

Distance Module

Question 1 Complete the following table concerning the distance module for several stars.

m_p	m_v	m_b	m_i	m_z
1.0	1.5	2.0	2.5	3.0
1.5	2.0	2.5	3.0	3.5
2.0	2.5	3.0	3.5	4.0
2.5	3.0	3.5	4.0	4.5

Question 2 Consider one of the stars listed in the table above to be an RR Lyrae star. Explain why a star with $m_p = 0$ has a larger distance magnitude than 0.5.

Spectroscopic Parallax

Open up the Spectroscopic Parallax Module. There is a graph in the upper left entitled **Strengths and Weaknesses** - this is where you can get information on the types of stars in a star's spectrum to determine its spectral type. There is a graph in the lower right entitled **Distance** where you can enter the luminosity class found upon information on the thickness of lines in a star's spectrum. This is enough information to produce the star on the HR Diagram in the upper right and read off its distance magnitude.

Let's walk through an example. Suppose that an intermediate star has a star to have an apparent magnitude of 4.2 and exhibits a spectrum that has very strong helium and moderately strong neutral helium lines - all very thick. Find the distance to the star using spectroscopic parallax.

The Symbolic Species: The Co-evolution of Language and the Brain Terrence W. Deacon,1998-04-17 A work of enormous breadth likely to pleasantly

surprise both general readers and experts New York Times Book Review This revolutionary book provides fresh answers to long standing questions of human origins and consciousness Drawing on his breakthrough research in comparative neuroscience Terrence Deacon offers a wealth of insights into the significance of symbolic thinking from the co evolutionary exchange between language and brains over two million years of hominid evolution to the ethical repercussions that followed man s newfound access to other people s thoughts and emotions Informing these insights is a new understanding of how Darwinian processes underlie the brain s development and function as well as its evolution In contrast to much contemporary neuroscience that treats the brain as no more or less than a computer Deacon provides a new clarity of vision into the mechanism of mind It injects a renewed sense of adventure into the experience of being human

How to Write

Mathematics Norman Earl Steenrod,1973-12-31 This classic guide contains four essays on writing mathematical books and papers at the research level and at the level of graduate texts The authors are all well known for their writing skills as well as their mathematical accomplishments The first essay by Steenrod discusses writing books either monographs or textbooks He gives both general and specific advice getting into such details as the need for a good introduction The longest essay is by Halmos and contains many of the pieces of his advice that are repeated even today In order to say something well you must have something to say write for someone think about the alphabet Halmos s advice is systematic and practical Schiffer addresses the issue by examining four types of mathematical writing research paper monograph survey and textbook and gives advice for each form of exposition Dieudonne s contribution is mostly a commentary on the earlier essays with clear statements of where he disagrees with his coauthors The advice in this small book will be useful to mathematicians at all levels

International Relations Manuela Spindler,2013-04-10 The book is written for active learners those keen on cutting their own path through the complex and at times hardly comprehensible world of THEORY in International Relations To aid this process as much as possible this book employs the didactical and methodical concept of integrating teaching and self study The criteria for structured learning about IR theory will be derived from an extensive discussion of the questions and problems of philosophy of science Part 1 Theory of IR refers to the scientific study of IR and covers all of the following subtopics the role and status of theory in the academic discipline of IR the understanding of IR as a science and what a scientific theory is the different assumptions upon which theory building in IR is based the different types of theoretical constructions and models of explanations found at the heart of particular theories and the different approaches taken on how theory and the practice of international relations are linked to each other The criteria for the structured learning process will be applied in Part 2 of the book during the presentation of five selected theories of International Relations The concept is based on learning through example that is the five theories have been chosen because when applying the criteria developed in Part 1 of the book each single theory serves as an example for something deeply important to learn about THEORY of IR more generally
