass), which scandalized society, and traces how one genre informed another - showing how the Impressionists were inspired by Gustave Courbet, for example, and how Van Gogh was influenced by Japanese prints. Lavishly illustrated throughout, look no further for your essential guide to the pantheon of world art. In this book the author takes a thought-provoking look at the various people whose lives have illuminated the world in one way or another, highlighting extraordinary individuals and the impact they made on human society. A fascinating collection of some of the most significant, interesting, and groundbreaking letters ever written. The written word has the power to inspire, astonish, and entertain, as this collection of 100 letters that changed history will show. Ordered chronologically, the letters range from ink-inscribed tablets that vividly describe life in the Roman Empire to remarkable last wills and testaments, passionate outpourings of love and despair, and succinct notes with deadly consequences. Entries include: A job application from Leonardo da Vinci, with barely a mention of his artistic talents. Henry VIII's love letters to Anne Boleyn, which eventually led to the dissolution of the

monasteries. The scrawled note that brought about Oscar Wilde's downfall. Emile Zola's "J'accuse!" open letter, in support of an alleged spy and against anti-Semitism. Beatrix Potter's correspondence with a friend's son that introduced the character of Peter Rabbit. A last letter from the Titanic. Nelson Mandela's ultimatum to the South African president. A stunning new edition with an elegant new cover, this fascinating book is perfect both for reading cover-to-cover and dipping into to discover the delights within. Glass production is thought to date to ~2500 BC and had found numerous uses by the height of the Roman Empire. Yet the modern view of glass-based chemical apparatus (beakers, flasks, stills, etc.) was quite limited due to a lack of glass durability under rapid temperature changes and chemical attack. This "brief" gives an overview of the history and chemistry of glass technology from its origins in antiquity to its dramatic expansion in the 13th century, concluding with its impact on society in general, particularly its effect on chemical practices. Some people have the power to change the world. It could be their talent or sheer determination, but these leaders rose above the rest and made a difference to the world. Their contributions have impacted our lives greatly. Stories of their success are legendary. Let us get to know these world leaders and learn from their remarkable achievements. 365 People Who Changed The World gives you a brief glimpse into the world of these leaders and helps you

understand them better. Browse through the book and get motivated by the accomplishments of world leaders!
