Leadership scholar and consultant Dr. Anthony J. Marchese invites everyone who wishes to lead an extraordinary life on an incredible expedition- a journey of self- discovery. Unlike most leadership books which impose a to-do list of unfamiliar or unnatural strategies to fix what is wrong or lacking in oneself or others, Design challenges readers to explore and develop what is already there- to harness what is right. Humanity is comprised of original individuals; each endowed with a remarkable identity, rich in gifts just waiting to be discovered and shared with the world. In a blend of research-inspired principles and real-life stories, Marchese draws upon multiple disciplines to emphasize the originality of the human design and its exceptional capacity to enrich a world desperately in need of positive change. Inspiring both reflection and action, the fast-moving chapters lead readers to a crescendo as they are guided to develop their very own personal owners manual and establish a promising foundation for purposeful learning, living, and leading. Excerpt from The Antarctic Manual, for the Use of the Expedition of 1901 In November 1900 I was so fortunate as to secure the services of Mr. George Murray, as editor of such a manual. Mr. Murray entered fully into the Spirit of my plan, arranged the subjects that would require treatment, obtained the services of the eminent men of science who have contributed, and has edited the whole work. In accordance with the plan, the manual consists of instructions and of memoirs containing information. In the instructions are included the Astronomical Data, and the papers on Tidal, Wave, Ice and Pendulum Observations, on Terrestrial Magnetism, Climate, the Aurora, Atmospheric Electricity, Geology, Volcanic Action, and Rock Collecting, and Botany. But these instructions include much suggestive information. Especially is this the case in Dr. Blanford's paper on Antarctic Geology. In his Chemical and Physical Notes Mr. Buchanan properly assumes a due knowledge of routine operations on the part of the physicist. He therefore furnishes him, and the other observers, with observations by the way, as he calls the exceedingly valuable information and suggestions contained in his paper. It would not be easy to exaggerate the value of Mr. Buchanan's contribution. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
