**Vehicle Powertrain Systems** David Crolla, Behrooz Mashadi, 2011-12-30 The powertrain is at the heart of vehicle design the engine whether it is a conventional hybrid or electric design provides the motive power which is then managed and controlled through the transmission and final drive components The overall powertrain system therefore defines the dynamic performance and character of the vehicle The design of the powertrain has conventionally been tackled by analyzing each of the subsystems individually and the individual components for example engine transmission and driveline have received considerable attention in textbooks over the past decades The key theme of this book is to take a systems approach to look at the integration of the components so that the whole powertrain system meets the demands of overall energy efficiency and good drivability *Vehicle Powertrain Systems* provides a thorough description and analysis of all the powertrain components and then treats them together so that the overall performance of the vehicle can be understood and calculated The text is well supported by practical problems and worked examples Extensive use is made of the MATLAB R software and many example programmes for vehicle calculations are provided in the text Key features Structured approach to explaining the fundamentals of powertrain engineering Integration of powertrain components into overall vehicle design Emphasis on practical vehicle design issues Extensive use of practical problems and worked examples Provision of MATLAB

R programmes for the reader to use in vehicle performance calculations This comprehensive and integrated analysis of vehicle powertrain engineering provides an invaluable resource for undergraduate and postgraduate automotive engineering students and is a useful reference for practicing engineers in the vehicle industry *Automotive Paints and Coatings* Hans-Joachim Streitberger, Karl-Friedrich Dossel, 2008-09-08 Now in its second edition and still the only book of its kind this is an authoritative treatment of all stages of the coating process from body materials paint shop design and pre treatment through primer surfacers and top coats New topics of interest covered are color control specification and testing of coatings as well as quality and supply concepts while valuable information on capital and legislation aspects is given Invaluable for engineers in the automotive and paints and coatings industry as well as for students in the field Sustainable Energy David J. C. MacKay, 2009 **Doing & Writing Qualitative Research** Adrian Holliday, 2007-01-24 Accessible practical and concise this revised edition expertly tackles the practical problems which writers face when they attempt to transfer the rich data experience of their real world research into a textual product New attention is paid to the crucial issues of the nature and use of visual data personal narrative core and periphery data and data reconstruction and fictionalization Sensitive issues dealing with the appropriate use of identity in research settings are clearly discussed while techniques for avoiding reductive judgements are presented and critically discussed By making the workings of written study transparent the book demonstrates how to manage subjectivity and achieve scientific rigour in the qualitative research process This book provides accessible advice for novice researchers on where to begin and how to proceed But much more than a simple manual it also guides the more experience researcher through the social cultural and political complexities involved in every step of the way It is an essential tool for students in all disciplines that engage in qualitative research including sociology applied linguistics management sport science health studies and education
