*IT Convergence and Security 2012* Kinam J. Kim, Kyung-Yong Chung, 2012-12-12  
 The proceedings approach the subject matter with problems in technical convergence and convergences of security technology. This approach is new because we look at new issues that arise from techniques converging. The general scope of the proceedings content is convergence security and the latest information technology. The intended readership are societies, enterprises and research institutes and intended content level is mid to highly educated persons. The most important features and benefits of the proceedings are the introduction of the most recent information technology and its related ideas, applications and problems related to technology convergence and its case studies and finally an introduction of converging existing security techniques through convergence security. Overall, through the proceedings, authors will be able to understand the most state of the art information strategies and technologies of convergence security. **GOGO NO89**
