Sustainability in Energy and Buildings Sep 04 2021
This volume contains the proceedings of the 11th KES International Conference on Sustainability and Energy in Buildings 2019 (SEB19) held in Budapest, 4th -5th July 2019 organised by KES International in partnership with Cardiff Metropolitan University, Wales, UK. SEB-19 invited contributions on a range of topics related to sustainable buildings and explored

innovative themes regarding sustainable energy systems. The aim of the conference was to bring together researchers, and government and industry professionals to discuss the future of energy in buildings, neighbourhoods and cities from a theoretical, practical, implementation and simulation perspective. The conference formed an exciting chance to present, interact, and learn about the latest research and practical developments on the subject. The conference attracted submissions from around the world. Submissions for the Full-Paper Track were subjected to a blind peer-review process. Only the best of these were selected for presentation at the conference and publication in these proceedings. It is intended that this volume provides a useful and informative snapshot of recent research developments in the important and vibrant area of Sustainability in Energy and Buildings.

Government Anti-Corruption Strategies Aug 16 2022 As a political and social disease, public corruption costs governments and businesses around the world trillions of dollars every year. Government Anti-Corruption Strategies: A Cross-Cultural Perspective provides you with a better understanding of public corruption and

governments anti-corruption practices. It outlines a general framework of anti-c

***2013 Global Hunger Index Sep 28 2023* The 2013 Global Hunger Index (GHI), which reflects data from the period 2008–2012, shows that global hunger has improved since 1990, falling by one-third. Despite the progress made, the level of hunger in the world remains "serious," with 870 million people going hungry, according to estimates by the Food and Agriculture Organization of the United Nations. The policy recommendations in this report offer a path forward for the international development, humanitarian, and donor communities; for country-level policymakers in food-insecure countries; and for development and humanitarian practitioners.**

STPM Mathematics (M) Past Year Q & A Feb 02 2024 The best book for STPM Mathematics (M) final revision. STPM Past Year Q & A Series - STPM Mathematics (M) Year 2013 to Year 2016 (Paper 1, Paper 2, and Paper 3). MPM Specimen Papers are included. All questions are with full solutions and are sorted according to the years and papers of the new STPM syllabus. Questions and sample answers with full workings are provided. collected from the forums online. Please be reminded that the sample solutions are not 100% following the real STPM marking scheme. If you are KK LEE students. Join his STPM Mathematics Facebook Group at www.facebook.com/groups/stpmmaths to download this book for free.

Carbon Pricing Jul 03 2021 In 2012, Australia took the major step of introducing a carbon price, involving the creation of a system of emissions permits initially issued at a fixed price. Carbon Pricing brings together experts instrumental in the development, and operation, of A

***Global Burden of Armed Violence 2015 Feb 07 2022* The 2015 edition of the Global Burden of Armed Violence provides a wealth of data relevant to security and the post-2015 sustainable development framework. It estimates that 508,000 people died violently - in both conflict and non-conflict settings - every year in 2007-12, down from 526,000 in 2004-09. This trend is visible in non-conflict settings, where the proportion of women and girls is also slightly reduced, from 17 to 16 per cent. Yet, the number of direct conflict deaths is on the rise: from 55,000 to 70,000 per year over the same**

periods. Firearms are used in close to half of all homicides committed and in almost one-third of direct conflict deaths. Nearly USD 2 trillion in global homicide-related economic losses could have been saved if the homicide rate in 2000-10 had been reduced to the lowest practically attainable levels - between 2 and 3 deaths per 100,000 population.

***The Routledge Companion to Humanitarian Action* Mar 30 2021 The Companion on Humanitarian Action addresses the political, ethical, legal and practical issues which influence reactions to humanitarian crisis. It does so by exploring the daily dilemmas faced by a range of actors, including policy makers, aid workers, the private sector and the beneficiaries of aid and by challenging common perceptions regarding humanitarian crisis and the policies put in place to address these. Through such explorations, it provides practitioners and scholars with the knowledge needed to both understand and improve upon current forms of humanitarian action. The Companion will be of use to those interested a range of humanitarian programmes ranging from emergency medical assistance, military interventions, managing refugee flows and the implementation of**

international humanitarian law. As opposed to addressing specific programmes, it will explore five themes seen as relevant to understanding and engaging in all modes of humanitarian action. The first section explores varying interpretations of humanitarianism, including critical historical and political-economic explanations as well as more practice based explorations focused on notions needs assessments and evaluation. Following this, readers will be exposed to the latest debates on a range of humanitarian principles including neutrality and sovereignty, before exploring the key issues faced by the main actors involved in humanitarian crisis (from international NGOs to local community based organizations). The final two sections address what are seen as key dilemmas in regards to humanitarian action and emerging trends in the humanitarian system, including the increasing role of social media in responding to crises. Whilst not a 'how to guide', the Companion contains many practical insights for policy makers and aid workers, whilst also offering analytical insights for students of humanitarian action. Indeed, throughout the book, readers will come to the realization that understanding and improving humanitarian

action simultaneously requires both active critical reflection and an acceptance of the urgency and timeliness of action that is required for humanitarian assistance to have an impact on vital human needs. Exploring a sector that is far from homogenous, both practitioners and scholars alike will find the contributions of this book offers them a deeper understanding of the motivations and mechanics of current interventions, but also insight into current changes and progress occurring in the field of humanitarian practice.

**Doing Action Research in Your Own Organization
Jun 25 2023 The Fourth Edition of this best-selling book is packed full of practical, expert advice on how to navigate the murky waters of ethics, politics and management in your own organization. Multidisciplinary in its approach to action research, the book sets out a step-by-step template for researchers to follow and adapt.**

**Coghlan and Brannick: Introduce and contextualize action research as a method
Provide guidance on how to design and implement your action research project
Explore interlevel dynamics
Discuss role duality and access
Suggest effective ways to analyze your data
Provide helpful tips on how to disseminate**

your findings. The book and supporting companion website are the ideal resource for students, researchers and practitioners hoping to generate real change through their action research project and will be particularly relevant to those studying Business and Management, Nursing and Health, Education and Sociology.

**Routledge Handbook of Politics and Technology
Sep 16 2022 This handbook provides a comprehensive global survey of the politics of technology. Written by an outstanding line up of distinguished scholars in the field, the handbook covers all aspects of the relationship between politics and technology including: Demand and support for new technologies and innovation by the state The effects of technology policies Technology development and innovation difference between various countries and regions Policy instruments and techno-industrial innovation Dynamism and change as outcomes of government policies Driving forces for science and innovative development Forming the basis of this handbook are examples of regional development, country studies and a rich variety of technologies, as well as topical issues such as divergent political interests in relation to technology and the economic exploitation of**

technologies. Employing a comparative and interdisciplinary approach in order to analyse the interplay between government activities and the development of new technologies, this handbook will be an invaluable resource for all students, scholars and practitioners working in the politics of technology, public policy and policy analysis.

Water and Power Apr 11 2022 This book brings together a talented international group of scholars, policy practitioners, and NGO professionals that explores a range of issues relating to environmental, developmental, and governing challenges on the Mekong, one of the world's greatest rivers and, alas, one of the most endangered. The book is divided into three sections devoted in turn to historical perspectives on the Lower Mekong Basin. Issues relate to livelihood strategies, environmental threats, and adaptation strategies; and various aspects of river governance, with individual authors treating questions of governance at different levels of refraction and in different registers. The result is a fresh and innovative collection of essays, which, taken together, provide much-needed new perspectives on some of the most important and seemingly intractable

environmental and development issues in contemporary Asia.

ICCSM2013-Proceedings of the International Conference on Cloud Security Management Oct 18 2022

Bicycling for Transportation Jan 21 2023
Bicycling for Transportation examines the individual and societal factors of active transportation and biking behavior. The book uses an Interdisciplinary approach to provide a comprehensive overview of bicycling for transportation research. It examines the variability in biking participation among different demographic groups and the multiple levels of influence on biking to better inform researchers and practitioners on the effective use of community resources, programming and policymaking. It is an ideal resource for public health professionals trying to encourage physical activity through biking. In addition, it makes the case for new infrastructure that supports these initiatives. Provides evidence-based insights on cost-effective interventions for improving biking participation Includes numerous case studies and best practices that highlight multi-level approaches in a variety of settings Explores individual and social factors related to biking

behavior, such as race, gender and self-efficacy

***The Great Surge* May 13 2022** The untold story
of the global poor today: A distinguished expert
and advisor to developing nations reveals how
we've reduced poverty, increased incomes,
improved health, curbed violence, and spread
democracy—and how to ensure the
improvements continue. We live today at a time
of great progress for the global poor. Never
before have so many people, in so many
developing countries, made so much progress.
Most people believe the opposite: that with a
few exceptions like China and India, the majority
of developing countries are hopelessly mired in
deep poverty, led by inept dictators, and living
with pervasive famine, widespread disease,
constant violence, and little hope for change. But
a major transformation is underway—and has
been for two decades now. Since the early 1990s

more than 700 million people have been lifted out of extreme poverty, six million fewer children die every year from disease, tens of millions more girls are in school, millions more people have access to clean water, and democracy—often fragile and imperfect—has become the norm in developing countries around the world. The Great Surge tells the remarkable story of this unprecedented economic, social, and political transformation. It shows how the end of the Cold War, the development of new technologies, globalization, courageous local leadership, and in some cases, good fortune, have combined to dramatically improve the fate of hundreds of millions of people in poor countries around the world. Most importantly, The Great Surge reveals how we can fight the changing tides of climate change, resource demand, economic and political mismanagement, and demographic pressures to accelerate the political, economic, and social development that has been helping the poorest of the poor around the world.

**The Diplomatic System of the European Union
May 01 2021 Over the past five years, the EU has established a new system of diplomacy centred on the European External Action Service (EEAS)**

and the High Representative for Foreign Affairs and Security Policy. This new system reflects a process of evolution in a changing context, and has been faced by major challenges since its inception. This book examines the diplomatic system of the EU, locating it within the broader study of diplomacy and the European integration project. The volume is structured around the interrelated themes of institutional change and the evolving practices of EU diplomacy. It tracks the development of the EU's system of diplomacy, with particular reference to the implementation of the Lisbon Treaty, the establishment of the EEAS and the emerging practices of EU strategic and structural diplomacy. Bringing together contributions from leading experts in the field, this book provides an original approach to the development and operation of the EU's diplomatic system. This book will be of interest to students and scholars of European Union international relations, European Union politics and diplomacy.

Wildlife Trafficking Jul 27 2023 This book provides a unique, comprehensive exploration of the scale, scope, threats and drivers of wildlife trafficking. It also undertakes a distinctive exploration of who the victims and offenders of

wildlife trafficking are as well as analysing the stakeholders who are involved in collaborative efforts to end this devastating green crime.

Leaving no one behind Dec 08 2021 In Africa, women are critical agents of change in the fight against rural poverty, hunger and malnutrition. They are the backbone of their households, communities, and rural economies covering important roles in food production, processing and marketing, and also in the nutrition of the family. However, with food systems rapidly modernizing and dramatic effects of climate change and environmental degradation becoming the “new normal”, they continue to face multiple challenges due to persisting gender discriminations. Over the years, remarkable political commitments to improve women’s condition and status have been made, but substantial gender gaps still remain in the access and control over productive resources and assets, services and markets. Overcoming these challenges will require addressing the root causes of gender inequalities through innovative and gender-transformative approaches. According to FAO’s latest estimates (SOFI, 2019), the number of people suffering from hunger has been rising. Just this trend - and the

awareness that we lost a decade of progress - is sufficient to underscore the immense challenge of achieving the Zero Hunger target by 2030. The situation is most alarming in sub-Saharan Africa, where the number of undernourished people has steadily increased since 2014, to 237 million in 2018. These findings are in line with the 2019 SDG report. It shows that we are still lagging behind in achieving the SDGs as the global response has not been ambitious enough.

The Microgrid Revolution Jun 13 2022 What kinds (according to U.S. News & World Report) of clean electricity initiatives—ones that make sense on public policy and business strategy levels—could overcome the hurdles in shifting away from the entrenched electricity and petroleum-based transport industries in the United States? This book explores the tremendous opportunities of the new electricity revolution that looks to threaten the century-old business models of our existing power production infrastructure. The electricity industry, having been in place for more than 100 years, has established tremendous power and influence. But as solar- and wind-based energy businesses gain small footholds and expand their impact, the incumbent electricity businesses

face fundamental challenges that threaten their century-old business models. Will technological advances and the motivation to control climate change finally effect a revolution in the electricity markets? This unique book proposes public policy- and business strategy-level initiatives that could overcome the structural impediments that prevail in the current electricity industries and predicts the important changes to come in the immediate and distant future. In *The Microgrid Revolution: Business Strategies for Next-Generation Electricity*, author Mahesh P. Bhave explains the current state of electricity production, identifies its widespread problems, and proposes a specific approach and particular solution to the puzzle of supplying clean energy for the 21st-century world. The introductory chapters lay the groundwork for the author's provocative thesis, and the concluding chapters elaborate on it with broad implications. By examining the subject material from the perspectives of public policy and regulatory concerns, corporate strategy, industry structure changes, innovation, and climate change as well as from a technological angle, readers from diverse industries and professional backgrounds will be able to understand how the coming

electricity revolution is something we all have the power to influence.

Disorder and the Disinformation Society Feb 27 2021 This book is the first general social analysis that seriously considers the daily experience of information disruption and software failure within contemporary Western society. Through an investigation of informationalism, defined as a contemporary form of capitalism, it describes the social processes producing informational disorder. While most social theory sees disorder as secondary, pathological or uninteresting, this

book takes disordering processes as central to social life. The book engages with theories of information society which privilege information order, offering a strong counterpoint centred on "disinformation." Disorder and the Disinformation Society offers a practical agenda, arguing that difficulties in producing software are both inherent to the process of developing software and in the social dynamics of informationalism. It outlines the dynamics of software failure as they impinge on information workers and on daily life, explores why computerized finance has become inherently self-disruptive, asks how digital enclosure and intellectual property create conflicts over cultural creativity and disrupt informational accuracy and scholarship, and reveals how social media can extend, but also distort, the development of social movements.

2019 UPSC IAS/ IPS MAINS General Studies Solved Paper 3 (as per Word Limit) Mar 03 2024
Uneven Citizenship: Minorities and Migrants in the Post-Yugoslav Space Apr 23 2023 This book focuses on the relations between citizenship and various manifestations of diversity, including, but not exclusively, ethnicity. Contributors address migrants and minorities in a novel and

original way by adding the concept of ‘uneven citizenship’ to the debate surrounding the former Yugoslavian states. Referring to this ‘uneven citizenship’ concept, this book not only engages with exclusionary legal, political and social practices but also looks at other unanticipated or unaccounted for results of citizenship policies. Individual chapters address statuses, rights, and duties of refugees, internally displaced persons (IDPs), returnees, Roma, and ‘claimed co-ethnics’, as well as various interactions between dominant and non-dominant groups in the post-Yugoslav space. The particular focus is on ‘migrants and minorities’, as these are frequently overlapping categories in the post-Yugoslav context and indeed more generally. Not only is policy framework addressed, but also public understanding and the socio-historical developments which created legally and culturally stratified, transnationally marginalized, desired and claimed co-ethnics, and those less wanted, often on the margins of citizenship. This book was originally published as a special issue of Ethnopolitics.

**The New Emperors Nov 06 2021 China has
become the powerhouse of the world economy
and home to 1 in 5 of the world's population, yet
we know almost nothing of the people who lead
it. How does one become the leader of the
world's newest superpower? And who holds the
real power in the Chinese system? In The New
Emperors, the noted China expert Kerry Brown
journeys deep into the heart of the secretive
Communist Party. China's system might have its
roots in peasant rebellion but it is now firmly
under the control of a power-conscious Beijing
elite, almost half of whose members are related
directly to former senior Party leaders. Brown
reveals the intrigue and scandal surrounding the
internal battle raging between two China's: one
founded by Mao on Communist principles, and a
modern China in which 'to get rich is glorious'. At
the centre of it all sits the latest Party Secretary,
Xi Jinping - the son of a revolutionary, with links**

both to big business and to the People's Liberation Army. His rise to power is symbolic of the new emperors leading the world's next superpower.

***A University Education* Jun 01 2021 Universities have a crucial role in the modern world. In England entrance to universities is by nationwide competition which means English universities have an exceptional influence on schools - a striking theme of the book. This important book first investigates the university as an institution and then tracks the individual on their journey to and through university. In *A University Education*, David Willetts presents a compelling case for the ongoing importance of the university, both as one of the great institutions of modern society and as a transformational experience for the individual. The book also makes illuminating comparisons with higher education in other countries, especially the US and Germany. Drawing on his experience as UK Minister for Universities and Science from 2010 to 2014, the author offers a powerful account of the value of higher education and the case for more expansion. He covers controversial issues in which he was involved from access for disadvantaged students**

to the introduction of £9,000 fees. The final section addresses some of the big questions for the future, such as the the relationship between universities and business, especially in promoting innovation.. He argues that the two great contemporary trends of globalisation and technological innovation will both change the university significantly. This is an authoritative account of English universities setting them for the first time in their new legal and regulatory framework.

2019 UPSC IAS/ IPS MAINS General Studies
Solved Paper 2 (as per Word Limit) Nov 30 2023

Transforming Gender and Food Security in the Global South Jan 09 2022 Drawing on studies from Africa, Asia and South America, this book provides empirical evidence and conceptual explorations of the gendered dimensions of food security. It investigates how food security and gender inequity are conceptualized within interventions, assesses the impacts and outcomes of gender-responsive programs on food security and gender equity and addresses diverse approaches to gender research and practice that range from descriptive and analytical to strategic and transformative. The chapters draw on diverse theoretical

perspectives, including transformative learning, feminist theory, deliberative democracy and technology adoption. As a result, they add important conceptual and empirical material to a growing literature on the challenges of gender equity in agricultural production. A unique feature of this book is the integration of both analytic and transformative approaches to understanding gender and food security. The analytic material shows how food security interventions enable women and men to meet the long-term nutritional needs of their households, and to enhance their economic position. The transformative chapters also document efforts to build durable and equitable relationships between men and women, addressing underlying social, cultural and economic causes of gender inequality. Taken together, these combined approaches enable women and men to reflect on gendered divisions of labor and resources related to food, and to reshape these divisions in ways which benefit families and communities. Co-published with the International Development Research Centre.

Plundering the North Feb 19 2023 The manufacturing of a chronic food crisis Food insecurity in the North is one of Canada's most shameful public health and human rights crises. In Plundering the North, Kristin Burnett and Travis Hay examine the disturbing mechanics behind the origins of this crisis: state and corporate intervention in northern Indigenous foodways. Despite claims to the contrary by governments, the Hudson's Bay Company (HBC), and the contemporary North West Company (NWC), the exorbitant cost of food in the North is neither a naturally occurring phenomenon nor the result of free-market forces. Rather, inflated food prices are the direct result of government policies and corporate monopolies. Using food as a lens to track the institutional presence of the Canadian state in the North, Burnett and Hay chart the social, economic, and political changes

that have taken place in northern Ontario since the 1950s. They explore the roles of state food policy and the HBC and NWC in setting up, perpetuating, and profiting from food insecurity while undermining Indigenous food sovereignties and self-determination. Plundering the North provides fresh insight into Canada's settler colonial project by re-evaluating northern food policy and laying bare the governmental and corporate processes behind the chronic food insecurity experienced by northern Indigenous communities.

Creating Sustainable Bioeconomies Aug 28 2023

The growing global demand for food, feed and bio-based renewable material is changing the conditions for agricultural production worldwide. At the same time, revolutionary achievements in the field of biosciences are contributing to a transition whereby bio-based alternatives for energy and materials are becoming more competitive. *Creating Sustainable Bioeconomies* explores the prospects for biosciences and how its innovation has the potential to help countries in the North (Europe) and the South (Africa) to move towards resource efficient agriculture and sustainable bioeconomies. Throughout the book, the situations of Europe and Sub-Saharan Africa will be compared and contrasted, and opportunities for mutual learning and collaboration are explored. The chapters have been written by high profile authors and deal with a wide range of issues affecting the development of bioeconomies on both continents. This book compares and contrasts the situations of these two regions as they endeavour to develop knowledge based bioeconomies. This volume is suitable for those who are interested in ecological economics, development economics and environmental

economics. It also provides action plans assisting policy-makers in both areas to support the transition to knowledge based and sustainable bioeconomies.

***Adding Value to Libraries, Archives, and Museums* Oct 06 2021** This book explains the concept of adding value and shows staff at libraries and other organizations why they need to take steps now to ensure they are adding new value to their communities—whether it be a local town or neighborhood, a faculty and student body, or a school. Value is at the core of every organization's purpose. Without value, organizations die. Libraries—as well as museums, archives, and galleries—have traditionally added value to their communities through their collections and services, but yesterday's collections and services are no longer enough. In order to remain sustainable, today's libraries, archives, museums, and galleries must explore new ways to add value that resonate in the lives of their customers. This unique book explains how addressing the "5 C's" of adding value—content, context, connection, collaboration, and community—enables organizations to find new ways to invigorate their services, better serve

their communities, and thrive today and tomorrow. It addresses adding value in the context of other key topics, such as crowdsourcing, embedded librarianship, makerspaces, self publishing, and repurposing spaces. Filled with charts, tables, screenshots, and other visual representation, this is a useful and provocative guide that anyone interested in vesting in the successful future of libraries, archives, and museums needs to read.

Knowledge Production and Contradictory Functions in African Higher Education Jul 15 2022

The dominant global discourse in higher education now focuses on world-class universities inevitably located predominantly in North America, Europe and, increasingly, East Asia. The rest of the world, including Africa, is left to play catch-up. But that discourse should focus rather on the tensions, even contradictions, between excellence and engagement with which all universities must grapple. Here the African experience has much to offer the high-participation and generously resourced systems of the so-called developed world. This book offers a critical review of that experience, and so makes a major contribution to our understanding of higher education.

Tourism and Development May 25 2023 This book explores the relationship between tourism and development and establishes a conceptual link between the interconnected disciplines of tourism studies and development studies. This new edition includes updated chapters drawing on contemporary knowledge as well as 5 new chapters that consider emergent themes in tourism and development.
