OWNER'S MANUAL

Instructions for the installation, use & care of:

R & A Series

G Series

Compact Undercounter & Prep-Table

TE Series/TU Series/TS Series

I. RECEIPT & SUPPORT INSTALLATION:

You should carefully inspect your Traulsen unit for damage during delivery. If damage is detected, you should call all the crating materials and make note on the carrier's Bill Of Lading describing this. A freight claim should be filed immediately.

After uncrating the unit, select a level location for final placement. Install the legs or casters as shown below or, in the case of roll-in and roll-out models, these must be sealed to the floor in accordance with local health codes.

R & A Series/G Series Supports ("Stem" type legs)

TE/TU/TS Series Supports

Compacts Supports ("Stem" type legs & casters)

All models (except undercounters) should be installed to allow at least 12" of clear space above the unit. In all cases the bottom must be free of any obstruction which could prevent proper air-flow.

Most units are supplied with a cord and plug, which can simply be plugged into a dedicated appropriately sized outlet. For those requiring hard-wiring directly to the power supply, this should be done by only a qualified electrician.

NOTE: Some models (model numbers beginning with "UR" and single section dual-temp) require provision of a bottom mounted condensate evaporator. Follow instructions provided with unit, along with this for installation.

II. Operation:

Most Traulsen equipment is plug and play, such as G-Series & most Compacts. However, once power is supplied to the unit, some may require simple steps to get started using your Traulsen equipment, such as the:

R & A Series/TE Series/TU Series/TS Series Cabinets

Although fully operational the control will flash the cabinet temperature alternately with the message ELE LOG (power loss). Press the alarm cancel button  to cancel this message.

R & A Series Control

TE/TU/TS Series Control

Hot Food Holding Cabinets

Are shipped in the OFF position. To begin use, first press the ON/OFF button , and then adjust to the desired operating temperature using the UP/DOWN  buttons.

Hot Food Control

G Series/Compact Cabinets

Are fully operational and no action is required to start. Please note, most compacts are equipped with a electromechanical control.

Compact Cabinets (electromechanical)

The temperature is set at the factory but local conditions may necessitate slight adjustment. The temperature control is located in the front of the evaporator housing. To adjust, turn the adjustment screw with a screwdriver a small amount at a time, turning clockwise lowers the temperature. An "OFF" position is fully counter-clockwise and interrupts power to the compressor and condenser fan only, not the entire refrigerator.

Talking to Our Selves John M. Doris, 2015-03-19 John M Doris presents a new account of agency and responsibility which reconciles our understanding of ourselves as moral agents with psychological research on the unconscious mind Much philosophical theorizing maintains that the exercise of morally responsible agency consists in judgment and behavior ordered by accurate reflection On such theories when human beings are able to direct their lives in the manner philosophers have dignified with the honorific agency it is because they know what they are doing and why they are doing it This understanding is compromised by quantities of psychological research on unconscious processing which suggests that accurate reflection is distressingly uncommon very often behavior is ordered by surprisingly inaccurate self awareness Thus if agency requires accurate reflection people seldom exercise agency and skepticism about agency threatens To counter the skeptical threat John M Doris proposes an alternative theory that requires neither reflection nor accurate self awareness he identifies a dialogic form of agency where self direction is facilitated by exchange of the rationalizations with which people explain and justify themselves to one another The result is a stoutly interdisciplinary theory sensitive to both what human beings are like creatures with opaque and unruly psychologies and what they need an account of agency sufficient to support a practice of moral responsibility
