BE- VIIIth SEMESTER-EXAMINATION - MAY- 2012

Subject code: 180803

Date: 08/05/2012

Subject Name: Biomedical Instrumentation

Time: 10:30 am – 01:00 pm

Total Marks: 70

Instructions:

1. Attempt all questions.
2. Make suitable assumptions wherever necessary.
3. Figures to the right indicate full marks.

- Q.1** (a) Explain various components of physiological system of body. 07
 (b) List and discuss briefly various types of transducers used for Bio- medical applications. 07
- Q.2** (a) Explain electrode tissue interface for surface electrodes used with jelly. Also discuss Electrode Electrolyte interface. 07
 (b) What is EEG? Why is it much more difficult to recognize than ECG? How can certain characteristic EEG Waveform be related to sleep? 07
OR
 (b) Describe Ultrasonic Blood flow method for blood flow measurement through artery along with governing Doppler equation. 07
- Q.3** (a) Write short notes on Pacemakers and Defibrillators. 07
 (b) What is Heart Lung Machine? Explain its working with constructional Diagram. 07
OR
- Q.3** (a) What do you understand by the terms "blood count"? Describe the operation of blood counter. 07
 (b) Explain the structure and function of central nervous system. 07
- Q.4** (a) Explain the generation of bioelectric potential in human body. Explain acting and resting potential with necessary wave form. 07
 (b) What is Hemodialysis? Explain Hemodialysis machine with block diagram 07
OR
- Q.4** (a) Explain Auto Analyser system with the help of neat diagram and explain function of each block? 07
 (b) What is Colorimeter? Explain block diagram of colorimeter with its application. 07
- Q.5** (a) Describe and explain shock hazards for electric equipment and prevention against them. 07
 (b) Explain the working principle of CT Scan with block diagram. 07
OR
- Q.5** (a) What you mean by pH? Explain measurement of pH with electrode. How this system calibrated? 07
 (b) Name the three basic types of electrodes for measurement of bioelectric potentials. Explain any one in detail 07

Port and Harbour Engineering Adrian Jarvis,2016-12-05 During the 19th century the engineering of ports and harbours became a large and specialised branch of the profession This development began in ports in physically difficult locations and may be particularly identified with the growth of the Port of Liverpool Stimulated by the arrival of ever larger steamships and the heavy investment in port facilities that they demanded it spread around much of the world The opening papers give examples of what could be achieved in antiquity the following ones set out the advances in design and technology from 1700 to the start of this century and note some of the failures and recurrent problems They also illustrate the critical importance of political and economic factors in determining what the engineers achieved **Engineering Mathematics-II**

A. Ganeshi,2009 About the Book This book Engineering Mathematics II is designed as a self contained comprehensive classroom text for the second semester B E Classes of Visveswaraiah Technological University as per the Revised new Syllabus The topics included are Differential Calculus Integral Calculus and Vector Integration Differential Equations and Laplace Transforms The book is written in a simple way and is accompanied with explanatory figures All this make the students enjoy the subject while they learn Inclusion of selected exercises and problems make the book educational in nature It shou

Digital Electronics Anil K. Maini,2007-09-27 The fundamentals and implementation of digital electronics are essential to understanding the design and working of consumer industrial electronics communications embedded systems computers security and military equipment Devices used in applications such as these are constantly decreasing in size and employing more complex technology It is therefore essential for engineers and students to understand the fundamentals implementation and application principles of digital electronics devices and integrated circuits This is so that they can use the most appropriate and effective technique to suit their technical need This book provides practical and comprehensive coverage of digital electronics bringing together information on fundamental theory operational aspects and potential applications With worked problems examples and review questions for each chapter Digital Electronics includes information on number systems binary codes digital arithmetic logic gates and families and Boolean algebra an in depth look at multiplexers de multiplexers devices for arithmetic operations flip flops and related devices counters and registers and data conversion circuits up to date coverage of recent application fields such as programmable logic devices microprocessors microcontrollers digital troubleshooting and digital instrumentation A comprehensive must read book on digital electronics for senior undergraduate and graduate students of electrical electronics and computer engineering and a valuable reference book for professionals and researchers

Manufacturing Processes H. N. Gupta,2012-09 Effective from 2008 09 session U P T U has introduced the subject of manufacturing processes for first year engineering students of all streams This textbook covers the entire course material in a distilled form **Principles of Management** David S. Bright,Anastasia H.

Cortes,Eva Hartmann,2023-05-16 Black white print Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management This is a traditional approach to management using the leading planning organizing and controlling approach Management is a broad business discipline and the Principles of Management course covers many management areas such as human resource management and strategic management as well as behavioral areas such as motivation No one individual can be an expert in all areas of management so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters Design of Steel Structures Elias G. Abu-Saba,2012-12-06 This book is intended for classroom teaching in architectural and civil engineering at the graduate and undergraduate levels Although it has been developed from lecture notes given in structural steel design it can be useful to practicing engineers Many of the examples presented in this book are drawn from the field of design of structures Design of Steel Structures can be used for one or two semesters of three hours each on the undergraduate level For a two semester curriculum Chapters 1 through 8 can be used during the first semester Heavy emphasis should be placed on Chapters 1 through 5 giving the student a brief exposure to the consideration of wind and earthquakes in the design of buildings With the new federal requirements vis a vis wind and earthquake hazards it is beneficial to the student to have some understanding of the underlying concepts in this field In addition to the class lectures the instructor should require the student to submit a term project that includes the complete structural design of a multi story building using standard design procedures as specified by AISC Specifications Thus the use of the AISC Steel Construction Manual is a must in teaching this course In the second semester Chapters 9 through 13 should be covered At the undergraduate level Chapters 11 through 13 should be used on a limited basis leaving the student more time to concentrate on composite construction and built up girders

Tread Upon the Lion the Story of Tommie Titcombe Sophie de la Haye,2013-12 Tommie Titcombe was small in stature physically but spiritually he was a giant Saved in his early twenties he soon felt called of God to take the gospel of Jesus Christ to those who had never heard the good news of salvation Twice he applied to the Sudan Interior Mission and twice he was refused He told the director Rowland Bingham that he was going to Africa anyway Upon being asked what board he was going under Tommie replied I don t know Mr Bingham It may be some old woman s wash board but I m going to Africa Seeing Tommie s determination Mr Bingham soon afterwards relented and accepted him into SIM and he became the first missionary to live among the Yagba people of Nigeria West Africa His story is a blood stirring pioneer thriller More than that it is the record of how God used a very ordinary man to break into an animistic society and start a movement that produced a large and healthy church Tommie Titcombe s spiritual insights and personal courage have made

his name a legend among the many Christians of Yagbaland His story also provides us with an extremely relevant case history of sound missionary principles at work Engineering Electromagnetics William H. Hayt, Jr, *Introduction to Cryptography and Network Security* Behrouz A. Forouzan,2008 In this new first edition well known author Behrouz Forouzan uses his accessible writing style and visual approach to simplify the difficult concepts of cryptography and network security While many security books assume knowledge of number theory and advanced math or present mainly theoretical ideas Forouzan presents difficult security topics from the ground up A gentle introduction to the fundamentals of number theory is provided in the opening chapters paving the way for the student to move on to more complex security and cryptography topics Difficult math concepts are organized in appendices at the end of each chapter so that students can first learn the principles then apply the technical background Hundreds of examples as well as fully coded programs round out a practical hands on approach which encourages students to test the material they are learning **Stopping by Woods on a Snowy Evening** Robert Frost,2022-11-03
