*Movement* Nicole Gelinas, 2024-11-05 A gripping account of how the automobile has failed NYC and how mass transit and a revitalized streetscape are vital to its post pandemic recovery In 1969 as all students of New York City history think they have learned master builder Robert Moses lost his long battle to urbanist Jane Jacobs over his planned Lower Manhattan Expressway The ten lane elevated expressway would have sliced across SoHo and Little Italy demolishing historic buildings and displacing thousands of families and businesses Jacobs and her neighbors defeated Moses and as a result New York became the only major American city with no interstate highway running through its core Like many global cities though New York had spent fifty years during the first half of the twentieth century trying and failing to tame its heavily populated landscape to fit the private automobile New York has now spent more than fifty years trying to undo those mistakes wresting back city space for people not cars *Movement* New York's Long War to Take Back Its Streets from the Car chronicles the earlier less known battles that preceded the cancellation of the Lower Manhattan Expressway Jacobs became an example for generations of urban planners but whose example did Jacobs emulate in an earlier victory that saved Washington Square Park Moses may serve handily as New York's uber villain now but who before him was responsible for destroying a critical part of New York's transit system A well respected urban writer who has focused on New York's transportation system for more than a decade author Nicole Gelinas resumes the story where Robert Caro's landmark *The Power Broker* ended *Movement* explores how in the half century leading up to the COVID 19 pandemic New York's re embracement of its mass transit system and a livable streetscape helped save the city Gelinas tackles the 1970s environmental movement the 1980s rebuilding of the subways and more contemporary battles from Mayor Bloomberg's push for more pedestrian plazas and bike lanes in the early 2000s to transportation advocates protests to prevent traffic deaths in the Mayor de Blasio era of the 2010s to how New York's stewardship of its streets and subways have played a critical role during the 2020 pandemic and subsequent recovery Introducing a cast of transportation heroes to rival Jane Jacobs Shirley Hayes Hazel Henderson Richard Ravitch Nilka Martell and puncturing the myth of Moses as New York's anti hero *Movement* explores how New York City has helped redefine what it means to be a global city not a place that is easy to drive through but a place where people can take transit walk and bike to work to school or just for fun **Taxi!** Graham Russell Gao Hodges, 2020-03-17 Why the cabdriver is the real victim of the false promises of Uber and the gig economy 2007 Noteworthy Book in Industrial Relations and Labor Economics Princeton University Industrial Relations Section Hailed in its first edition as a classic study of New York City's history and people Graham Russell Gao Hodges's *Taxi* is a remarkable evocation of the forgotten history of the taxi driver This deftly woven narrative captures the spirit of New York City cabdrivers and their hardscrabble struggle to capture a piece of the American dream From labor unrest and racial strife to ruthless competition and political machinations Hodges

recounts this history through contemporary news accounts Hollywood films and the words of the cabbies themselves A new preface recalls the author s five years of hacking in New York City in the early 1970s and a new concluding chapter explores the rise of app based ridesharing services with the arrival of companies like Uber and Lyft Sharply criticizing the use of the independent contractor model that is the cornerstone of Uber and the gig economy Hodges argues that the explosion of for hire vehicles in Manhattan reversed decades of environmental anti congestion efforts He calls for a return to the careful regulations that governed taxicabs for decades and provided a modest yet secure living for cabbies Whether or not you ve ever hailed a cab on Broadway Taxi provides a fascinating perspective on New York s most colorful emissaries **New York City** , Between Public and Private Mobility ,2016-03 TRB Special Report 319 analyzes the ways that innovative transportation services including ridesharing carsharing bikesharing and microtransit are changing mobility for millions of travelers Such services could reduce congestion and emissions from surface transportation if regulated wisely to encourage concurrent instead of sequential ridesharing Rapidly growing transportation network companies TNCs such as Uber and Lyft however are disrupting conventional taxi and limousine services and are raising policy challenges related to personal security and public safety insurance requirements employment and labor issues and accessibility and equity The committee s report offers guidance to state and local officials responsible for policy setting and regulation of for hire transportation services in each of these areas The report also addresses the need for greater consistency in regulations across jurisdictions and calls for TNCs to share more information about the volume the frequency and the types of trips they are providing to allow for informed regulation and planning of transportation services provided by publisher **The Routledge Handbook of Public Transport** Corinne Mulley,John Nelson,Stephen Ison,2021-05-12 The Routledge Handbook of Public Transport is a reference work of chapters providing in depth examination of the current issues and future developments facing public transport Chapters in this book are dedicated to specific key topics identifying the challenges therein and pointing to emerging areas of research and concern The content is written by an international group of expert contributors and is enhanced through contributions from practitioners to deliver a broader perspective The Handbook deals with public transport policy context modal settings public transport environment public transport delivery issues smart card data for planning and the future of public transport This comprehensive reference work will be a vital source for academics researchers and transport practitioners in public transport management transport policy and transport planning **Air Compressor License** National Learning Corporation,2014 The Air Compressor License Passbook R prepares you for your test by allowing you to take practice exams in the subjects you need to study It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam *Transport and Pandemic Experiences* Maria Attard,Corinne Mulley,2022-10-17 Transport and Pandemic Experiences discusses how the accumulated knowledge of the pandemic needs to be capitalised in our fight against climate change and helps to identify future research imperatives for

futurist who combines curiosity skepticism colorful storytelling and deeply reported real world analysis in this essential book for understanding the future *The Signals Are Talking* reveals a systemic way of evaluating new ideas bubbling up on the horizon distinguishing what is a real trend from the merely trendy This book helps us hear which signals are talking sense and which are simply nonsense so that we might know today what developments especially those seemingly random ideas at the fringe as they converge and begin to move toward the mainstream that have long term consequence for tomorrow With the methodology developed in *The Signals Are Talking* we learn how to think like a futurist and answer vitally important questions How will a technology like artificial intelligence machine learning self driving cars biohacking bots and the Internet of Things affect us personally How will it impact our businesses and workplaces How will it eventually change the way we live work play and think and how should we prepare for it now Most importantly Webb persuasively shows that the future isn't something that happens to us passively Instead she allows us to see ahead so that we may forecast what's to come challenging us to create our own preferred futures

profound changes to streets land use and cities But smarter transportation may not necessarily translate into greater sustainability or equity There are clear opportunities to shape advances in transportation and to harness them to reshape cities and improve the socio economic health of cities and residents There are opportunities to reduce collisions and improve access to healthcare for those who need it most particularly high cost high need individuals at the younger and older ends of the age spectrum There is also potential to connect individuals to jobs and change the way cities organize space and optimize trips To date very little discussion has centered around the job and social implications of this technology Further policy dialogue on future transport has lagged particularly in the arenas of sustainability and social justice Little work has been done on decision making in this high uncertainty environment a deficiency that is concerning given that land use and transportation actions have long and lagging timelines This is one of the first books to explore the impact that emerging transport technology is having on cities and their residents and how policy is needed to shape the cities that we want to have in the future The book contains a selection of contributions based on the most advanced empirical research and case studies for how future transport can be harnessed to improve urban sustainability and justice **Housing New York 2.0** ,2017 Since Mayor de Blasio launched the Housing New York Plan in 2014 New York City has accelerated the construction and preservation of affordable housing to levels not seen in 30 years We are on track to secure more affordable housing in the first four years of the Administration than in any comparable period since 1978 The City has tripled the share of affordable housing for households earning less than 25 000 Funding for housing construction and preservation has doubled as have the number of homes in the City s affordable housing lotteries each year Hundreds of once vacant lots have affordable homes rising on them today Reforms to zoning and tax programs are not just incentivizing but mandating affordable apartments paid for by the private sector in new development Page 4 *Transportation Analytics in the Era of Big Data* Satish V. Ukkusuri,Chao Yang,2018-07-28 This book presents papers based on the presentations and discussions at the international workshop on Big Data Smart Transportation Analytics held July 16 and 17 2016 at Tongji University in Shanghai and chaired by Professors Ukkusuri and Yang The book is intended to explore a multidisciplinary perspective to big data science in urban transportation motivated by three critical observations The rapid advances in the observability of assets platforms for matching supply and demand thereby allowing sharing networks previously unimaginable The nearly universal agreement that data from multiple sources such as cell phones social media taxis and transit systems can allow an understanding of infrastructure systems that is critically important to both quality of life and successful economic competition at the global national regional and local levels There is presently a lack of unifying principles and methodologies that approach big data urban systems The workshop brought together varied perspectives from engineering computational scientists state and central government social scientists physicists and network science experts to develop a unifying set of research challenges and methodologies that are likely to impact infrastructure systems with a particular focus on transportation issues The book

deals with the emerging topic of data science for cities a central topic in the last five years that is expected to become critical in academia industry and the government in the future There is currently limited literature for researchers to know the opportunities and state of the art in this emerging area so this book fills a gap by synthesizing the state of the art from various scholars and help identify new research directions for further study **Taxi!** Biju Mathew,2008 Drawing on conversations with the drivers themselves Taxi details both the pressures and triumphs of life behind the wheel Mathew reveals in this highly readable fast paced survey of New York s taxi business that just about everything has been dramatically altered except the yellow paint
